critique is the idea that the moral norms that markets and states tend to reproduce or reinforce are an obstacle to the development of practical judgement The book outlines MacIntyre s theory of practical reason and discusses some of the institutional arrangements that can be derived from it It also explores the growing body of literature which has started to examine the extent to which alternative forms of social organisation might be more compatible with MacIntyre s account of the virtues This literature includes various proposals for alternative political and economic arrangements ranging from certain forms of market socialism to the promotion of different forms of mutual and cooperative enterprises Finally the book offers an account of the type of institutional analysis required for the advancement of the revolutionary Aristotelianism project This is achieved by showing how some key features of the Bloomington School of political economy are not only compatible with MacIntyre s political philosophy but also that a synthesis between neo Aristotelian moral philosophy and the work of the Bloomington School offers a robust alternative for revolutionary Aristotelians Thus the book defends the idea that MacIntyre s account of human flourishing is more likely to be realised although imperfectly in a polycentric social order This book will be of interest to social scientists working in questions of political economy as well as political and moral philosophers
