The Harveian Oration on Medicine in the Century Before Harvey (Classic Reprint) Arnold Chaplin, 2015-07-12

Excerpt from The Harveian Oration on Medicine in the Century Before Harvey For this reason I am constrained to call attention to the commands contained in Harvey's bequest for they form the essence of the creed of all honourable physicians whether ancient or modern These commands of Harvey may be considered for a moment with reference to the manner in which they have been modified to meet the needs of modern times The founder ordained that this oration should be delivered in Latin but that tongue has not been heard on this occasion since 1864 The Latin language has ceased to be the usual method of communication between the learned and by common consent that injunction has been allowed to fall into abeyance The second injunction imposes upon the orator the duty of mentioning by name all the benefactors of the College of recounting the work they have accomplished and of exhorting others to emulate them But here again the lapse of years has swelled the roll of those who have benefited the College to such an extent that the time at the disposal of the orator would hardly permit him to comply with the command A judicious selection of names therefore is all that the orator can attempt in obedience to this act of piety demanded by the founder The two remaining injunctions requiring us to search and study out the secrets of Nature by experiment and also for the honour of the profession to continue in mutual love and affection present no difficulty to the orator of the twentieth century for they comprise the whole duty of the physician in every age in which his life is passed But when Harvey in 1656 attached to his bequest these two fundamental commands the peculiar condition of political and scientific thought rendered them specially imperative The experimental method in science was then in its infancy and many physicians still clung obstinately to the teaching sanctioned through centuries by authority itself based on insecure foundations About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Harveian Oration on Medicine in the Century Before Harvey Arnold Chaplin (M.D.), 1923

The Oxford Handbook of the History of Medicine Mark Jackson, 2011-08-25 The Oxford Handbook of the History of Medicine celebrates the richness and variety of medical history around the world In recent decades the history of medicine has emerged as a rich and mature sub discipline within history but the strength of the field has not precluded vigorous debates about methods themes and sources Bringing together over thirty international scholars this handbook provides a constructive overview of the current state of these debates and offers new directions for future scholarship There are three sections the first explores the methodological challenges and

historiographical debates generated by working in particular historical ages the second explores the history of medicine in specific regions of the world and their medical traditions and includes discussion of the global history of medicine the final section analyses from broad chronological and geographical perspectives both established and emerging historical themes and methodological debates in the history of medicine
