The Contributions of Specialized Institutes and Non-Governmental Organizations to the United Nations Criminal Justice Program M. Cherif Bassiouni, 2023-08-28 The increase of crime at the national transnational and international levels has heightened concern in the international community and generated greater interest in international criminal justice policy Since the 1950s the United Nations has been developing the Crime Prevention and Criminal Justice Programme which was designed to respond to these concerns But United Nations resources and support for the programme have been limited notwithstanding the services and contributions of the Crime Prevention and Criminal Justice Branch As the United Nations celebrates its Fiftieth Anniversary it is fitting to have a book that describes the United Nations Crime Prevention and Criminal Justice Programme The information it contains highlights the significant contributions of a number of organizations whose work may not be sufficiently known outside the circles of scholars experts and professionals in the field of international criminal justice The book is thus also a deserving tribute to these organizations giving greater publicity to what they have contributed over the years with scant United Nations recognition Without these organizations and the active NGOs the United Nations would hardly have leave to claim part of what is now an important though still insufficient contribution to international criminal justice International and Transnational Crime and Justice Mangai Natarajan, 2019-06-13 Provides a

White-Collar and Corporate Crimes Nicholas Lord, Michael Levi, 2025-03-04 This book explores how we can re constitute our approach to analysing and empirically investigating the organisation of white collar and corporate crimes with a view to building fuller theoretical and empirical accounts The work demonstrates how knowledge can be produced and systematised within a conceptual and analytical framework concerned with understanding how such crimes are organised why they are organised as they are who gets involved in them as primary offenders and as facilitators and the real factors that shape these organisational dynamics over time in particular contexts and under varying conditions In doing so the book examines the distal far off and proximal close social arrangements and relations that create and shape emergent white collar crime opportunities and their structures It also investigates the mechanisms relationships processes and conditions that are necessary for the commission or the unfolding of white collar crimes or for their non commission How these are contingently connected to particular contexts is explored The work also considers the people who collaborate connect and otherwise associate whether ephemerally or for longer periods in the pursuit of criminal goals and the actual or potential skills expertise and abilities of these people to accomplish or resist particular behaviours that are required of them Finally the book assesses the human social cultural and material antecedents that enable white collar crimes to flourish or fade The work will be of particular interest to scholars theorising about and empirically investigating white collar and corporate crimes or seeking to understand empirical approaches to analysing such behaviours and other types of crime It is primarily aimed at critical social scientists including criminologists and sociologists as well as socio legal business economics and political studies scholars The work will also be of interest to practitioners and policymakers keen to learn more about how and why these crimes are organised as they are *Organized Crime in the U.S.* Wesley B. the United States not only from within the borders but beyond Threats come from a variety of criminal organisations including Russian Asian Italian Balkan Middle Eastern and African syndicates Policymakers may question whether the tools they have provided the federal government to combat organised crime are still effective for countering today s evolving risks In the wake of the economic downturn organised crime could further weaken the economy with illegal activities such as cigarette trafficking and tax evasion scams that result in a loss of tax revenue for state and federal governments On the national security front experts and policymakers have expressed concern over a possible nexus between organised crime and terrorism Despite the difference in motivation for organised crime profit and terrorism ideology the linking element of the two is money This book consists of public documents which have been located gathered combined reformatted and enhanced with a subject index selectively edited and bound to provide easy access
