Innovative Interventions To Reduce Dementia Caregiver Distress David W. Coon, PhD, Dolores

Gallagher-Thompson, PhD, ABPP, Larry W. Thompson, PhD, 2002-10-31 Increasing evidence has demonstrated that caregivers of dementia victims are at risk for depression and other medical problems In what ways can health care providers improve or maintain the well being of dementia caregivers This volume provides an overview of emerging themes in dementia caregiving research and presents a broad array of practical strategies for reducing caregiver distress including interventions for specific populations such as ethnic minority caregivers male caregivers and caregivers with diverse sexual orientations Innovative approaches include the value of partnering with primary care physicians to improve quality of life for both patient and caregiver and the use of technological advances to help distressed caregivers A timely cutting edge book written for clinicians of varying backgrounds who provide direct services to families of dementia victims For Further Information Please [Click Here](#)

Handbook of Behavioral and Cognitive Therapies with Older Adults Dolores Gallagher Thompson, Ann Steffen, Larry W. Thompson, 2007-10-12 It gives me great pleasure to witness continued growth in the application of cognitive and behavioral theories and therapies to more diverse populations including in this volume their application to the mental health problems of later life Evidence continues to accumulate demonstrating that these are effective in treating a broad range of elderly patient groups This is the first book to examine a number of these evidence based interventions currently in use with older adults The editors have assembled chapters developed in many of the leading clinical and clinical research programs focusing on elderly patients both in this country and in the UK Since the emphasis of this volume is primarily on clinical application each author group was asked to discuss the empirical data for the treatment strategies it is using with the specific patient group selected Typically this was followed by a detailed description of treatment procedures that were then illustrated by one or more clinical examples The book begins by examining the treatment of depressive and anxiety disorders and then moves on to more complicated and or serious disorders including schizophrenia and other psychoses suicidal behavior personality disorders bipolar disorders dementia and complicated bereavement A chapter on the problems and issues in training therapists to use evidence based interventions effectively is also included along with a chapter discussing the implications of Medicare policies and guidelines for service delivery
