Webster,2020-07-09 This book explores how best practice for acute stroke care was developed translated and taken up in medical practice across various sites in the province of Ontario using institutional ethnographic research Institutional ethnography an approach developed by Dorothy E Smith builds on Smith s understanding of the social organization of knowledge allowing for an examination of the complex social relations organizing people s experiences of their everyday working lives This work thereby makes visible some of the assumptions and hidden priorities underlying the emphasis given to translating scientific knowledge into medical practice In this study the discourses of both evidence based medicine and knowledge translation purportedly designed to improve patient care come into view as managerial tools that directed healthcare resources toward academic hospitals rather than community sites where the majority of patients receive care These models institutionalize inequities in access to care while claiming to resolve them     **The Palgrave Handbook of Institutional Ethnography** Paul C. How do emerging states obtain international recognition and secure membership of international organisations in contemporary world politics? This book provides the first in-depth study of Kosovo's diplomatic approach to becoming a sovereign state by obtaining international recognition and securing membership of international organisations. Analysing the everyday diplomatic discourses, performances and entanglements, this book contends that state becoming is not wholly determined by systemic factors, normative institutions or the preferences of great powers. The diplomatic agency of the fledgling state plays a far more important role than is generally acknowledged. Drawing on institutional ethnographic research and first-hand observations, this book argues that Kosovo's diplomatic success in consolidating its sovereign statehood has been the situational assemblage of multiple discourses practiced through a broad variety of performative actions and shaped by a complex entanglement with global assemblages of norms, actors, relations and events. Accordingly, this book contributes to expanding our understanding of the everyday diplomatic agency of emerging states and the changing norms, politics and practices regarding the diplomatic recognition of states and their admission to international society.
