The Case of Tourism Enterprises** Dawid

Szutowski, 2017-03-18 In contemporary economics only one thing is constant constant change Gunday et al 2011 The notion of change relates directly to innovation The very nature of innovation constitutes combining existing factors in a new changed way Since the early stage of the scientific investigation of innovation research has focused mainly on the solutions actually implemented Schumpeter 1939 Yet it is only through implementation that the benefits of innovation may materialise The task is not simple The process of obtaining the gains is complex as innovation may pass through different stages Thus for almost half century the scientific community has considered innovation to be a complex process and not just a simple occurrence Myers and Marquis 1969 Innovation pushes progress forward Thus previous scientific investigation limited the concept of innovation to implementations which generate positive effects Nelson and Winter 1982 The above scientific considerations still hold today Moss Kanter 2006 Innovation is of crucial importance for tourism companies which cover accommodation for visitors food and beverage serving activities passenger transportation travel agencies and other reservation activities cultural activities sports and recreational activities and retail trade of country specific tourism characteristic goods UNWTO 2010 It provides them with competitive advantage and hence the firms with market power gain more from innovation Tirole 1995 A firm's innovation interacts with the environment It delivers diverse benefits to the consumers in the form of new products and lower prices which in turn impact positively on the company Shiller 2006 In the context of tourism the ongoing scientific discussion on innovation seems not to have achieved any definite conclusions yet The implementation of innovation in tourism enterprises leads to the achievement of diverse ends From this point of view the measurement of the effects of innovation is of vital importance There are a number of financial measures covering substantially different fields The most comprehensive amongst them is a company's value It covers all the aspects of a company's activity Bodie and Merton 2000 However due to its importance and complexity numerous approaches to company value were created The basic distinction covers book and market value based approaches The proponents of book value assume that the balance sheet yields a reliable estimate of the value of assets and equities However numerous shortcomings emerge the static character dealing with historical figures failing to include intangibles and treating all classes of accounts as having equal importance Nunes 2003 The market value based approach stands for the price that assets would fetch in the

marketplace Fabrozi and Drake 2009 The main objective of the research is to measure the short and long term impact of innovation announcements on the market value of equity of tourism enterprises Industrial Dynamics, Innovation Policy, and Economic Growth through Technological Advancements Yetkiner, I. Hakan, Pamukcu, M. Teoman, Erdil, Erkan, 2012-08-31 This book examines the nature of the process of technological change in different sectors of various countries analyzing the impact of innovation as well as research and development activities on different outcomes in different fields and assessing the design and impact of policies aimed at enhancing innovation in organizations Provided by publisher

Convergence Adiwan Fahlan Aritenang, 2017-03-09 The creation of the ASEAN Free Trade Area AFTA in 1992 and decentralization in 1999 mark the state restructuring in Indonesia This book analyses the impact of state restructuring on regional economic development in Indonesia between 1993 and 2010 Regional economic analysis shows persistent and severe regional disparities throughout the period Particularly econometrics study found that decentralization has accelerated regional disparities whilst the AFTA effect is insignificant on regional economic growth Furthermore historical institutionalism analysis on two cities the manufacturing industry in Batam and the creative economy in Bandung shows that past and embedded local institutions provide the capacity to adapt and create new development paths The book suggests the importance of local specific policies that embrace local knowledge and institutions to develop regional specialization and

competitive advantage This book fills the gap in Indonesian literature that lacks studies on the integrated impact of decentralization and trade liberalization both economically and politically
