Summary of Christine Gross-Loh's The Diaper-Free Baby

Everest Media,2022-05-25T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The idea that babies are born with the instinct not to soil themselves may seem preposterous to some but it is true By putting your children in diapers and changing them only after they have gone you condition them to use the diaper itself as a toilet 2 Some parents are faced with double work when training their child to go to the bathroom in a diaper and then train them to stop doing that and use a toilet instead This means twice as much work for parents and twice as much adjustment for the child 3 EC is a lost art in our society It is still practiced throughout the world mostly in countries where disposable diapers are a luxury In America some version of early potty training was practiced up until disposable diaper use became more widespread in the 1960s and 70s 4 EC can be accomplished If EC is something you d like to try you will hear from many parents just like you who have done it with great success You ll learn how to practice EC in the way that is best for your family situation and preferences

POTTYTUNITY® Winnie Benson, 2019-07-20. Most people believe that Baby Led Potty Training (BLPT) can be done only if you are a full-time parent, have a home with no carpets, or possibly if you have a smart baby. Let me tell you that is not the case; never will be, and never has been. This book will assist in teaching you how to be more instinctual and connected with your child's Elimination Communication needs, understanding their signalling and cues whilst creating a stronger bond between parent and child. Whether you have a deaf-blind autistic disabled or a healthy child, all babies should and can be given their potty opportunities to eliminate, as it is a natural process which nature intended us all to do. Parents who use this method of toilet training their children contribute not only in enhancing their child's independence but their developmental needs also. This in turn creates a more well-rounded, wholesome child. POTTYTUNITY is aimed at parents in developed communities who are seeking a more natural outlook to explore, permitting their child to become less diaper-reliant. The methods within this book can be used for both babies and toddlers to help reduce the billions of non-biodegradable disposable diaper waste in landfills worldwide, which by the way, do not decompose for 500 years, affecting the world in which we all call home. Let us all do our part in maintaining a safer, more liveable environment for the children of tomorrow. One at a time, one bum, bum at a time. www.PottyTunity.com
