Mapping Social Relations A Primer In Doing Institutional Ethnography:

Mapping Social Relations Marie L. Campbell, Frances Gregor, 2004-09-07 This is a book about a distinctive methodological approach inspired by one of Canada's most respected scholars Dorothy Smith Institutional ethnography aims to answer questions about how everyday life is organized What is conventionally understood as the relationship of micro to macro processes is in institutional ethnography conceptualized and explored in terms of ruling relations The authors suggest that institutional ethnographers must adopt a particular research stance one that recognizes that people's own knowledge and ways of knowing are crucial elements of social action and thus of social analysis Specific attention to text analysis is integral to the approach as is a sensitivity to gender relations Institutional ethnography is remarkably well suited to the human service curriculum and the training of professionals and activists Its strategy for learning how to understand problems existing in everyday life appeals to many researchers who are looking for guidance on how to take practical action At the same time the highly elaborated theoretical foundation of institutional ethnography is difficult to deal with in the brief time most students are in the classroom The authors successfully tackle the issue of teaching and applying institutional ethnography Campbell and Gregor have been testing out instructional methods and materials for many years MAPPING SOCIAL RELATIONS is the product of that effort

Floersch, Janet Hoy, 2013 Qualitative methods have become increasingly popular among researchers and while many comprehensive textbooks describe the standard techniques and philosophical assumptions it is often assumed that practitioners are consumers of research and not producers This innovative book describes how qualitative methods can be used to investigate the in vivo use of theory in social work practice It offers not just a comprehensive overview of methods but a concise accessible guide focused on how to study and explicate application of theory and the creative tension that inevitably exists between theory and practice Theory to practice gaps are indispensable conditions for conducting engaged scholarship which in turn promotes collaboration between researchers and practitioners in addressing practice related problems in real world settings Engaged scholarship and critical realist assumptions are applied to three case studies that combine research questions with data collection techniques and analytic strategies Thematic grounded theory and narrative research techniques are all illustrated including original quick start instructions for using ATLAS ti software Institutional ethnography is also presented as a method that is particularly useful for social work practice settings By generating knowledge of practice in open and natural systems qualitative methods can be used to examine how practice is experienced and how interventions may be understood and transformed This cutting edge pocket guide will equip practitioner scholars with the foundation for conducting research that makes a difference
