ARMING OPERATION

To arm the system press transmitter button 1:

- The siren will chirp once.
- The parking lights will flash once.*
- The doors will lock.*
- The LED will turn solid for 10 seconds then start flashing slowly. After 10 seconds the system is armed.

After Arming, if the system detects a bad sensor or an open zone, the siren will chirp and the parking lights will flash 4 times to indicate a zone is open. The system will ignore that input, but keep all other areas protected.

While Armed, the system will trigger if:

- The doors are opened.
- The shock sensor detects an impact to the vehicle.
- The hood or trunk is opened.

When triggered, the siren will sound, the horn will honk*, and the parking lights will flash* for 30 seconds.

If the same input triggers the system 3 times during a single arming cycle, the system will bypass that input, keeping the other zones protected, until the next time the system is armed.

If the shock sensor detects a light impact to the vehicle, the siren will chirp and the parking lights will flash 5 times to warn away the potential intruder.
