Inside The Politics Of Self Determination:

Inside the Politics of Self-Determination Kathleen Gallagher Cunningham, 2014-08-25 There are currently over 100 stateless nations pressing for greater self determination around the globe The vast majority of these groups will never achieve independence Many groups will receive some accommodation over self determination many will engage in civil war over self determination and in many cases internecine violence will plague these groups This book examines the dynamic internal politics of states and self determination groups The internal structure and political dynamics of states and self determination groups significantly affect information and credibility problems faced by these actors as well as the incentives and opportunities for states to pursue partial accommodation of these groups Using new data on the internal structure of all self determination groups and their states and on all accommodation in self determination disputes this book shows that states with some but not too many internal divisions are best able to accommodate self determination groups and avoid civil war When groups are more internally divided they are both much more likely to be accommodated and to get into civil war with the state and also more likely to have fighting within the group Detailed comparison of three self determination disputes in the conflict torn region of northeast India reveals that internal divisions in states and groups affect when these groups get the accommodation they seek which groups violently rebel and whether actors target violence against their own co ethnics The argument and evidence in this book reveal the dynamic effect that internal divisions within SD groups and states have on their ability to bargain over self determination Kathleen Gallagher Cunningham demonstrates that understanding the relations between states and SD groups requires looking at the politics inside these actors The Politics of Self-determination Kristina Roepstorff, 2013 There have been an increasing number of self determination conflicts where sub state groups challenge existing state authority This book explains how self determination can be exercised beyond the decolonisation process and demonstrates that rather than a threat to international peace and stability it has strong potential as a tool for conflict prevention and resolution *The Right to Self-Determination Under International Law and Politics: the Case of the Baloch People* Hassan Hamdam, 2020-12-14 The emergence of the right to self determination phenomenon during the twentieth century changed the political map of the world with the liberation of many nations from the yoke of colonialism This book is an attempt to navigate the right of self determination through international legal norms and explore its triumph and failure since the Second World War It elaborates on the role position and the obligations of a modern state in the international law and new emerging relations of people in the world The book describes briefly the history of British rule in the Indian subcontinent and the creation of the new Muslim state of Pakistan in 1947 The book narrates the events leading to the occupation of Balochistan by Pakistan in 1948 It highlights the long struggle of the Baloch people for the right to self determination and to explain the right of the Baloch people according to the international principles and provide political and legal methods for the right to self determination **The Politics of Dialogue** Ranabir Samaddar, 2017-07-05 Offering a

detailed analysis of post colonial South Asia The Politics of Dialogue discusses the creation and impact of borders and the pervasive tension between the new nations Neither all out war nor complete peace this fragile condition makes political leaders and strategists feel claustrophobic a war produces an end result but peace allows the rulers to carry out their policies for governing along their preferred path of development The book shows how cartographic communal and political lines are not only dividing countries but that they are being replicated within countries creating new visible and invisible internal frontiers It argues that in a situation where geopolitics constrains democracy the political class becomes incapable of coping with the tension between the inside outside eg democracy appears as an internal problem and geopolitics appears as a problem related to the outside

The Theory of Self-Determination Fernando R. Tesón, 2016-04-07 When can a group legitimately form its own state Under international law some groups can but others cannot But the standard is unclear and traditional legal analysis has failed to elucidate it In The Theory of Self Determination leading scholars chart new territory in our theoretical conception of self determination Drawing from diverse scholarship in international law philosophy and political science they attempt to move beyond the prevailing nationalist conceptions of group definition At issue are such universal questions as when does a group qualify as a people Does history matter Or is it a question of ethnic status Are these matters properly solved by popular vote Anchored in modern analytical political philosophy but with implications for a wide range of scholarship this volume will prove essential for scholars and practitioners of international law global justice and international relations

Constitutional Law and Politics of Secession Antoni Abat i Ninet, 2023-07-31 This collection presents an analysis of the concept of secession and its constitutional accommodation alongside an assessment of the effects of secession in constitutional and international law The work proposes a new approach and insights into the existing literature that fill a gap from multidisciplinary and transdisciplinary perspectives The book approaches the topics of secession constitutionalism and their relationship from both theoretical and empirical perspectives including the analysis of particular secessionist examples such as Catalonia the Basque Country Tigray the Palestinian minority in Israel Bosnia and Herzegovina and the Mapuche Nation from a comparative constitutional perspective Elucidating these issues from different methodological and conceptual perspectives produces novelties in the scientific and constitutional debate The interplay between constitutions constitutional law and secession is indeed explored from philosophical socio legal but also from strict constitutional law outlooks Written by constitutional and public international law experts the book will be of interest to students academics and researchers working in the areas of constitutional law legal theory theory of the state philosophy of law and political science

