**A Guide to Spatial History** Konrad Lawson, Riccardo Bavaj, Bernhard Struck, 2022-01-07 This guide provides an overview of the thematic areas analytical aspects and avenues of research which together form a broader conversation around doing spatial history Spatial history is not a field with clearly delineated boundaries For the most part it lacks a distinct unambiguous scholarly identity It can only be thought of in relation to other typically more established fields Indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields Consequently it must be discussed in relation to a variety of historiographical contexts Each of these have their own intellectual genealogies institutional settings and conceptual path

dependencies With this in mind this guide surveys the following areas territoriality infrastructure and borders nature environment and landscape city and home social space and political protest spaces of knowledge spatial imaginaries cartographic representations and historical GIS research      *Literature of Travel and Exploration* Jennifer

Gilbert, 2004-02-12 Tracing the development of cholera mapping from the early sanitary period to the later medical period of which John Snow's work was a key example the book explores how maps of cholera outbreaks residents responses to those maps and the novels of Charles Dickens who drew heavily on this material contributed to an emerging vision of London as a metropolis The book then turns to India the metropole's colonial other and the perceived source of the disease In India the book argues imperial politics took cholera mapping in a wholly different direction and contributed to Britons perceptions of Indian space as quite different from that of home
