industrial educational system and proposes a highly personalized organic approach that draws on today's unprecedented technological and professional resources to engage all students develop their love of learning and enable them to face the real challenges of the twenty first century Filled with anecdotes observations and recommendations from professionals on the front line of transformative education case histories and groundbreaking research and written with Robinson's trademark wit and engaging style Creative Schools will inspire teachers parents and policy makers alike to rethink the real nature and purpose of education

Imagine If . . . Sir Ken Robinson, PhD, Kate Robinson, 2022-03-01 A call to action that pulls together all of Sir Ken Robinson's key messages and philosophies and that challenges and empowers readers to re imagine our world and our systems for the better Sir Ken Robinson changed the lives of millions of people The embodiment of the prestigious TED conference his TED Talks are watched an average of 17 000 times a day a figure that Chris Anderson Head of TED says is the equivalent of selling out the Millennium Dome every night for fifteen consecutive years A New York Times bestselling author Sir Ken's books have been translated into twenty four languages In his final years Sir Ken was working on a book that would serve as his manifesto This book was being written for both new and dedicated audiences alike as a coherent overview of the arguments that he dedicated his life to and as a pivotal piece of literature for the education revolution he began When Sir Ken received his cancer prognosis in August 2020 he asked his daughter and collaborator Kate Robinson to finish writing this manifesto and continue his work At its core Sir Ken's work is a love letter to human potential a celebration of what we as a species are capable of doing and of being if we create the right conditions It is a rallying cry to revolutionize our systems of education and the ways in which we run our businesses and structure our social systems so that they bring out the best in each and every person Sir Ken often observed that what separates us from the rest of life on Earth is our power of imagination the ability to bring to mind things that are not present to our senses It is imagination that allows us to create the world in which we live rather than just exist in it It also gives us the power to recreate it

Rage Inside the Machine Robert Elliott Smith, 2019-06-27 Shortlisted for the 2020 Business Book Awards We live in a world increasingly ruled by technology we seem as governed by technology as we do by laws and regulations Frighteningly often the influence of technology in and on our lives goes completely unchallenged by citizens and governments We comfort ourselves with the soothing refrain that technology has no morals and can display no prejudice and it s only the users of technology who distort certain aspects of it But is this statement actually true Dr Robert Smith thinks it is dangerously untrue in the modern era Having worked in the field of artificial intelligence for over 30 years Smith reveals the mounting evidence that the mechanical actors in our lives do indeed have or at least express morals they re just not the morals of the progressive modern society that we imagined we were moving towards Instead as we are just beginning to see in the US elections and Brexit to name but a few there are increasing incidences of machine bigotry greed and the crass manipulation of our basest instincts It is easy to assume that these are the result of programmer prejudices or the product of dark forces manipulating the masses through the network of the Internet But what if there is something more fundamental and explicitly mechanical at play something inherent within technology itself This book demonstrates how non scientific ideas have been encoded deep into our technological infrastructure Offering a rigorous fresh perspective on how technology has brought us to this place *Rage Inside the Machine* challenges the long held assumption that technology is an apolitical and amoral force Shedding light on little known historical stories and investigating the complex connections between scientific philosophy institutional prejudice and new technology this book offers a new honest and more truly scientific vision of ourselves

Manifesto Ken Robinson, Kate Robinson (Consultant), 2022-03 Imagination and creativity are at the root of every uniquely human achievement and those achievements have brought us to this present moment We are now the largest population in human history seven and half billion people rising to nine billion by 2050 Our technologies are evolving exponentially but spiritually and emotionally we re not keeping pace Our appetites are straining the earth s capacity to sustain us and our attempts to force it to do so are fuelling a holocaust of other species Communities across the globe are still locked in ancient cultural conflicts and while the majority of people are materially more comfortable than ever before there are global epidemics of depression and anxiety To meet these existential challenges we have to harness our creativity to a more compassionate and sustainable vision of the world we want to live in and the lives we hope to lead To do that we have to create new systems of education for the future and for our children that are based on organic principles of diversity creativity and collaboration
