The Service-Dominant Logic of Marketing Robert F. Lusch,Stephen L. Vargo,2014-12-18 Expanding on the editors award winning article Evolving to a New Dominant Logic for Marketing this book presents a challenging new paradigm for the marketing discipline This new paradigm is service oriented customer oriented relationship focused and knowledge based and places marketing once viewed as a support function central to overall business strategy Service dominant logic defines service as the application of competencies for the benefit of another entity and sees mutual service provision rather than the exchange of goods as the proper subject of marketing It moves the orientation of marketing from a market to philosophy where customers are promoted to targeted and captured to a market with philosophy where the customer and supply chain partners are collaborators in the entire marketing process The editors elaborate on this model through an historical analysis clarification and extension of service dominant logic and distinguished marketing thinkers then provide further insight and commentary The result is a more comprehensive and inclusive marketing theory that will challenge both current thinking and marketing practice

PLATE: Product Lifetimes And The Environment Conny A. Bakker, 2017-11-15. Product lifetimes are critical for the circular economy: resource efficiency, waste reduction and low carbon strategies for sustainability and are therefore of interest to academics from many different disciplines as well as original equipment manufacturers (OEMs) and other stakeholders. The challenges related to product lifetimes must be tackled from multiple perspectives making the sharing of knowledge and expertise from different disciplines particularly important. This book presents papers from the second Product Lifetime and the Environment PLATE conference held in Delft, the Netherlands, in November 2017. The conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other's knowledge and further advance the field. The book includes the 88 full papers delivered at the conference grouped according to the following 7 conference themes: design for product longevity; product lifetime optimization; cultural perspectives on the throwaway society; circular economy and product lifetimes; business opportunities; economic implications and marketing strategies; consumer influences on product lifetimes and policy regulation and legislation. The book will be of interest to all those concerned with sustainable consumption, circular economy and resource efficiency.
