We Have the Technology Kara Platoni, 2015-12-08 An award winning journalist investigates how scientists and citizens around the world are retooling our senses and what their discoveries are teaching us about the nature and future of human perception How do we know what's real That's not a trick question sensory science is increasingly finding that we don't perceive reality we create it through perception In We Have the Technology science writer Kara Platoni guides us through the latest developments in the science of sensory perception We Have the Technology introduces us to researchers who are changing the way we experience the world whether creating scents that stimulate the memories of Alzheimer's patients constructing virtual limbs that approximate a sense of touch or building augmented reality labs that prepare soldiers for the battlefield These diverse investigations not only explain previously elusive aspects of human experience but offer tantalizing glimpses into a future when we can expand control and enhance our senses as never before A fascinating tour of human capability and scientific ingenuity We Have the Technology offers essential insights into the nature and possibilities of human experience

Transhumanism and the Image of God Jacob Shatzer, 2019-04-09 Examining the transhumanist movement biblical ethicist Jacob Shatzer grapples with the potential for technology to transform the way we think about what it means to be human Exploring the doctrine of incarnation and topics such as artificial intelligence robotics medical technology and communications tools he guides us into careful consideration of the future of Christian discipleship in a disruptive technological environment

An Anthropology of Futures and Technologies Débora Lanzani, Karen Waltorp, Sarah Pink, Rachel C. Smith, 2022-12-30 This book examines emerging automated technologies and systems and the increasingly prominent roles that each plays in our lives and our imagined futures It asks how technological futures are being constituted and the roles anthropologists can play in their making how anthropologists engage with emerging technologies within their fieldwork contexts in research which seeks to influence future design how to create critical and interventional approaches to technology design and innovation and how a critical anthropology of the way that emerging technologies are experienced in everyday life circumstances offers new insights for future making practices In pursuing these questions this book responds to a call for new anthropologies that respond to the current and emerging technological environments in which we live environments for which thinking critically about the possible plausible and impossible futures are no longer sufficient Taking the next step this book asserts that anthropology must now propose alternative ways rooted in ethnography to approach and engage with what is coming and to contest dominant narratives of industry policy and government and to respond to our contemporary context through a public vocal and interventional approach

Postfoundational Approaches to Qualitative Inquiry Lisa A. Mazzei,Alecia Y. Jackson,2023-09-29 Postfoundational Approaches to Qualitative Inquiry is an edited collection that aims to move beyond a critique and deconstruction of method in order to present an engagement with various postfoundational frameworks and approaches that produce new concepts and enactments What makes this book innovative is the singular focus on postfoundational paradigms borrowed from the humanities and sciences that are enveloped in what is referred to as the ontological turn the new empiricisms and the new materialisms Postfoundational inquiry is conceived by the editors as emergent relational responsive involuntary and inventive While the editors name the facets of these contingent approaches and explain how they work they do so not in order to fix a new method but to spur new connectives In this collection authors take up a range of postfoundational theories such as poststructuralism posthumanism postcolonialism feminist new materialism speculative new empiricism agential realism immanent ontologies and affect theory Provoked by a series of reorienting questions chapters in the book offer enactments as a way of unfurling what is unthought not yet and becoming The chapters are organized according to four Openings Atmospheres Affects and Hauntings Archives Worldings and Sketchings Escaping Tradition Beginning Elsewhere and the Politics of Doing Otherwise Pre personal Agencies and Thought Taking Flight This book can be used as a standalone text in advanced qualitative inquiry courses or as a supplementary text in courses that examine the use of theory in research

Practice Methodologies in Education Research Julianne Lynch,Julie Rowlands,Trevor Gale,Stephen Parker,2019-10-08 Practice Methodologies in Education Research offers a fresh approach to researching practice in education Addressing a major gap in research methodology scholarship it highlights how integral practice theory is to the transformational agendas of education research introducing a theory of activist practice methodologies informed by expansive theories of practice With contributions from leading education researchers drawn from across the world the book confronts onto epistemological dilemmas for doing research that arise from taking practice theory seriously including the theories of Bourdieu de Certeau Deleuze Haraway Latour Taylor and Vygotsky A defining feature of the chapters is their activist axiologies and their experimental approach to researching practice in education in fields as diverse as educational leadership schooling higher education adult and workplace education and training professional practice and informal learning Practice Methodologies in Education is essential reading for education academics and postgraduates engaged in critical research using practice theory

