Innovations In Macroeconomics:

Innovations in Macroeconomics Paul J.J. Welfens, 2009-12-23 Modern macroeconomics suffers from an unclear link between short term Keynesian analysis and long term growth modelling This book presents a new link between monetary analysis and growth modelling in open economies Structural change innovations and growth are considered from a new perspective With respect to economic policy in particular innovation policy the analysis implies major changes concerning both EU countries and other leading OECD economies

Teaching Innovations in Economics María del Carmen Valls Martínez, José-María Montero, 2024-10-31 This book highlights the latest technological innovations in economics education Economics as a discipline not only studies the relationship between ends and scarce means which can be used alternatively but also serves as a social science that uses historical data to predict future events a task complicated by the influence of human behavior In economics a solid theoretical foundation alone is insufficient practical application requires a deep understanding of statistics With the vast amount of information available today data processing is now performed using specialized software Consequently teaching economics demands a wide range of complex skills that have significantly evolved in recent years driven by the growing interest in educational innovation among professors and scientists further accelerated by advancements in new technologies Moreover economics education is increasingly aligned with the global concern for sustainability as emphasized in the United Nations Agenda 2030 Professors are now integrating sustainability into syllabi and teaching methodologies This book covers key topics such as Technological and innovative advancements in economics education New teaching learning theories and models in economics education The impact of digital transformation on economics education The role of artificial intelligence in economics education Addressing special educational needs in economics education Evaluation of the teaching learning process in economics Assessment of student learning in economics Development of materials and tools for economics education Final projects Undergraduate and Master s in economics Authored by leading professors and researchers in the field this book presents a collection of chapters that rigorously explore teaching innovations in economics

Macro Innovation Dynamics and the Golden Age Paul J. J. Welfens, 2017-02-16 This book takes a new look at the golden age in neoclassical growth theory and explores in detail sustainability and optimum growth in China the US and Europe Innovation foreign direct investment trade and growth dynamics are key elements in modern economies including perspectives on green growth and aspects of the knowledge production function in the context of multinational companies As such the book considers the role of foreign direct investment in a modified growth model and discusses innovation in an enhanced Mundell Fleming macro model Moreover for the first time it directly links a knowledge production function to the macro production function in a broader context including real money balances in the production function It shows also with empirical relevance that FDI inward stocks relative to the GDP of host countries the number of researchers and per capita income are relevant drivers of new knowledge

and the stock of knowledge respectively This new Schumpeterian theoretical approach lends itself to important policy conclusions for both OECD members and newly industrialized countries

Olivier Blanchard, Stanley Fischer, 1989-03-21 The main purpose of Lectures on Macroeconomics is to characterize and explain fluctuations in output unemployment and movement in prices Lectures on Macroeconomics provides the first comprehensive description and evaluation of macroeconomic theory in many years While the authors perspective is broad they clearly state their assessment of what is important and what is not as they present the essence of macroeconomic theory today The main purpose of Lectures on Macroeconomics is to characterize and explain fluctuations in output unemployment and movement in prices The most important fact of modern economic history is persistent long term growth but as the book makes clear this growth is far from steady The authors analyze and explore these fluctuations Topics include consumption and investment the Overlapping Generations Model money multiple equilibria bubbles and stability the role of nominal rigidities competitive equilibrium business cycles nominal rigidities and economic fluctuations goods labor and credit markets and monetary and fiscal policy issues Each of chapters 2 through 9 discusses models appropriate to the topic Chapter 10 then draws on the previous chapters asks which models are the workhorses of macroeconomics and sets the models out in convenient form A concluding chapter analyzes the goals of economic policy monetary policy fiscal policy and dynamic inconsistency Written as a text for graduate students with some background in macroeconomics statistics and econometrics Lectures on Macroeconomics also presents topics in a self contained way that makes it a suitable reference for professional economists

Educational Innovation in Economics and Business Administration: Wim H. Gijssels, Dirk T. Tempelaar, Piet K. Keizer, Jos M. Blommaert, Eugene M. Bernard, Hans Kasper, 2013-03-09 During the last few years economics and business education have emerged as one of the largest fields of study in higher education At the same time the pressing concern for improving the quality of higher education has led to a definite need for more knowledge about effective instruction and innovation in economics and business education The book brings together many examples of reform in economics and business education Special attention is paid to the problem based learning approach which over the past ten years has developed as a very important innovation in higher education The book contains contributions from a variety of institutions on the necessity of curriculum reform the choice of instructional methods assessment and testing and management of change It is of interest for teachers in higher education educational psychologists and any person interested in educational innovation in economics and business administration

Blockchain Economics and Financial Market Innovation Umit Hacıoğlu, 2019-12-03 This book discusses various aspects of blockchains in economic systems and investment strategies in crypto markets It first addresses the topic from a conceptual and theoretical point of view and then analyzes it from an assessment and investment angle Further it examines the opportunities and limitations of the taxation of crypto currency as well as the political implications such as regulation of speculation with crypto currencies The book is intended for academicians and students in the fields of economics and finance

