Swales,2018-10-25 Dialectical behavior therapy DBT is a specific type of cognitive behavioral psychotherapy developed in the late 1980s by psychologist Marsha M Linehan to help better treat borderline personality disorder Since its development it has also been used for the treatment of other kinds of mental health disorders The Oxford Handbook of DBT charts the development of DBT from its early inception to the current cutting edge state of knowledge about both the theoretical underpinnings of the treatment and its clinical application across a range of disorders and adaptations to new clinical groups Experts in the treatment address the current state of the evidence with respect to the efficacy of the treatment its effectiveness in routine clinical practice and central issues in the clinical and programmatic implementation of the treatment In sum this volume provides a desk reference for clinicians and academics keen to understand the origins and current state of the science and the art of DBT *Big and Little Histories* Marnie Hughes-Warrington,Anne Martin,2021-08-19 This book introduces students to ethics in historiography through an exploration of how historians in different times and places have explained how history ought to be written and how those views relate to different understandings of ethics No two histories are the same The book argues that this is a good thing because the differences between histories are largely a matter of ethics Looking to histories made across the world and from ancient times until today readers are introduced to a wide variety of approaches to the ethics of history including well known ethical approaches such as the virtue ethics of universal historians and utilitarian approaches to collective biography writing while also discovering new and emerging ideas in the ethics of history Through these approaches readers are encouraged to challenge their ideas about whether humans are separate from other living and non living things and whether machines and animals can write histories The book looks to the fundamental questions posed about the nature of history making by Indigenous history makers and asks whether the ethics at play in the global variety of histories might be better appreciated in professional codes of conduct and approaches to research ethics management Opening up the topic of ethics to show how historians might have viewed ethics differently in the past the book requires no background in ethics or history theory and is

open to all of those with an interest in how we think about good histories

Cross-Cultural Computing: An Artist's Journey Naoko Tosa, 2016-03-01 This exciting new book explores the relationship between cultural traditions and computers looking at how people from very different cultures and backgrounds communicate and how the use of information technologies can support and enhance these dialogues Historically we developed our understanding of other cultures through traditional means museums printed literature etc but the advent of information technologies has allowed us access to a plethora of material Tosa asks the question Can we understand other cultures using computers as media to supplement thinking and memorization Starting with a survey of art and technology moving into the area of culture and technology the book culminates with a vision of a new world based on an understanding of these relationships allowing cultural creators and viewers the opportunity to reach a better and more profound understanding of the role information technology will play going forward

The Blacksmith & Wheelwright, 1902 Spreading Indra's Net D. T. Suzuki, 2025-08-26 D T Suzuki's 1950s lectures at Columbia University were foundational for the postwar Zen boom Speaking softly in a bookcase lined room Suzuki then in his eighties introduced East Asian Buddhism to a rapt audience of the general public scholars and students He offered a distinctive interpretation of Zen weaving together his understanding of classical Buddhist texts especially the Flower Garland Sutra with Christian mysticism psychology and twentieth century European and American philosophy The freewheeling lectures captivated listeners drawn from the New York intelligentsia and art world including Carolyn Brown John Cage Arthur Danto Sari Dienes Erich Fromm Phillip Guston Ibram Lassaw and Dorothy Norman and catalyzed public interest in Buddhism Spreading Indra's Net presents Suzuki's 1952 1953 lectures in full giving a vivid look at how one of the most important global Buddhist figures of the twentieth century interpreted Zen for an American audience Drawing on archival research in Japan and the United States editor Richard M Jaffe provides an extensive introduction that traces Suzuki's path to Columbia analyzes the content of the lectures and surveys their reception Among the most accessible works of a major figure and a record of a crucial moment in New York history this book displays Suzuki's gifts as a teacher scholar writer and thinker