Physicians of the Future Rosalynn A. Vega,2024-05-21 The first scholarly exploration of the forums practice and economics of functional medicine Physicians of the Future interrogates the hidden logics of inclusion and exclusion in functional medicine FM a holistic form of personalized medicine that targets chronic disease Rosalynn Vega uncovers how as wounded healers some FM practitioners who are former chronic disease sufferers turn their illness narratives into a form of

social capital leveraging social media to relate to patients and build practices as doctor influencers Arguing that power and authority operate distinctly in FM when compared to conventional medicine largely because FM services are paid for out of pocket by socioeconomically privileged clients Vega studies how FM practitioners engage in entrepreneurship of their own while critiquing the profit motives of the existing healthcare system pharmaceutical industry and insurance industry Using data culled from online support groups conferences docuseries blogs podcasts YouTube and TED Talks as well as her own battles with chronic illness Vega argues that FM practices prioritize the individual while inadvertently reinscribing inequities based on race and class Ultimately she opens avenues of possibility for FM interlocutors wrestling with their responsibility for making functional medicine accessible to all

Transformed States Martin Halliwell, 2024-11-15 Honourable Mention British Association of American Studies Book Award Transformed States offers a timely history of the politics ethics medical applications and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID 19 pandemic In exploring the entanglements of mental and physical health in an age of biotechnology it views the post Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty first century The book draws on original research spanning the presidencies of George H W Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology Some of these technologies reveal fierce ideological conflicts in the arenas of cloning reproduction artificial intelligence longevity gender affirmation vaccination and environmental health Interweaving politics and culture the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts from Oryx and Crake to Annihilation and from Gattaca to Avatar By assessing the complex relationship between federal politics and the biomedical industry Transformed States develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise To that end Martin Halliwell analyzes thirty years that radically transformed American science medicine and policy positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested Along with the two earlier books Therapeutic Revolutions 2013 and Voices of Mental Health 2017 Transformed States is the final volume of a landmark cultural and intellectual history of mental health in the United States journeying from the combat zones of World War II to the global emergency of COVID 19

Travel to Transform: Awaken the Global Citizen in You and Thrive in the Modern World Freeman Fung, 2022-12-06 Guidebooks are for tourists and self help books are for internal journeys But what about the personal growth that comes from travelling Where are the guides for navigating cultural gaps and building a life in a new country Today the world has already globalised but human consciousness hasn't Global citizenship is not a status but a world centric way of thinking seeing and living Freeman Fung has experienced life in over thirty countries and believes that travelling is the ultimate fast track to personal growth and self mastery Travel to Transform is a self development guide for anyone feeling stuck in mundane routines and looking to discover more in life This travel memoir demonstrates how

becoming a global citizen unleashes opportunities to transform your life holistically from a state of surviving to a state of thriving Get inspired to leave your comfort zone No matter where you re from you too can live your fullest as a thriving global citizen in this modernised world Biohacker's Magazine Biohacker's Magazine , In a world with so much information that is continually thrown at us sometimes it s tough to know what to accept as Truth and what to reject as false So many things call for our attention that we can become mentally strained and exhausted by the end of the day Because of this we are susceptible to the coaxing idea of giving up our thinking especially our critical thinking We know we can t think about every little thing and decision that crosses our mind throughout the day so we have many of our thoughts on auto pilot which is fine as this helps us from becoming absolutely drained by the end of our day The problem arises when we let this auto thinking expand beyond the everyday task level of thinking and decision making Out of comfort we can allow ideas and words that flash before us throughout our daily lives to merge into our inner brain s reservoir without first weighing the information against our experiences and own inner knowledge of our understanding of the Truth This is essential when we let others that generate ideas thoughts agendas etc think for ourselves because we simply feel too overloaded with the amount of information we have to continually process that we give up our own free right to ponder something It s quite scary when we think about the ramifications that can come of this especially when the world today shows us that those that don t think for themselves are perfect subjects to a form of modern day slavery to whatever ideas and reality the powers want to build up This is why it s so important to take the time to invest in ourselves from the beginning and make learning reading and curiosity a habit It takes time but the earlier we begin the more time we save in the long run from having to put great time and attention into each thought that enters our mind and decide whether it fits with our values or not We must be like children constantly questioning the world and using our forged experiences to add to our answers and depth of self knowledge In the same manner we must respectfully study and learn from all those who have gone before us and be open to learning about their ways and perspectives Remember that knowledge is not solely subjective it is also objective and is the understanding of a real concrete thing under the aspect of a grasped meaning We use our intellect to study and think rationally about things which adds to our understanding of the truth about ourselves our community and our world The choices that we make are dependent upon our will whether good or bad which is in turn dependent upon our understanding of the truth Man is the only animal that can say I eat and I know that I eat I am and I know that I am I think and I know that I think To know we must think critically about subjects that truly hold value We must make the most of our intellect and discover new data from our experiments from biohacking to add to our knowledge in the search for the truth that propels all of us humans forward to the beat of Life s constant drum If you look for truth you may find comfort in the end if you look for comfort you will not get either comfort or truth only soft soap and wishful thinking to begin and in the end despair C S Lewis
