Pulmonary Hypertension in the Modern Era: Science and Clinical Practice, Volume II Harm Jan Bogaard, Vinicio De Jesus Perez, Elena Goncharova, 2023-03-09 *Homer's Daughters* Fiona Cox, Elena Theodorakopoulos, 2019-10-03 This collection of essays examines the various ways in which the Homeric epics have been responded to reworked and rewritten by women writers of the twentieth and early twenty first centuries Beginning in 1914 with the First World War it charts this understudied strand of the history of Homeric reception over the subsequent century up to the present day analysing the extraordinary responses both to the Odyssey and to the Iliad by women from around the world The backgrounds of these authors and the genres they employ memoir poetry children's literature rap novels testify not only to the plasticity of Homeric epic but also to the widening social classes to whom Homer appeals and it is unsurprising to see the myriad ways in which women writers across the globe have played their part in the story of Homer's afterlife From surrealism to successive waves of feminism to creative futures Homer's footprint can be seen in a multitude of different literary and political movements and the essays in this volume bring an array of critical approaches to bear on the work of authors ranging from H D and Simone Weil to Christa Wolf Margaret Atwood and Kate Tempest Students and scholars of not only classics but also translation studies comparative literature and women's writing will find much to interest them while the volume's concluding reflections by Emily Wilson on her new translation of the Odyssey are an apt reminder to all of just how open a text can be and of how great a difference can be made by a woman's voice *The Oxford History of Poetry in English* Laura L. Knoppers, 2024-08-08 Beginning with the last years of the reign of Elizabeth I and ending late in the seventeenth century this volume traces the growth of the literary marketplace the development of poetic genres and the participation of different writers in a century of poetic continuity change and transformation The Oxford History of Poetry in English, 2024-08-08 The Oxford History of Poetry in English OHOPE is designed to offer a fresh multi-voiced and comprehensive analysis of poetry from Anglo-Saxon culture through contemporary British Irish American and Global culture including English Scottish and Welsh poetry Anglo-American colonial and post-colonial poetry and poetry in Canada Australia New Zealand the Caribbean India Africa Asia and other international locales OHOPE both synthesizes existing scholarship and presents cutting edge research employing a global team of expert contributors for each of the fourteen volumes By taking as its purview the full seventeenth century 1603-1700 this volume re-draws the existing literary historical map and expands upon recent rethinking of the canon Placing the revolutionary years at the centre of a century of poetic transformation and putting

the Restoration back into the seventeenth century the volume registers the transformative effects on poetic forms of a century of social political and religious upheaval It considers the achievements of a number of women poets not yet fully integrated into traditional literary histories It assimilates the vibrant literature of the English Revolution to what came before and after registering its long term impact It traces the development of print culture and of the literary marketplace alongside the continued circulation of poetry in manuscript It places John Milton Andrew Marvell Margaret Cavendish and Katherine Philips and other mid century poets into the full century of specifically literary development It traces continuity and change imitation and innovation in the full century trajectory of such poetic genres as sonnet elegy satire georgic epigram ode devotional lyric and epic The volume s attention to poetic form builds on the current upswing in historicist formalism allowing a close focus on poetry as an intensely aesthetic and social literary mode Designed for maximum classroom utility the organization is both thematic and in the authors section chronological After a comprehensive Introduction organizational sections focus on Transitions Materiality Production and Circulation Poetics and Form Genres and Poets

The Making of the Sympathetic Imagination Roman Alexander Barton, 2020-07-20 How is it that we feel with fictional characters and so approve or disapprove of their actions For many British Enlightenment thinkers writing at a time when sympathy was the pivot of ethics as well as poetics this question was crucial Asserting that the notion of the sympathetic imagination prominent in Romantic criticism and poetry originates in Moral Sentimentalism this study traces the emergence of what became a key concept of intersubjectivity It shows how contrary to earlier traditions Francis Hutcheson and his disciples successively established the imagination rather than reason as the pivotal faculty through which sympathy is rendered morally effective Writing at the interface of ethics and poetics Adam Smith Lord Kames and others explored the sympathetic imagination as a means of both explaining emotional reader response and discovering moral distinctions As a result the sentimental novel became the sight of ethical controversy Arguing against the dominant view of research which claims that the novel of sensibility is mostly uncritically sentimental the book demonstrates that it is precisely in this genre that the sympathetic imagination is sceptically assessed in terms of its literary and moral potential

