This simplifies camera operation when leaving the camera to friends or when you know you only want to shoot in one mode.

The shutter button is disabled in "One Button Mode" and will not start or stop the recording while the camera is on. "One Button Mode" is convenient when you only want to shoot one type of video or photos and prefer to simplify operation to be either "on and recording" or "off with only the power button being used to operate the camera. 	Spot meter is primarily for shooting from inside a car or other dark space looking out into a brighter outside setting. Spot meter adjusts the exposure for the absolute center of the scene, for example the road ahead instead of the interior of the car. Video Live Feed is not available if the USB port is not available. When Video Live Feed is set to OFF (LFF) the camera will switch into video / photo playback mode when one of the included TV cables are plugged into the camera. Video Live Feed is set to ON (LFFd) the camera will switch into recording mode when plugged into a TV and will send a live video signal to the TV. Plugging in the component cable will send an HD video signal out from the camera, and plugging in the composite cable will send a standard definition signal out from the camera. Video Live Feed On allows for plugging the camera into wireless transmitters and TVs for live viewing from the camera. NOTE: If the component cable is used to send live HD video out from the camera, and you begin simultaneously recording HD video to the SD card, the live video feed will be reduced to standard definition as the camera cannot record and transmit HD video at the same time. If you wish to have an HD live video feed from the camera you cannot begin recording HD video to the SD card.
