juxtaposition of spatialized binary semantic oppositions By analyzing Verronen s dystopian novels the study unravels the spatial nature of the genre and the critical potential it encompasses Verronen s narratives on wilderness are approached through the notion of spatial practices and in the context of alienation and postpastoralism Finally the analysis on the literary homes and the acts of homesteading in Verronen s novels foregrounds the open connected and inclusive nature of the contemporary notion of home and new forms of attachment to place both of which are under an active debate in spatial literary studies By bringing together spatial literary studies and Verronen s works this research adds to the study of Finnish literature and contemporary literature s emphasis on space spatiality and environmental issues Moreover the study contributes to the knowledge on the genres of fantasy and dystopia as well as to the study of classic literary tropes and their contemporary manifestations As the study contextualizes Verronen s works within Nordic and European literatures it draws attention to the thematic and stylistic connections that link her writing to broader literary trends and traditions
