Reforming Reading, Writing, and Mathematics S.G. Grant,2012-12-06 In this book S G Grant reports his study of how four Michigan elementary school teachers manage a range of reforms such as new tests textbooks and curriculum frameworks in three different school subjects reading writing and mathematics Two significant findings

emerge from his comparison of these responses teachers responses vary across classrooms even when they teach in the same school building and also across the reforms a teacher might embrace reforms in one subject area but ignore proposed changes in another This study of teachers responses to reading writing and mathematics reform and the prospects for systemic reform is part of a growing trend to look at the intersection of curriculum policy and teachers classroom practice It is unique in the way the author looks at teachers responses to multiple subject matter reforms uses those responses as part of an analysis of the recent move toward systemic reform and employs empirical findings as a means of examining the current movement toward systemic reform Reforming Reading Writing and Mathematics is important reading for researchers practitioners and graduate students of educational policy teaching and learning in reading writing and mathematics and elementary education and for policy analysts in universities foundations and government **Mathematical and Statistics**

Anxiety: Educational, Social, Developmental and Cognitive Perspectives Kinga Morsanyi,Irene Cristina

Mammarella,Denes Szűcs,Carlo Tomasetto,Caterina Primi,Erin Anne Maloney,2017-01-19 Mathematical anxiety is a feeling of tension apprehension or fear which arises when a person is faced with mathematical content The negative consequences of mathematical anxiety are well documented Students with high levels of mathematical anxiety might underperform in important test situations they tend to hold negative attitudes towards mathematics and they are likely to opt out of elective mathematics courses which also affects their career opportunities Although at the university level many students do not continue to study mathematics social science students are confronted with the fact that their disciplines involve learning about statistics another potential source of anxiety for students who are uncomfortable with dealing with numerical content Research on mathematical anxiety is a truly interdisciplinary field with contributions from educational developmental cognitive social and neuroscience researchers The current collection of papers demonstrates the diversity of the field offering both new empirical contributions and reviews of existing studies The contributors also outline future directions for this line of research Digital Transformation in Education and Artificial Intelligence Application Daniel Vasić,Emil
