Local Action The New Paradigm In Climate Change Policy

Judd E. Hollander

Local Action The New Paradigm In Climate Change Policy:

Local Action Tommy Linstroth, Ryan Bell, 2007 While traditionally framed as a national and international problem climate change is also an important local issue For the past fifteen years while nations have fought over the terms of emissions reductions and the Kyoto Protocol local governments and communities have been enacting innovative measures that not only prevent emissions of significant quantities of greenhouse gases but also reduce air pollution save money and improve the overall quality of life In the absence of a serious national policy that addresses global warming these grassroots efforts can and have made a difference Since 1993 when fourteen pioneering local governments first began to develop programs to reduce greenhouse gas emissions a national and international movement has formed to fight global climate change through concerted local action These communities are having a significant effect A handful of jurisdictions in the United States are preventing over twenty million tons of CO₂ from entering the atmosphere annually and have saved over four hundred million dollars in the process These initiatives include greening the local building codes creating commercial waste reduction programs encouraging water conservation promoting bicycling and fuel efficient vehicles upgrading city buildings advocating for the use of biodiesel for municipal transportation and designing innovative systems and policies for reduced paper use Two in depth case studies Fort Collins Colorado and Portland Oregon demonstrate how two cities have created and implemented climate friendly and environmentally sound habitats While most books on global warming focus on national and international implications and policy approaches or serve as guides to help individuals live in an ecologically sound manner Linstroth and Bell provide a blueprint for local governments to follow Combining an analysis of existing federal policy with examples of successful local policy they provide practical examples of measures that can be implemented by communities and local governments across the United States

New Perspectives in Climate Change Emerald Group Publishing Limited, 2015-10-29 New Perspectives in Climate Change is a unique collection of articles that discuss key areas of research among academics in the field These include the following Climate change adaptation Vulnerability to and mitigation of climate change This collection provides an unparalleled insight into the subject of climate change [Local Climate Action Planning](#) Michael R. Boswell, Adrienne I. Greve, Tammy L. Seale, 2012-07-16 Climate change is a global problem but the problem begins locally Cities consume 75% of the world's energy and emit 80% of the world's greenhouse gases Changing the way we build and operate our cities can have major effects on greenhouse gas emissions Fortunately communities across the U.S. are responding to the climate change problem by making plans that assess their contribution to greenhouse gas emissions and specify actions they will take to reduce these emissions This is the first book designed to help planners municipal staff and officials citizens and others working at local levels to develop Climate Action Plans CAPs are strategic plans that establish policies and programs for mitigating a community's greenhouse gas (GHGs) emissions They typically focus on transportation energy use and solid waste and often differentiate between community wide actions and municipal agency

actions CAPs are usually based on GHG emissions inventories which identify the sources of emissions from the community and quantify the amounts. Additionally, many CAPs include a section addressing adaptation: how the community will respond to the impacts of climate change on the community such as increased flooding, extended drought, or sea level rise. With examples drawn from actual plans, *Local Climate Action Planning* guides preparers of CAPs through the entire plan development process, identifying the key considerations and choices that must be made in order to assure that a plan is both workable and effective. *Local Climate Change and Society* Mohamed A. Salih, 2014-12-11. *Local Climate Change and Society* examines how climate change has altered society's relationship with the environment and the resulting structural changes in local communities to adapt to and mitigate climate change. The book analyses the principles, practices, and local responses to micro-level climate policies and interrogates the increasing role of local climate social movements induced by transnational corporations' activities both above and below the equator. *Environmental Populism* Mark Beeson, 2019-05-16. This book evaluates climate change and populism—two ideas that do not generally go together. The author argues that perhaps they should if policymakers are to be galvanized into action before it is too late. Although populism is usually associated with right-wing authoritarianism, there is growing interest in more progressive forms of populist politics. Across the world, young people in particular are mobilizing to demand change from an older generation that appears to be incapable of action or is hostage to powerful vested interests and outdated ideas. In this book, the author explains why populist forms of political action may yet provide the key to effective policies, which are often discussed but less frequently implemented. Accessible and trenchantly argued, this book presents a primer for the politics of survival. *Globalism and Localization* Jeanine Canty, 2019-05-16. Considering the context of the present ecological and social crisis, this book takes an interdisciplinary approach to explore the relationship between globalism and localization. Globalism may be viewed as a positive emergent property of globalization. The latter depicts a worldwide economic and political system and arguably a worldview that has directly increased planetary levels of injustice, poverty, militarism, violence, and ecological destruction. In contrast, globalism represents interconnected systems of exchange and resourcefulness through increased communications across innumerable global diversities. In an economic, cultural, and political framework, localization centers on small-scale communities placed within the immediate bioregion, providing intimacy between the means of production and consumption as well as long-term security and resilience. There is an increasing movement towards localization in order to counteract the destruction wreaked by globalization, yet our world is deeply and integrally immersed within a globalized reality. Within this collection, contributors expound upon the connection between local and global phenomena within their respective fields, including social ecology, climate justice, ecopsychology, big history, peace ecology, social justice, community resilience, indigenous rights, permaculture, food justice, liberatory politics, and both transformative and transpersonal studies. *The Routledge Handbook of Tourism and the Environment* Andrew Holden, David A. Fennell, 2013. This handbook explores and critically evaluates the debates and

