Trueman, 2003-09-02 New product design and development is often the result of personal vision Harnessing this often requires a special receptiveness and enthusiasm at all levels of an organization which serves to unlock potential and can turn the entire organizational pyramid upside down It is particularly important to understand and develop those aspects of design which can be constructively employed by designers in a strategic alliance with management and research The papers in this volume result from the conference of the Design Society held at the University of Central England in September 1998 They show how design led product development has worked in a range of industries from engineering through to design and management consultancy Not only practitioners but also students of industrial design and management should find this a valuable contribution to the subject

Le Corbusier's Venice Hospital Project Mahnaz Shah, 2017-05-15 While Le Corbusier's urban projects are generally considered confrontational in their relationship to the traditional urban fabric his proposal for the Venice hospital project remained an exercise in preserving the medieval fabric of the city of Venice through a systemic replication of its urban tissue This book offers a detailed study of Le Corbusier's Venice hospital project as a plausible built entity In addition it analyses it in the light of its supposed affinity with the medieval urban configuration of the city of Venice No formal attempt to date has been made to critically analyse the hospital project's design considerations in comparison to the medieval urban configuration of the city of Venice Using a range of methodologies including those from architectural theory and history using archival resources on site analysis and interviews with important resource persons this book is an interpretation of the conceptual basis for Le Corbusier's understanding of the structural formulation of the city of Venice as mentioned in *The Radiant City* 1935 In doing so

it deciphers the diagrammatic analysis of the city structure found in this work into a set of coherent design modules that were applied in the hospital project and that could become a point of further investigation Architects and other architecturally interested laypeople with an interest in Venice will find the book a valuable addition to their knowledge For architectural historians the book makes an important link between modernism and the historically grown Venice

who had apprenticed with Le Corbusier in Chandigarh Kalia shows that unlike the other two cities Gandhinagar would become emblematic of Gandhian ideals of swadeshi indigenous goods and swaraj self rule Exploring the impact of modernist architecture on India as a whole Kalia suggests that the style gained acceptance because its parsimonious designs and unadorned spaces never represented a threat to a religiously pluralist country anxious to create a secular identity He explains how two competing versions of Indian history and ideology Gandhi's and Jawaharlal Nehru's employed modernism's ideals for their own separate ends Serving two masters as Kalia illustrates created constrictions and tensions evident in the building of Gandhinagar and in the careers of many Indian architects including Doshi Charles Correa and Achyut Kanvinde
