Outing and the Wheelman, 1885 **From the Jungle to the Deep Blue Sea** Jim Hindle, 2023-12-05. British forces have had a presence in British Honduras, Belize, or the wider Caribbean since the mid-17th century. This presence has included Royal Navy, Royal Marine, Army, and more recently the RAF. Over the years, force levels increased and decreased depending on the political situation with Guatemala at the time and the inherent threat of a possible Guatemalan border confrontation. At times, force levels reached roughly Brigade strength with additional RAF and RN support. Serving in Belize during this time was an exciting experience for most young men. On the one hand, you had relatively poor living conditions in some of the camps nearer the Guatemalan border, the harsh and inhospitable jungle, when carrying out patrols, the routine task of manning isolated observation posts on the tops of the Maya and Toledo mountains overlooking the Guatemalan border. Once away from the duties of securing the border, you had the opportunity to see the gentler side of Belize.

From the Jungle to the Deep Blue Sea is a down-to-earth book about individual memories and experiences of servicemen in Belize.

North to the Future Ben Weissenbach, 2025-07-15. Ben Weissenbach, a digital native with little prior wilderness experience, embarks on a series of scientific adventures across the wilds of Alaska with some of the state's most distinguished and audacious researchers. At the age of twenty, college student Ben Weissenbach went north to Arctic Alaska, armed with little more than inspiration from his literary heroes and a growing interest in climate change. What met him there was a world utterly unlike the 21st-century Los Angeles in which he grew up: a land of ice, rock, and grizzlies, seen by few outside a small contingent of scientists with big personalities. There's Roman Dial, the larger-than-life

ecologist with whom Ben walks and rafts a thousand miles across Alaska's Brooks Range. There's Kenji Yoshikawa, the reindeer herding permafrost expert who leaves Ben alone for eleven days to care for his off-grid homestead where temperatures drop to 49 degrees Fahrenheit. And there's Matt Nolan, the independent glaciologist who flies him to the largest glaciers in the American Arctic. As these scientists teach Ben to read Alaska's warming landscape, he confronts the limits of digital life and the complexity of the world beyond his screens. He emerges from each adventure with a new perspective on our modern relationship to technology and a growing wonder for our fast-changing, ever-changing natural world.