controversies inherent to tourism's relationship with nature especially pertinent at a time of major re-evaluation of our relationship with the environment as a consequence of the environmental problems we now face *Climate Justice and the Economy* Stefan Gaarsmand Jacobsen, 2018-05-15 As climate change has increasingly become the main focus of environmentalist activism since the late 1990s the global economic drivers of CO₂ emissions are now a major concern for radical greens In turn the emphasis on connected crises in both natural and social systems has attracted more activists to the Climate Justice movement and created a common cause between activists from the Global South and North In the absence of a pervasive narrative of transnational or socialist economic planning to prevent catastrophic climate change these activists have been eager to engage with advanced knowledge and ideas on political and economic structures that diminish risks and allow for new climate agency This book breaks new ground by investigating what kind of economy the Climate Justice movement is calling for us to build and how the struggle for economic change has unfolded so far Examining ecological debt just transition indigenous ecologies social ecology community economies and divestment among other topics the authors provide a critical assessment and a common ground for future debate on economic innovation via social mobilization Taking a transdisciplinary approach that synthesizes political economy history theory and ethnography this volume will be of great interest to students and scholars of climate justice environmental politics and policy environmental economics and sustainable development Carbon Capture and Storage in International Energy Policy and Law Hirdan Katarina de Medeiros Costa, Carolina Arlota, 2021-10-13 Carbon Capture and Storage in International Energy Policy and Law identifies the main contemporary regulatory requirements challenges and opportunities involving CCS from a comparative and interdisciplinary perspective It draws on the scholarship of renowned researchers across the fields of international energy law and policy to address CCS regulation and its impact on climate change sustainable development and related consequences for energy transition In this vein the book aims to address issues related to energy energy justice and climate changes including CCS technology Contributors discuss the main challenges and advantages concerning international energy and the forms CCS may contribute to energy security climate change adaptation and mitigation of GHG emissions and sustainable development In this light the book discusses CCS as a bridge that integrates international energy climate change and sustainable development Covers contemporary regulatory command and control and market incentive instruments across the local regional and or international spheres in depth and in comparison Reviews deregulatory impacts modern financing of CCS liability of the involved parties and pertinent environmental issues Addresses sociotechnical aspects of CCS and its specific impact on the international arena Discusses the interplay of carbon capture and storage renewables and the overall energy transition current pathways to sustainable development Issues for Debate in Environmental Management CQ Researcher, 2010 Issues for Debate in Environmental Management is a contemporary collection of articles covering core issues within the broad topic of environmental management The book is intended to supplement core courses in the Business

and Management curriculum titled Environmental Management Sustainability and Business and Society among other similarly titled courses The book begins with a feature article titled The New Environmentalism Can New Business Policies Save the Environment and progresses through 16 articles of topics generally covered in environmental management courses including global warming the green economy clean energy sources water sources and other opportunities for business and management exploration

