Kengo Kuma Geometries Of Nature:

Kengo Kuma Kengo Kuma,1999 We are dealing with architectural works in which the subtle charm of the forms and the close relationship with nature are combined with great architectural knowledge and perfect functionality *Place, Time, and Being in Japanese Architecture* Kevin Nute,2004 In addition to highlighting the human benefits of built environments which relate to particular place time and being many of the Japanese buildings examined illustrate practical strategies for revealing these universal parameters which are equally applicable beyond Japan It is suggested that wider use of some of these approaches could not only help to sustain both environmental and cultural identities against the homogenising effects of globalisation but also has the potential to heighten our appreciation of the peculiar condition of being here now Jacket

Material Immaterial Botond Bogner,Kengo Kuma,2009-11-04 Presents more than thirty of the architect's recent works including high profile commissions such as the Suntory Museum in Tokyo and the Ondo Civic Center in Kure the exclusive Lotus House in Zushi large scale urban developments in Sanlitun Village South in Beijing and more **Contemporary Japanese Architecture** James Steele,2017-03-16 Contemporary Japanese Architecture presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture

Water and Sacred Architecture Anat Geva,2023-05-25 This edited book examines architectural representations that tie water as a physical and symbolic property with the sacred The discussion centers on two levels of this relationship how water influenced the sacredness of buildings across history and different religions and how sacred architecture expressed the spiritual meaning of water The volume deliberately offers original material on various unique contextual and design aspects of water and sacred architecture rather than an attempt to produce a historic chronological analysis on the topic or focusing on a specific geographical region As such this unique volume adds a new dimension to the study of sacred architecture The book's chapters are compiled by a stellar group of scholars and practitioners from the US Canada Europe Asia and Africa It addresses major aspects of water in religious buildings such as rituals pilgrimage water as a cultural material and place making hydro systems modern practices environmental considerations the contribution of water to transforming secular into sacred and future digital cyber context of water and sacredness All chapters are based on original archival studies historical documents and field visits to the sites and buildings These examinations show water as an expression of architectural design

its materiality and its spiritual values The book will be of interest to architects historians environmentalists archaeologists religious scholars and preservationists

VERSUS: Heritage for Tomorrow Correia, Mariana, Dipasquale, Letizia, Mecca, Saverio, 2014 Vernacular architecture represents a great resource that has considerable potential to define principles for sustainable design and contemporary architecture This publication is the result of an overall aim to produce a valuable tool for analysis regarding vernacular heritage through different assessments in order to define principles to consider for sustainable development This was possible through a comprehensive reflection on the principles established and the strategies to recognise in different world contexts The present publication was the result of an in depth approach by 46 authors from 12 countries concerned with the analysis and critical assessment of vernacular heritage and its sustainable perspective The book presents 8 chapters addressing operational definitions and synopses advances regarding the main areas of vernacular heritage contribution to sustainable architecture It also presents 15 chapters and 53 case studies of vernacular and contemporary approaches in all the 5 continents regarding urban architectural technical and constructive strategies and solutions
