Anti/Idealism Juliana Albuquerque, Gert Hofmann, 2019-10-08 The late 18th century is characterized by two crucial events the rise of Goethe as a dominating literary figure and the emergence of Kant's critical philosophy and its productive reception not only in the philosophical but also literary discourse of the time While the Tübingen School creatively adopted Kant's philosophy as a system of ideas they also critically responded to its intellectualising impulse by positing the equiprimordiality of world and Self of art and reason Adhering to the self critical impulse of Kant's philosophy by positing the equiprimordiality of both the empirical world and the intelligible subject and trying to overcome the chiasm between them through the classicist model of aesthetic Bildung they argued for the co-extensiveness of the reality of both philosophy and literature The authors investigate how the latent antagonism between these divergent traditions of the so called Goethezeit creates the thrust behind the intellectual firework of divergent literary and philosophical discourses from around 1800 throughout the 19th and into the 20th century

The Autobiography Effect Dennis Schep,2019-07-24 Since the advent of post structuralism various authors have problematized the modern conception of autobiography by questioning the status of authorship and interrogating the relation between language and reality Yet even after making autobiography into a theoretical problem many of these authors ended up writing about themselves This paradox stands at the center of this wide ranging study of the form and function of autobiography in the work of authors who have distanced themselves from its modern instantiation Discussing Roland Barthes Jacques Derrida H l ne Cixous and others this book grapples with the question of what it means to write the self when the self is understood as an effect of writing Combining close reading intellectual history and literary theory The Autobiography Effect traces how precisely its theoretically problematic nature made autobiography into a central scene for the negotiation of philosophical positions and anxieties after structuralism