Urban Sustainability and Justice Vanesa Castán Broto, Linda Westman, 2019-12-15 Urban Sustainability and Justice presents an innovative yet practical approach to incorporate equity and social justice into sustainable development in urban areas in line with the commitments of the UN's Sustainable Development Goals and the New Urban Agenda This work proposes a feminist reading of just sustainability principles to reclaim sustainability as a progressive discourse which informs action on the ground This work will help the committed activist whether they are on the ground working in a community in a non governmental organization NGO in a business at a university in any sphere in government to connect their work to international efforts to deliver environmental justice in cities around the world Drawing on a comparative international analysis of sustainability initiatives in over 200 cities Castán Broto and Westman find limited evidence of the implementation of just sustainability principles in practice but they argue that there is considerable potential to develop a justice oriented sustainability agenda Highlighting current successes while also assessing prospects for the future the authors show that just sustainability is not merely an aspirational discourse but a frame of reference to support radical action on the ground

Issues for Debate in Corporate Social Responsibility CQ Researcher, 2010 Issues for Debate in Corporate Social Responsibility is a contemporary collection of articles covering core issues within the controversial topic of corporate social responsibility CSR The book is intended to supplement core courses in the Business and Management titled Corporate Social Responsibility Environment of Business Business Ethics and Business Policy The book offers an insight into topics often covered in CSR courses and texts organizational issues economic issues and societal issues There are a total of 15 highly contemporary and data rich articles in the collection Each article gives substantial background and analysis of a particular issue as well as useful pedagogical features to inspire critical thinking and to help students grasp and review key material

Living Above the Store Martin Melaver, 2009 Not Merely Sustainable Restorative A viable business is a living thing embedded in the complex web of economy community and ecology Done right business can help correct the modern stresses of environmental degradation and social fragmentation and create value for workers shareholders and additional stakeholders in the community Living Above the Store explores a road less traveled and chronicles how business can navigate a new path toward successful restorative practices Book jacket

A Newer World William F. Hewitt, 2012 Here is a story that has not previously been adequately told the story of the developments trends and visionary people that are in many ways mitigating the climate crisis and turning sustainable development into reality not just a grand concept In A Newer World the environmentalist Bill Hewitt explores the advances in business and finance politics

design science and engineering that are transforming the world around us right now even as the dire climatic consequences of the industrialization of our economies have become ever more starkly apparent The received wisdom is that we are on an irrevocable path toward climate catastrophe The political process we are told is broken Coal fired power plants in China and India are going to inundate the climate system with CO2 before we can convert to less dangerous ways to generate power Market mechanisms to control emissions have not as yet realized their potential There is some truth in all of this but it is not by any means the whole story A Newer World surveys the quantum leaps that are being made in clean technology and tells how governments industry and financial institutions are moving faster and more vigorously every day toward embracing these technologies The challenges are real A Newer World tells the untold story of the major progress already being made in addressing the looming climate crisis

Food Movements Unite! Samir Amin, 2011-12-06 Food Movements Unite

Strategies to transform our food systems The present corporate food regime dominating the planet s food systems is environmentally destructive financially volatile and socially unjust Though the regime s contributions to the planet s four fold food fuel finance and climate crises are well documented the solutions advanced by our national and global institutions reinforce the same destructive technological path the same global market fundamentalism and the same unregulated consolidation of corporate power in the food system that brought us the crisis in the first place A dynamic global food movement has risen up in the face of this sustained corporate assault on our food systems Around the world local food justice activists have taken back pieces of the food system through local gardening organic farming community supported agriculture farmers markets and locally owned processing and retail operations Food sovereignty advocates have organized locally and internationally for land reform the end of destructive free trade agreements and support for family farmers women and peasants Protests against and viable alternatives to the expansion of GMOs agrofuels land grabs and the oligopolistic control of our food are growing everywhere every day giving the impression that food movements are literally breaking through the asphalt of a reified corporate food regime The social and political convergence of the practitioners and advocates in these food movements is also well underway as evidenced by the growing trend in local regional food policy councils in the US coalitions for food sovereignty spreading across Latin America Africa Asia and Europe and the increasing attention to practical political solutions to the food crisis appearing in academic literature and the popular media The global food movement springs from strong commitments to food justice food democracy and food sovereignty on the part of thousands of farmers unions consumer groups faith based civil society and community organizations across the urban rural and north south divides of our food systems This magnificent movement of movements is widespread highly diverse refreshingly creative and politically amorphous Food Movements Unite is a collection of essays by food movement leaders from around the world that all seek to answer the perennial political question What is to be done The answers from the multiple perspectives of community food security activists peasants and family farm leaders labor activists and leading food