The Loss of Happiness in Market Democracies Robert Edwards Lane, 2000-01-01 Despite the fact that citizens of advanced market democracies are satisfied with their material progress many are haunted by a spirit of unhappiness There is evidence of a rising tide of clinical depression in most advanced societies and in the United States studies have documented a decline in the number of people who regard themselves as happy Although our political and

economic systems are based on the utilitarian philosophy of happiness the greatest good for the greatest number they seem to have contributed to our dissatisfaction with life This book investigates why this is so Drawing on extensive research in such fields as quality of life economics politics sociology psychology and biology Robert E Lane presents a challenging thesis He shows that the main sources of well being in advanced economies are friendships and a good family life and that once one is beyond the poverty level a larger income contributes almost nothing to happiness In fact as prosperity increases there is a tragic erosion of family solidarity and community integration and individuals become more and more distrustful of each other and their political institutions Lane urges that we alter our priorities so that we increase our levels of companionship even at the risk of reducing our income

Politics in the Vernacular Will Kymlicka, 2001-01-19 This volume brings together eighteen of Will Kymlicka's recent essays on nationalism multiculturalism and citizenship These essays expand on the well known theory of minority rights first developed in his *Multicultural Citizenship* In these new essays Kymlicka applies his theory to several pressing controversies regarding ethnic relations today responds to some of his critics and situates the debate over minority rights within the larger context of issues of nationalism democratic citizenship and globalization The essays are divided into four sections The first section summarizes the state of the debate over minority rights and explains how the debate has evolved over the past 15 years The second section explores the requirements of ethnocultural justice in a liberal democracy Kymlicka argues that the protection of individual human rights is insufficient to ensure justice between ethnocultural groups and that minority rights must supplement human rights In particular Kymlicka explores why some form of power sharing such as federalism is often required to ensure justice for national minorities why indigenous peoples have distinctive rights relating to economic development and environmental protection and why we need to define fairer terms of integration for immigrants The third section focuses on nationalism Kymlicka discusses some of the familiar misinterpretations and preconceptions which liberals have about nationalism and defends the need to recognize that there are genuinely liberal forms of nationalism He discusses the familiar but misleading contrast between cosmopolitanism and nationalism and discusses why liberals have gradually moved towards a position that combines elements of both The final section explores how these increasing demands by ethnic and national groups for minority rights affect the practice of democratic citizenship Kymlicka surveys recent theories of citizenship and raises questions about how they are challenged by ethnocultural diversity He emphasizes the importance of education as a site of conflict between demands for accommodating ethnocultural diversity and demands for promoting the common virtues and loyalties required by democratic citizenship And finally he explores the extent to which globalization requires us to think about citizenship in more global terms or whether citizenship will remain tied to national institutions and political processes Taken together these essays make a major contribution to enriching our understanding of the theory and practice of ethnocultural relations in Western democracies

Essential Readings in Canadian Constitutional Politics Peter H. Russell, Christian Leuprecht, 2011-01-01 Essential

Readings in Canadian Constitutional Politics introduces students scholars and practitioners to classic authors and writings on the principles of the Canadian Constitution as well as to select contemporary material To complement rather than duplicate the state of the field it deals with the Canadian Charter of Rights and Freedoms and with Canadian mega constitutional politics in passing only focusing instead on institutions federalism intergovernmental relations bilingualism and binationalism the judiciary minority rights and constitutional renewal Many of the selections reverberate well beyond Canada s borders making this volume an unrivalled resource for anyone interested in constitutional governance and democratic politics in diverse societies

Recognition Politics in Settler Colonial States Emile Badarin,2025-06-26 Using Palestine as a case study Recognition Politics in Settler Colonial States shows how recognition politics operate to legitimize long standing colonial power structures In existing scholarship recognition has been seen as an asset coveted by indigenous communities This book forwards a new theoretically ground breaking perspective Emile Badarin shows that in colonial contexts settlers use recognition to legitimize and normalize the dispossession and elimination of Indigenous people More than this settler colonial states themselves actively pursue recognition employing it as a means to further the elimination of the indigenous societies they seek to replace In making the case the book critically examines the Euromodern categories of race racism and racial hierarchies and draws new conclusions about the interplay between colonialism racism and Zionism Central to this analysis is how anti Zionism has been strategically equated with anti Semitism and effectively used as a tool for the advancement of both settler colonialism in Palestine and Israel s recognition on the international stage The book delves into indigenous normative resistance against colonial recognition politics through the lens of the Palestinian practice of umud steadfastness extracting its philosophy of liberation as a pathway towards a decolonial future for all in Palestine and beyond

Territorial Politics and Secession Martin Belov,2021-03-29 This book offers a broad perspective of revolutionary territorial politics by putting secession in the context of other forms of revolutionary territorial politics This allows for a more complex and profound account of secession and offers the reader a conceptual approach to politics of revolutionary discontent with territorial status quo Second the book provides a multidiscursive approach which combines the efforts of constitutional and comparative constitutional law scholars with international lawyers EU lawyers and specialists in international relations This allows for multifaceted and in that regard more adequate balanced and rich analysis of secession and the other forms of revolutionary territorial politics
