Lorigine De Lhomme Daprs Darwin French Edition:

Images of the Economy of Nature, 1650-1930 Antonello La Vergata, 2023-10-05 The book discusses ideas concerning the order and balance of nature or economy of nature from the late 17th century to the early 20th century The perspective taken is broad longue dur e and interdisciplinary and reveals the interplay of scientific philosophical moral and social ideas The story begins with natural theology dating roughly to the onset of the so called Newtonian Revolution and ends with the First World War The cut off date has been chosen for the following reasons the war changed the state of things affecting man s way of looking at and relating to nature both directly and indirectly indeed it put an end to most applications of Darwinism to society and history including interpretations of war as a form of the struggle for existence The author presents an overview of the different images of nature that were involved in these debates especially in the late 19th century when a large part of the scientific community paid lip service to Darwinism while practically each expert felt free to interpret it in his own distinct way The book also touches on the so called social Darwinism which was neither a real theory nor a common body of ideas and its various views of society and nature s economy Part of this book deals with the persistence of moralizing images of nature in the work of many authors One of the main features of the book is its wealth of detailed quotations In this way the author gives the reader the opportunity to see the original statements on which the author bases his discussion The author privileges the analysis of different positions over a historiography offering a merely linear narrative based on general implications of ideas and theories To revisit the concept of the so called Darwinian Revolution we need to examine the various perspectives of scientists and others their language and so to speak the lenses they used when reading facts and theories The book ends with some general reflections on Darwin and Darwinisms the plural is important as a case study on the relationship between intellectual history the history of science and contextual history Written by a historian this book really gives new multidisciplinary perspectives on the Darwinian Revolution **Darwin** Pamela Kort, Max Hollein, 2009 The exhibition is the first to focus on the implications of Darwinism for the fine arts All of the artists featured in the exhibition shared an interest in the natural sciences and either read texts by Darwin or by those who reacted to him With approximately 150 paintings drawings and lithographs as well as rare documentary material the exhibition showcases artists such as Martin Johnson Heade Franti ek Kupka Odilon Redon George Frederic Watts Arnold B ckin Gabriel von Max Alfred Kubin and Max Ernst and thus spans the period from 1859 to the mid twentieth century Schirn Kunsthalle website viewed July 26 2009

The Comparative Reception of Darwinism Thomas F. Glick, 1988-09-24 The majority of the chapters deal with the reception accorded Darwin s work in specific countries England the United States Germany France Russia the Netherlands Spain Mexico and the Arab countries Several chapters however also investigate the response to Darwinism made by specific social circles such as social scientists in Russia and the United States *Negotiating Darwin* Mariano Artigas, Thomas F. Glick, Rafael A Martinez, 2006-09-22 This well researched and insightful study reveals the secret deliberations that decided

the Vatican's stance on evolution Catholic Historical Review Drawing on primary sources made available to scholars only after the archives of the Holy Office were unsealed in 1998 Negotiating Darwin chronicles how the Vatican reacted when six Catholics five clerics and one layman tried to integrate evolution and Christianity in the decades following the publication of Darwin's Origin of Species As Mariano Artigas Thomas F Glick and Rafael A Martinez reconstruct these cases we see who acted and why how the events unfolded and how decisions were put into practice With the long shadow of Galileo's condemnation hanging over the Church as the Scientific Revolution ushered in new paradigms the Church found it prudent to avoid publicly and directly condemning Darwinism and thus treated these cases carefully The authors reveal the ideological and operational stance of the Vatican providing insight into current debates on evolution and religious belief

Modern Art & the Remaking of Human Disposition Emmelyn Butterfield-Rosen, 2021-11-09 How artists at the turn of the twentieth century broke with traditional ways of posing the bodies of human figures to reflect modern understandings of human consciousness With this book Emmelyn Butterfield Rosen brings a new formal and conceptual rubric to the study of turn of the century modernism transforming our understanding of the era's canonical works Butterfield Rosen analyzes a hitherto unexamined formal phenomenon in European art how artists departed from conventions for posing the human figure that had long been standard In the decades around 1900 artists working in different countries and across different media began to present human figures in strictly frontal lateral and dorsal postures The effect both archaic and modern broke with the centuries old tradition of rendering bodies in torsion with poses designed to simulate the human being's physical volume and capacity for autonomous thought and movement This formal departure destabilized prevailing visual codes for signifying the existence of the inner life of the human subject Exploring major works by Georges Seurat Gustav Klimt and the dancer and choreographer Vaslav Nijinsky replete with new archival discoveries Modern Art and the Remaking of Human Disposition combines intensive formal analysis with inquiries into the history of psychology and evolutionary biology In doing so it shows how modern understandings of human consciousness and the relation of mind to body were materialized in art through a new vocabulary of postures and poses

Fernando Pessoa and Philosophy Bartholomew Ryan,Giovanbattista Tusa,Antonio Cardiello,2021-10-21 This pioneering volume explores the extraordinary Portuguese poet Fernando Pessoa 1888 1935 and his relationship to philosophy On the one hand this book reveals Pessoa s serious knowledge of philosophy and playful philosophical explorations and how he has the gift of synthesizing appropriating and subverting complex ideas into his art and on the other hand the chapters shed new light on central aspects and problems of philosophy through the prism of Pessoa s diverse writings The volume includes sixteen new essays from an international group of scholars analyzing Pessoa s multifaceted poetic work alongside philosophical themes and movements from conceptions of time ancient and modern aesthetics philosophy of language transcendentalism immanence and nihilism to Islamic philosophy Indian philosophy Daoism neo paganism and the philosophy of the self The breadth of his work provides a springboard for new thinking on the aesthetic and the spiritual the logic of value and capitalist modernity and ecological thought and postmodernism The volume also includes the most complete English translation of Pessoa s text written by his heteronym lvano de Campos called Notes for the

Memory of my Master Caeiro **Painting the Prehistoric Body in Late Nineteenth-Century France** Sharon Parker,2018-11-19 In late nineteenth century France when Charles Darwin s theories of evolution had finally begun to permeate French culture and society several academic artists turned to a relatively new sub genre of history painting the prehistoric themed subject This artistic interest in Darwin s theories was manifested as paintings and sculptures of prehistoric humanity engaged in physical conflict with each other or other animals struggling for food or hunting all nineteenth century popular understandings of survival of the fittest This book examines how this sub genre captured the imagination of French Salon painters from the 1880s to early 1900s in particular that of Fernand Cormon 1845 1924 one of

the foremost academic painters during the final quarter of the nineteenth century A central argument of this book concerns the unique interpretation of prehistoric humanity that Cormon visualized in his paintings While the vast majority of prehistoric themed images made by his salon colleagues focused on violence combat and sexual conquest Cormon s paintings depict a conflict free humanity in which collaboration and cooperation dominate rather than physical struggle This study probes the French intellectual understanding and appropriation of Darwin s theories and considers how the French mis translation of *The Origin of Species* by Cl mence Auguste Royer the first French translator of the text along with Neo Lamarckism and republican ideology in Third Republic France may have collectively shaped Cormon s representation of early humanity The art press overwhelmingly favored Cormon s visualization of the prehistoric world over that of his Salon peers Through extended analysis of the art criticism concerning Cormon s work Sharon Parker argues that critics very clear preference for Cormon s paintings was rooted in their awareness that he utilized the sub genre of the prehistoric as a forum in which to reimagine and revive academic figurative painting at a time when the critical reception of Salon art had reached its nadir Additionally this study provides a broad overview of the visual models in particular the anthropological and ethnographic texts and imagery most readily available to Cormon as sources for shaping his vision of the prehistoric world
