In Conflict No Longer Irene Taviss Thomson, 2000 Drawing on social criticism self help manuals and the social scientific analysis of American character In Conflict No Longer examines American thinking about individualism conformity and community from 1920 through 1995 Taviss Thomson's analysis reveals a basic shift in American culture from a belief that the individual is necessarily in conflict with society and that the self chafes against the constraints imposed by society to a belief that the self is expressed in the groups relationships and subcultures that help shape it Taviss Thomson contends that this new model of a relational or embedded self arose due to a weakening of traditional identities based on occupation social class gender and age which left individuals freer to construct their own identities In an age where Americans increasingly abandon the traditional mythology of an individual struggling against social constraints In Conflict No Longer forecasts a picture of American culture for the next millennium
