Institutionalizing Northeast Asia Regional Steps Towards Global Governance:

Institutionalizing Northeast Asia Martina Timmermann, Jitsuo Tsuchiyama, 2008 Globalization and China's growing economy have caused different economic growth rates resulting in constant fluctuations in the balance of power among the nations of Northeast Asia. This publication explores regional institutionalism as a counterweight to the principle of sovereignty. It argues that cooperation through regional institution building is the best way to deal with the growing intertwinement of global issues and developments and the needs and interests at the regional and national levels. A unified region could also answer the demand for supra-territorial policy responses to such issues as trade, finance, the environment, human rights and human security. Publisher's description: *The Making of Northeast Asia* Kent Calder, Min Ye, 2010-08-16. This book offers a detailed analysis of the domestic politics of regionalism in the three major nations of Northeast Asia: China, Japan and Korea, as well as in the most important external actor, the United States. [Handbook of Governance and Security](#) James Sperling, 2014-08-29. The Handbook is divided into four sections which examine in turn the emergence, evolution and forms of security governance, as well as the theoretical orientations that have so far dominated the literature: networks, multilateralism, regimes and systems. **Asian Leadership in Policy and Governance** Evan Berman, M. Shamsul Haque, 2015-09-03. Asian Leadership in Policy and Governance examines contemporary challenges facing public leaders in Asia, providing insight into leadership processes and contexts, past practices affecting effective governance and policy leadership. *Global Governance Legitimacy & Legimations* Brynn Vaughan, 2018-12-20. **China-Japan-South Korea Trilateral Cooperation** Muhui Zhang, 2025-01-01. This open access book aims to review the history, achievements and challenges of trilateral cooperation among China, Japan and South Korea in a systematic way. It offers numerous perspectives to explain the emergence of trilateral institution building processes and the fluctuations of trilateral cooperation and underscores three countries' respective policy stances towards the building of the triangle. The evolution of political and economic ties among China, Japan and South Korea has vital importance to the peace and prosperity of East Asia. Recent years have witnessed the ups and downs of the trilateral cooperation among the three countries. The development of trilateral institution building emerged as a joint gesture in response to the Asian Financial Crisis in the late 1990s. The three countries jointly established multilayered cooperative mechanisms in a wide range of fields. Nonetheless, trilateral cooperation among the three major powers has been proceeding in hardship in the shadow of longstanding geopolitical complexity and the deepening Sino-US confrontations. This book argues that despite growing economic and social linkages, political animosities have constantly impeded the trilateral cooperation. Relevant to scholars and advanced students in international relations and political economy, this is a vital read in East Asian studies. *China's Rise and Regional Integration in East Asia* Yong Wook Lee, Key-young Son, 2014-03-05. With featuring far-reaching diversities and disparities among the regional states in their political, economic and social systems and cultural and religious orientations, East Asia is a microcosm of international society.

at large Nevertheless there are unique dynamics unfolding in East Asia at the turn of the twenty first century namely the rise of China as a contender for regional and global hegemony and a set of collective initiatives to integrate the region into a harmonious community This book provides new arguments on China s rise and the transformation of East Asia and analyzes the foreign policy behavior of the regional states and relations among them In doing so the contributors show why and how China is rising and how China s rise shapes the emerging regional structures and institutions in East Asia Furthermore given the East Asian context where the world s second and third largest economies coexist with much smaller states and with China s ascendancy likely to continue this book challenges the pervasive dichotomy of hegemony and community This allows for a fuller and more nuanced account of China s role and the shifting regional policies in East Asia in which hegemonic cooperation does not necessarily lead to a hegemonic form of regional order Presenting strategic political economic and historical perspectives on China s changing role in the region and the development of regionalism China s Rise and Regional Integration in East Asia will be of great interest to students and scholars of Chinese politics Asian politics international relations and regionalism

Sino-Japanese Relations Niklas Swanström, 2013 Sino Japanese relations have been on the mend since Shinzo Abe assumed the Japanese Prime Minister s office in September 2006 His visit to China in October 2006 and the reciprocal visits of Chinese Prime Minister Wen Jiabao in April 2007 and President Hu Jintao in May 2008 facilitated the further thawing of bilateral relations under the framework of OC mutually beneficial relationship based on common strategic relationship OCO A substantial number of additional events have indicated the continuation of the positive trend in the strengthening of the bilateral relations However several issues continue to obstruct the building of long term confidence between the two Asian giants Despite the overall improved relations there is very little structural thinking about how to move the Sino Japanese relations to the next level and how to institutionalize security dialogues at the regional and international level This book provides an overview of the current situation and also gives suggestions on what is needed to move beyond the haphazard level of cooperation in Northeast Asia especially as the six party talks seem to have broken down It focuses on Chinese and Japanese perceptions of the bilateral situation and the potential of and need for multilateral structures in managing the future

The Economy-security Nexus in Northeast Asia T. J. Pempel, 2013 The dynamics of Northeast Asia have traditionally been considered primarily in military and hard security terms or alternatively along their economic dimensions This book argues that relations among the states of Northeast Asia are far more comprehensible when the mutually shaping interactions between economics and security are considered simultaneously It examines these interactions and some of the key empirical questions they pose the answers to which have important lessons for international relations beyond Northeast Asia Contributors to this volume analyze how the states of the region define their security and how bilateral relations in hard security issues and economic linkages play out among Japan China and the two Koreas Further the chapters interrogate how different patterns of techno nationalist development affect regional security ties and the extent to which closer economic connections enhance or detract from a nation s self perceived security The book concludes by discussing scenarios for the future and the conditions that will shape relations between economics and security in the region This book will be welcomed by students and scholars of Asian politics Asian economics security studies and political economy

Security Cooperation in Northeast Asia T.J. Pempel, Chung-Min Lee, 2012-06-14 Defining and conceptualizing Northeast Asia s security complex poses unique quandaries The security architecture in Northeast Asia to date has been predominately U S dominated bilateral alliances weak institutional structures and the current Six Party Talks dealing with the North Korean nuclear issue There has been a distinct lack of desire among regional countries as well as the U S to follow in the footsteps of Europe with its robust set of multilateral institutions However since the late 1990s there has been burgeoning interest among regional states towards forming new multilateral institutions as well as reforming and revitalizing existing mechanisms Much of this effort has been in the economic and political arenas with the creation of bodies such as the East Asian Summit but there have also been important initiatives in the security sphere This book offers detailed examinations about how this potentially tense region of the world is redefining certain longstanding national interests and shows how this shift is the result of changing power relations the desire to protect hard won economic gains as well as growing trust in new processes designed to foster regional cooperation over regional conflict Presenting new and timely research on topics that are vital to the security future of one of the world s most important geographical regions this book will be of great value to students and scholars of Asian politics regionalism international politics and security studies