Lung Inflammation in Health and Disease, Volume I Yong-Xiao Wang, 2021-03-31 Respiratory diseases are leading causes of death and disability globally with about 65 million people suffering from COPD and 334 million from asthma the most common chronic disease Each year tens of millions of people develop and can die from from respiratory infections such as pneumonia and TB Systemic inflammation may induce and exacerbate local inflammatory diseases in the lungs and local inflammation can in turn cause systemic inflammation There is increasing evidence of the coexistence of systemic and local inflammation in patients suffering from asthma COPD and other lung diseases and the co morbidity of two or more local inflammatory diseases often occurs For example rheumatoid arthritis frequently occurs together with and promotes the development of pulmonary hypertension This co morbidity significantly impacts quality of life and can result in death for those affected Current treatment options for lung

disease are neither effective nor condition specific there is a desperate need for novel therapeutics in the field Additionally the molecular and physiological significance of most major lung diseases is not well understood which further impedes development of new treatments especially in the case of coexistent lung diseases with other inflammatory diseases Great progress has been made in recent years in many areas of the field particularly in understanding the molecular geneses regulatory mechanisms signalling pathways and cellular processes within lung disease as well as basic and clinical technology drug discovery diagnoses treatment options and predictive prognoses This is the first text to aggregate these developments In two comprehensive volumes experts from all over the world present state of the art advances in the study of lung inflammation in health and disease Contributing authors cover well known as well as emerging topics in basic translational and clinical research with the aim of providing researchers clinicians professionals and students with new perspectives and concepts The editors hope these books will also help to direct future research in lung disease and other inflammatory diseases and result in the development of novel therapeutics

Anglo-Chinese Encounters Before the Opium War Xin Liu, 2022-08-12 Anglo Chinese Encounters Before the Opium War A Tale of Two Empires Over Two Centuries studies the fascinating encounters between the two historic empires from Queen Elizabeth I's first letter to the Ming Emperor Wanli in 1583 to Lord Palmerston's letter to the Minister of China in 1840 Starting with Queen Elizabeth I's letter to the Chinese Emperor and ending with the letter from Lord Palmerston to the Minister of China just before the Opium War this book explores the long journey in between from cultural diplomacy to gunboat diplomacy It interweaves the most known diplomatic efforts at the official level with the much unknown intellectual interactions at the people to people level from missionaries to scholars from merchants to travelers and from artists to scientists This book adopts a novel mirror approach by pairing and comparing people texts commodities artworks architecture ideologies operating systems and world views of the two empires Using letters gifts and traded goods as fulcrums and by adopting these unique lenses it puts China into the world history narratives to contextualise Anglo Chinese relations thus providing a fresh analysis of the surviving

evidence Xin Liu casts a new light on understanding the Sino centric and Anglo centric world views in driving the complex relations between the two empires and the reversals of power shifts that are still unfolding today The book is not intended for specialists in history but a general audience wishing to learn more about China s historical engagement with the world

Emerging Developments in the Power and Energy Industry Rodolfo Dufo-López, Jaroslaw Krzywanski, Jai Singh, 2019-10-29 Power and Energy Engineering are important and pressing topics globally covering issues such as shifting paradigms of energy generation and consumption intelligent grids green energy and environmental protection The 11th Asia Pacific Power and Energy Engineering Conference APPEEC 2019 was held in Xiamen China from April 19 to 21 2019 APPEEC has been an annual conference since 2009 and has been successfully held in Wuhan 2009 2011 Chengdu 2010 2017 Shanghai 2012 2014 Beijing 2013 2015 Suzhou 2016 and Guilin 2018 China The objective of APPEEC 2019 was to provide scientific and professional interactions for the advancement of the fields of power and energy engineering APPEEC 2019 facilitated the exchange of insights and innovations between industry and academia A group of excellent speakers have delivered keynote speeches on emerging technologies in the field of power and energy engineering Attendees were given the opportunity to give oral and poster presentations and to interface with invited experts *Critical Visualization* Peter A. Hall, Patricio Dávila, 2022-12-01 Information may be beautiful but our decisions about the data we choose to represent and how we represent it are never neutral This insightful history traces how data visualization accompanied modern technologies of war colonialism and the management of social issues of poverty health and crime The discussion is based around examples of visualization from the ancient Andean information technology of the quipu to contemporary projects that show the fate of our rubbish and take a participatory approach to visualizing cities This analysis places visualization in its theoretical and cultural contexts and provides a critical framework for understanding the history of information design with new directions for contemporary practice

