Objectives of safety, quality, and economy are given priority in these guidelines for formwork. A section on contract documents explains the kind and amount of specification guidance the engineer/architect should provide for the contractor. The remainder of the report advises the formwork engineer/contractor on the best ways to meet the specification requirements safely and economically. Separate chapters deal with design, construction, and materials for formwork. Considerations peculiar to architectural concrete are also outlined in a separate chapter. Other sections are devoted to formwork for bridges, shells, mass concrete, and underground work. The concluding chapter on formwork for special methods of construction includes slipforming, preplaced-aggregate concrete, tremie concrete, precast, and prestressed concrete.

Keywords: anchors; architectural concrete; coatings; concrete; construction; falsework; form ties; forms; formwork; foundations; quality control; shoring; shoring; slipform construction; specifications; tolerances.

Salmon, Gustavo J. Parra-Montesinos, 2021-12-07 The ninth edition of this book will be updated to incorporate the changes in the design provisions of the 2019 American Concrete Institute ACI Building Code and Commentary ACI 318 19 As in previous editions considerable emphasis is placed on presenting to the student as well as the practicing engineer the basic principles of analysis and design of reinforced concrete structures Each

chapter is organized such that the principles of mechanics are presented first to provide a detailed understanding of the theory and observed behavior of reinforced concrete members This material is then used to describe and to provide the rationale for the design provisions of the ACI Building Code Numerous examples are presented in each chapter to illustrate the concepts as well as the general approach to design and analysis The reader may either study in detail the concepts in logical sequence or merely accept a qualitative explanation and proceed directly to the design process All example problems will be revised and as appropriate new examples will be developed to illustrate the use of available software and design tools currently used in practice
