Local Lives And Global Transformations Towards World Society:

Local Lives and Global Transformations Paul Kennedy, 2017-09-16 Globalization is widely accepted as being a defining process of our modern society But to what extent do individuals think feel or act in a way that takes account of the whole world Do globalization processes really affect us in our everyday lives And if so where are the boundaries between local and global society This book investigates how local and global studies overlap and interact by examining how real local lives function under global conditions It begins by unravelling the most important concepts and debates in the field opening them up to scrutiny and testing their assumptions through recent case studies and empirical material The book goes on to examine the power of local forces in forming global processes and explores our attachment to local vs global identities whilst asking if we can build on our local attachments to move towards a world society From concerns about the international economy and growing global inequalities to worldwide fears of organized crime and terrorism this insightful book suggests a new way of looking at the interaction of local and global transformations Local Lives and Global Transformations gives student readers the knowledge and the encouragement to push the boundaries of their understanding of globalization It is inspiring reading for all those studying and interested in globalization throughout the social sciences

Cities, Politics & Power Simon Parker, 2010-11-02 Traditionally the study of power in the city was confined to the institutions of urban government and the actors involved in contesting and making political decisions in and for metropolitan societies Increasingly however attention has turned to the function of the city not only as a centre of urban governance but as a major economic social cultural and strategic force in its own right Cities Politics and Power combines this traditional concern with how the cities in which we live are organized and run with a broader focus on cities and urban regions as multiple sites and agents of power This book is divided into five sections with a short introduction outlining the argument and organisation of the text Part two charts the development of the urban polity and considers the ways in which coercion and force continue to be used to segregate oppress and annihilate urban populations Part three critically examines the key collective actors and processes that compete for and organise political power within cities and how urban governance operates and interacts with lesser and greater scales of government and networks of power Part four then explores the ways in which the political is constituted by urban inhabitants and how social identity information and communication networks and the natural and built environment all comprise intersecting fields of

urban power The conclusion calls for a broader theoretical and thematic approach to the study of urban politics This book makes extensive use of comparative and historical case studies providing broad coverage of politics and urban movements in both the Global North and the Global South with a particular focus on the UK USA Canada Latin America and China It is written in an accessible and lucid style and provides suggestions for further reading at the end each chapter Managing Prisons Jamie Bennett,2024-11-08 This book critiques the practices of managerialism and their effects on those who live and work in prisons It draws upon ethnographic research conducted in English prisons over a 15 year period written by a former prison governor Since the last years of the 20th century public services in England have increasingly adopted managerial approaches with an architecture of target setting surveillance and assertive line management The book examines how this system was created and then evolved during the period of austerity after 2010 and was disrupted during the coronavirus pandemic of 2020 22 It proposes an alternative approach re energising the agency of prison managers reinvigorating a more localised approach and developing measures that address the lived experience of people in prison This book will be of particular relevance to prison managers and policy makers researchers interested in criminology the sociology of prisons and the sociology of work as well as to post graduate students exploring prison work **Aesthetico-Cultural**

Cosmopolitanism and French Youth Vincenzo Cicchelli,Sylvie Octobre,2018-01-28 By examining cultural consumption tastes and imaginaries as a means of relating to the world this book describes the effects of globalization on young people from an aesthetic and cultural perspective It employs the concept of aesthetico cultural cosmopolitanism to analyse the emergence of an aesthetic openness to alterity as a new generational good taste Aesthetico Cultural Cosmopolitanism and French Youth critically examines the consumption of cultural products and imaginaries that provide genuine insight into social change particularly in regards to young people who play the largest role in cultural circulation This book will be of interest to students and academics across a wide range of readers including cultural theorists and students engaged in debates on cultural consumption the globalization of culture and transnational aesthetic codes Solitary Confinement Jules Lobel,Peter Scharff Smith,2020 Solitary confinement is used for a variety of different reasons in many prison systems all over the world despite the fact that research shows that these practices have widespread and pronounced negative health effects Besides the death penalty solitary confinement is arguably the most punitive and dangerous intervention available to state authorities in democratic nations This broad and interdisciplinary book draws together research and personal experience from neuroscientists high level prison officials social and political scientists medical doctors lawyers and former prisoners and their families from different countries in order to address the effects and practices of prolonged solitary confinement and to strengthen the movement for its reform and eventual abolition A Political Sociology of Transnational Europe Niilo Kauppi,2024-08-22 Globalisation and complex Europeanisation are two significant challenges currently influencing the restructure of the European nation state and redefining political power For this volume first rate European scholars look at

the consequences of these and other challenges faced by European societies Contributions revisit traditional objects of political science state sovereignty civil society and citizenship mixing sophisticated empirical analyses with methodological and conceptual innovations including field theory multiple correspondence analysis and the study of space sets Combining qualitative and quantitative research techniques and macro and micro levels chapters have in common a contextual analysis of politics through scrutiny of configurations of groups representations and perceptions A transnational perspective is the common thread linking every study in this volume which seeks to avoid methodological nationalism

