## **Guide To Technologies For Online Learning:**

*Learning with Online and Mobile Technologies* Dr Janet MacDonald, Ms Linda Creanor, 2012-10-01 Technology has become a necessary and everyday part of studying. This book starts with effective practice in learning and shows how technology can support that good practice. The authors show you the many ways in which online and mobile technologies can be used for study and give you guidance on how best to use them for learning in higher education whether that is at college or university or within your workplace. This wide ranging survival guide combines advice on effective learning with practical tips on using technology successfully to give you a smart approach to accessing, recording, sharing and revising information and knowledge. An efficient learning strategy with technologies will help you develop independence and self-direction so that when faced with a bewildering choice of web-based resources you are confident about how much to read and when to stop. The approaches, skills and techniques discussed in this book will be of value to you not only in your formal course of study but also in any other learning you might wish to undertake in the future. In an increasingly competitive job market this will also be attractive to prospective employers.

*A Teacher's Guide to Online Learning* Lindy Hockenbary, 2021-06 Are you a K-12 educator who is teaching students over the internet with no face-to-face interaction? Online learning presents new challenges. Author Lindy Hockenbary does not sugarcoat the fact that online learning is different than face-to-face learning. She tackles the most common questions of new online instructors including: How do you engage learners in a virtual environment? How do you develop relationships with students whom you never see in person? What does classroom management even look like in an online class? How do you assess students when there is no way to know if they are looking up all the answers? How do you ensure clear communication since you cannot stand over a learner's shoulder and ensure a task is accomplished? How do you communicate with and support the families of online learners? How do you ensure equity when students are never in the same physical space? This book addresses each of these questions head-on by presenting key takeaways to guide online learning design. Lindy brings her experience as a classroom teacher and instructional technologist to create a clear picture of online learning strategies. Other classroom teachers, school leaders and instructional technologists have contributed to the book to provide a well-rounded perspective on the topic of online learning. This book was designed with K-12 teachers in mind but the majority of information can be applied to higher education, postsecondary learning environments as well.

**The Ultimate Guide to Excellent Teaching and Training** Dr. Jeffrey C. Fox, 2015-07-07 This book is for anyone interested or involved in teaching, training or instructing whether you are just getting into the field or thinking about it or you have been teaching for decades. It is for those who administer teaching, training or instructing. The book was written for academics and those who teach in academies and other professional adult learning environments. The book's contents are applicable to all types of colleges be they community colleges, four-year colleges or universities both private and public for-profit or nonprofit. Most professional practitioner type instructors go through some sort of instructor school. Teachers earn degrees in teaching but

many who teach or instruct are never trained or taught how to teach or train Few professors are taught how to teach They have been taught so this is where they often draw their own teaching styles Regardless of where you teach train or instruct this book and its contents are for you The book goes into great detail regarding face to face classes as well as online and other delivery methods The lessons found in this book can be applied to new students undergraduate or graduate students The lessons apply equally to basic in service and specialized training My hope is that no matter how great of an instructor you are you will find many new nuggets of information that will add to your teaching toolbox One of my goals in life is to leave a positive lasting impact I want to help students and other instructors recognize and reach their full potential I want you to be the best instructor you can be I strongly believe we impact people all the time whether we know it or not You can and will make a big difference in your students lives