systems analysts will lay out convergent strategies for the fair sustainable and democratic transformation of our food systems Authors will address the corporate food regime head on arguing persuasively not only for specific changes to the way our food is produced processed distributed and consumed but specifying how these changes may come about politically The Green Building Bottom Line (GreenSource Books; Green Source) Martin Melaver,Phyllis Mueller,2008-12-01 What are the real costs and real benefits of building green As any builder knows cost estimation and reality are often two very different things The Green Building Bottom Line makes the case for green building by providing the insights and data that demonstrate the true costs and benefits of building green It s a why to and a how to that explores everything from the ground up The Green Building Bottom Line puts an entire development team at the table to better understand both the issues encountered and what s behind the perceived price premium for building green This candid and transparent account explores every aspect of green development on groundbreaking projects from the nation s first all retail LEED core and shell project to an innovative multitenanted LEED Existing Buildings office project to a mixed use hotel retail condo project in a transitional urban market The authors focus on such issues as values culture life cycle costs insurance financing coordinating a team marketing and negotiating leases Includes Detailed case studies of green building projects start to finish Information on financial legal and operational aspects of the job The real world costs of green building not unrealistic estimates A behind the scenes look at the LEED building process Unique insight from those who have actually done the work The Green Building Bottom Line covers Economical and ecological benefits Auditing sustainability in existing buildings Financial benefits of green tenancy Loan analysis Insurance underwriting Expense reduction Writing a green lease Converting an existing building Green retail Brokering sustainability Marketing HR practices and processes *Abstracts of Public Administration, Development, and Environment* ,2009 XXXXXXXXXXXXXXXXXXXX XXX,2022-12-28 **Traditional Urbanism Response to Climate Change** Anjali Krishan Sharma,2022-08-18 The book focuses on the key contemporary issue of Climate change constructing the narrative from traditions of Urbanism through its Axiology and Epistemology The book is a rich collection of seven chapters and attempts to address each of the aspects and building further for traditional Urbanism The book further explores the synergies of traditional urbanism for Climate change through climate responsive practices with main thrust on Energy use The said understanding is validated through the case example of walled city of Jaipur World Heritage Site 2019 The chapters enumerate how the traditional urbanism of Jaipur was designed that evolved as climate responsive typology for the respective geography **Fire in the South American Ecosystems** Alessandra Fidelis,Vânia R. Pivello,2025-07-01 The incidence of anthropogenic fires in South America has increased lately and fire effects on the biodiversity and ecosystem services are of great concern On the other hand natural fires have been present in the continent for thousands of years acting as an evolutionary driver of vegetation and fauna Therefore several ecosystems in South America are fire prone due to their evolutionary history while those that have not evolved under frequent fires are fire sensitive At the same time as

humans increase fire frequency in some environments they try to banish fire from others and such anthropogenic fire regimes have enormous consequences for biota ecosystem services and the environment This book will address the various South American ecosystems that benefit from the presence of fire but also those that are harmed by fire The effects of fire on plant and animal biodiversity of the main South American ecosystems will be presented and discussed considering current trends in climate and land use change bringing understanding about when and how fire should or should not be used to benefit nature and humans Options for fire planning and management will be highlighted especially considering the reduction of wildfire risk and the conservation of biodiversity and natural resources This broad comprehension of the fire issue in South America will support wise decisions by environmental analysts conservation managers and public policy makers

Lets delve into the realm of bestselling books, exploring the captivating narratives that have charmed audiences this year. The Must-Read :

Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail.

Local Action The New Paradigm In Climate Change Policy : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery.

Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts.

The Secret History is a masterful and suspenseful novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