Stress and Environmental Regulation of Gene Expression and Adaptation in Bacteria, 2 Volume Set Frans J. de Bruijn, 2016-09-06 Bacteria in various habitats are subject to continuously changing environmental conditions such as nutrient deprivation heat and cold stress UV radiation oxidative stress dessication acid stress nitrosative stress cell envelope stress heavy metal exposure osmotic stress and others In order to survive they have to respond to these conditions by adapting their physiology through sometimes drastic changes in gene expression In addition they may adapt by changing their morphology forming biofilms fruiting bodies or spores filaments Viable But Not Culturable VBNC cells or moving away from stress compounds via chemotaxis Changes in gene expression constitute the main component of the bacterial response to stress and environmental changes and involve a myriad of different mechanisms including alternative sigma factors bi or tri component regulatory systems small non coding RNA s chaperones CHRIS Cas systems DNA repair toxin antitoxin systems the stringent response efflux pumps alarmones and modulation of the cell envelope or membranes to name a few Many regulatory elements are conserved in different bacteria however there are endless variations on the theme

and novel elements of gene regulation in bacteria inhabiting particular environments are constantly being discovered Especially in pathogenic bacteria colonizing the human body a plethora of bacterial responses to innate stresses such as pH reactive nitrogen and oxygen species and antibiotic stress are being described An attempt is made to not only cover model systems but give a broad overview of the stress responsive regulatory systems in a variety of bacteria including medically important bacteria where elucidation of certain aspects of these systems could lead to treatment strategies of the pathogens Many of the regulatory systems being uncovered are specific but there is also considerable cross talk between different circuits Stress and Environmental Regulation of Gene Expression and Adaptation in Bacteria is a comprehensive two volume work bringing together both review and original research articles on key topics in stress and environmental control of gene expression in bacteria Volume One contains key overview chapters as well as content on one two three component regulatory systems and stress responses sigma factors and stress responses small non coding RNAs and stress responses toxin antitoxin systems and stress responses stringent response to stress responses to UV irradiation SOS and double stranded systems repair systems and stress adaptation to both oxidative and osmotic stress and desiccation tolerance and drought stress Volume Two covers heat shock responses chaperonins and stress cold shock responses adaptation to acid stress nitrosative stress and envelope stress as well as iron homeostasis metal resistance quorum sensing chemotaxis and biofilm formation and viable but not culturable VBNC cells Covering the full breadth of current stress and environmental control of gene expression studies and expanding it towards future advances in the field these two volumes are a one stop reference for non medical molecular geneticists interested in gene regulation under stress Phytochemistry in Corrosion Science

Chandrabhan Verma,Ashish Kumar,Abhinay Thakur,2024-03-27 Phytochemistry in Corrosion Science covers the use of plant extracts phytochemicals in corrosion mitigation with industrial applications It explores innovative and characterization approaches toward the utilization of plant extracts and their phytochemicals as potential corrosion inhibitors for several metals and their alloys Providing a comprehensive overview of the green aspects of plant extracts as corrosion inhibitors this book discusses the preparation of aqueous and organic phase extracts and their advantages disadvantages and use for different aggressive media It also examines aqueous and organic extracts that have been successfully used as corrosion inhibitors for various metals and electrolyte combinations This book will be a useful reference for undergraduate and graduate students and academic researchers in the fields of phytochemistry corrosion science and engineering environmental science chemical engineering green chemistry and mechanical industrial engineering Microbiome and Machine Learning Isabel Moreno Indias,Marcus Claesson,Aldert Zomer,David Gomez-Cabrero,2022-08-02 **A**