The Political Economy of Innovation Development Iurii Bazhal, 2017-06-27 This book finds that the R D and technological innovation of a country is not a result

but a factor of sustained economic growth Bazhal develops Schumpeter's theory to argue that genuine economic growth especially in transitioning and developing countries is only possible with innovation With a particular focus on the work of Ukrainian economists Tugan Batanobvsky and Vernadsky the text seeks to move the discipline forward and explain why innovation has become a primary factor of economic development in recent decades and why its role will become even more dominant in the future Chapters interrogate whether modern economic theory can explain how we ensure the effective functioning of the market economy The book shows that explanations of economists and politicians regarding the nature of the current economic and financial crisis and the causes of huge gaps in levels of wealth in market economies demonstrates that there are not enough satisfactory answers to this question Elgar Encyclopedia on the Economics of Knowledge and Innovation Antonelli, Cristiano, 2022-10-14 A landmark reference work in the field this Elgar Encyclopedia presents over 60 entries from scholars that have shaped the making of the economics of innovation as a distinct and specialised field of investigation within the broad range of economic disciplines This will be a critical read for economics scholars particularly those focusing on knowledge and innovation as it offers an understanding of the definitions of key terms in the field the founding tenets of the topic and the economics of knowledge and innovation in more specific contexts *Educational Innovation in Economics and Business II* Dirk T. Tempelaar, Finn Wiedersheim-Paul, Elving Gunnarsson, 2012-12-06 This volume consists of the revised versions of a selection of papers of the second EDINEB conference held in Uppsala from 17-19 August 1995 As with the first edition the conference and these proceedings are rooted in the participants' involvement with Educational Innovation in Economics and Business The thematic focus is quality audit quality assessment and quality improvement all of them collected in the theme In Search of Quality For the first EDINEB conference which took place in Maastricht December 1993 Problem Based Learning was chosen as leading theme The introduction of problem based learning in the curriculum of any faculty is to be regarded as a major innovation in the educational system In contrast the dedication to the search of quality in education resulted in a large variety of case studies and theoretical contributions on educational innovations aiming at increasing the quality of teaching and learning This contrast between the one major step and the many small steps has been the decisive factor for the editors to compose these proceedings as a kind of allegory of Robert M Pirsig's famous novel Zen and the art of Motorcycle Maintenance an Inquiry into Values ZAMM Of course on top of the very obvious reason that the conference had been saddled with a theme that is identical to the title that many critics probably those who aren't so fond of motorcycling used to rename ZAMM *The Economics of Knowledge, Innovation and Systemic Technology Policy* Francesco Crespi, Francesco Quatraro, 2015-05-15 There is wide consensus on the importance of knowledge for economic growth and local development patterns This book proposes a view of knowledge as a collective systemic and evolutionary process that enables agents and social systems to overcome the challenges of the limits to growth It brings together new conceptual and empirical contributions analysing the relationship between demand and supply factors

and the rate and direction of technological change It also examines the different elements that compose innovation systems The Economics of Knowledge Innovation and Systemic Technology Policy provides the background for the development of an integrated framework for the analysis of systemic policy instruments and their mutual interaction the socio political and economic conditions of the surrounding environment These aspects have long been neglected in innovation policy as policymakers academics and the business community have mostly emphasized the benefits of supply side strategies However a better understanding of innovation policies grafted on a complexity based approach calls for the appreciation of the mutual interactions between both supply and demand aspects and it is likely to improve the actual design of policy measures This book will help readers to understand the foundations and working of demand driven innovation policies by stressing the importance of competent and smart demand The Economics of Innovation, New Technologies and Structural Change

Cristiano Antonelli, 2014-04-08 The ongoing process of revising and rethinking the foundations of economic theory leads to great complexities and contradictions at the heart of economics Economics of innovation provides a fertile challenge to standard economics and one that can help it overcome its many criticisms This authoritative book from Cristiano Antonelli provides a systematic account of recent advances in the economics of innovation By integrating this account with the economics of technological change this exceptional book elaborates an understanding of the effects of the introduction of new technologies This excellent comprehensive account from respected expert Antonelli will be much appreciated within the innovation economics community yet it is also a book that should be read by all those with either a private or professional interest in economic theory The Two Sides of Innovation Guido Buenstorf, Uwe Cantner, Horst Hanusch, Michael

Hutter, Hans-Walter Lorenz, Fritz Rahmeyer, 2013-12-02 This volume is devoted to innovation with a special focus on its two sides namely creation and destruction and on its role in the evolution of capitalist economies The first part of the book looks at innovation and its effects on economic performance addressing issues of motives behavioral rules under uncertainty actor properties and technology characteristics The second part concentrates on potential consequences of innovative activities in particular structural change the innovation mediated effect of skill oriented policies on regional performance the destructive effects of innovation activities and the question whether novelty is always good The role of innovation in the evolution of capitalism itself is discussed in the third part