Globalization, Supranational Dynamics and Local Experiences Marco Caselli, Guia Gilardoni, 2017-11-03 This edited collection focuses on concepts of globalization glocalization transnationalism and cosmopolitanism The contributions provide evidence of how in practice global dynamics and individual lives are interrelated It presents theoretical reflections on how the local the transnational and global dimensions of social life are entwined and construct the meaning of one another and offers everyday examples of how individuals and organizations try to answer global challenges in local contexts The book closely focuses on migration processes as one of the main phenomena allowing a high number of people from contemporary society to directly experience supranational dynamics either as migrants or inhabitants of the places where migrants pass through or settle down Globalization Supranational Dynamics and Local Experiences will be of interest to students and scholars across a range of disciplines including sociology migration studies and global studies

Trying to Measure Globalization Marco Caselli, 2012-01-05 The aim of this book is to conduct a critical survey of the main tools devised for the synthetic measurement of globalization processes To this end the first part of the book discusses the meaning of the concept considered highlighting the different and often contradictory interpretations put forward in its regard in the literature Subsequently analysed are the passages and issues that must be addressed when constructing an instrument intended to measure a social phenomenon of such complexity as globalization Stressed in particular is that the researcher's subjectivity is repeatedly involved in these passages so that no instrument can have objective validity Given these premises the book presents the principal tools employed in attempts to measure globalization starting with those whose unit of analysis is the state In this regard particular space is devoted to indexes which take a multidimensional approach to the concept of globalization There follows a comparison among the results obtained using these indexes and criticisms are made of the ways in which the latter have been constructed A limitation or if one wishes a paradox concerning such tools is that they measure in relation to states a process which has as one of its principal features the fact that it extends beyond the confines of states For this reason the final chapter considers whether globalization can be measured with different units of analysis in particular people and cities The book concludes with discussion of the general limitations of globalization indexes

The Globalization of Strangeness C. Rumford, 2013-01-21 The figure of the stranger is in serious need of revision as is our understanding of the society against which the stranger is projected Under conditions of globalization inside outside markers

have been eroded and conventional indicators of whiteness are no longer reliable. We now live in a generalized state of strangeness, one consequence of globalization: we no longer know where our community ends and another one begins. In such circumstances, it is often the case that neighbours are the nearest strangers. Strangeness occurs when global consciousness outstrips global connectivity, and this means that we need to rethink some core elements of globalization theory. Under conditions of strangeness, the stranger is a here today, gone tomorrow figure. This book identifies the cosmopolitan stranger as the most significant contemporary figure of the stranger, one adept at negotiating the confined spaces of globalization in order to promote new forms of social solidarity and connect with distant others.

Global Sociology, Third Edition Robin Cohen, Paul Kennedy, 2013-03. The third edition explores global issues at the heart of sociological discussion with an updated focus on globalism, social media, migration, and more. The first pioneering editions of *Global Sociology* put global issues at the heart of sociological discussion. Much has changed in the world since then: recessions, revolutions, social media, and new migration networks have developed as causes and symptoms of an increasingly global society. This new edition is fully updated to explore just how these global issues can help us to understand sociology in our world today. Making clear connections between everyday experiences and global processes, at each step the third edition carefully guides readers through essential and cutting-edge topics in the discipline, from family and feminism to environment and economy. Features such as biography boxes on key thinkers in the field, a thorough glossary, and review questions introduce and reinforce the book's core ideas. With clear writing and infectious enthusiasm for its topic, *Global Sociology* remains the authority on global issues in sociology for students at a variety of skill levels.

The Routledge Handbook of Transformative Global Studies S. A. Hamed Hosseini, James Goodman, Sara C. Motta, Barry K. Gills, 2020-06-09. The *Routledge Handbook of Transformative Global Studies* provides diverse and cutting-edge perspectives on this fast-changing field. For 30 years, the world has been caught in a long global interregnum, plunging from one crisis to the next and witnessing the emergence of new, vibrant, multiple, and sometimes contradictory forms of popular resistance and politics. This global interregnum, or a period of uncertainty where the old hegemony is fading and the new ones have not yet been fully realized, necessitates critical self-reflection, brave intellectual speculation, and unlearning of perceived wisdoms and greater transdisciplinary collaboration across theories, localities, and subjects. This Handbook takes up this challenge by developing fresh perspectives on globalization, development, neoliberalism, capitalism, and their progressive alternatives, addressing issues of democracy, power, inequality, insecurity, precarity, wellbeing, education, displacement, social movements, violence, and war, and climate change. Throughout, it emphasizes the dynamics for system change, including bringing post-capitalist, feminist, decolonial, and other critical perspectives to support transformative global praxis. This volume brings together a mixture of fresh and established scholars from across disciplines and from a range of both Northern and Southern contexts. Researchers and students from around the world and across the fields of politics, sociology, international development, international relations,

geography economics area studies and philosophy will find this an invaluable and fresh guide to global studies in the 21st century **Social Transformations in Scandinavian Cities** Magnus Johansson, Erica Righard, Tapio Salonen, 2016-02-14
