Giardiello,2017-07-05 This book traces the major stages in the evolution of the sociological concept of marginality highlighting in particular the contribution made by Gino Germani Its purpose is to analyse starting with the sociological theory of the early 1960s the progressive maturation of the scientific status of the concept of marginality and to test the theoretical premise that gave rise to Germani s theory of marginality The author begins by examining the contribution of the Chicago School He explores the complex relationship between the theory of marginality and modernization by analysing North American theses and the criticisms mainly generated in Latin America The goal is to reconstruct Germani s theoretical model of marginality addressing its application to contemporary social and economic conditions Giardiello s analysis is intertwined with two themes that are central to Germani s thought about marginality The first concerns the origin of the concept of social exclusion within sociological thought The second shows how marginality is clearly a phenomenology connected to the contradictions of modernity Germani s paradigm of marginality enables the social scientist to resolve the contradictions between the analytical perspectives that deal with marginality in an objective way and the one that observes it subjectively **Revival , Marginality, Migration and Education** Winniefridah Matsa,2020-12-21 This book provides a

Medicine at the Margins Christopher Prener,2022-12-06 Presents a unique view of social problems and conflicts over urban space from the cab of an ambulance While we imagine ambulances as a site for critical care the reality is far more complicated Social problems like homelessness substance abuse and the health consequences of poverty are encountered every day by Emergency Medical Services EMS workers Written from the lens of a sociologist who speaks with the fluency of a former Emergency Medical Technician EMT *Medicine at the Margins* delves deeply into the world of EMTs and paramedics in American cities an understudied element of our health care system Like the public hospital the EMS system is a key but misunderstood part of our system of last resort *Medicine at the Margins* presents a unique prism through which urban social problems the health care system and the struggling social safety net refract and intersect in largely unseen ways Author Christopher Prener examines the forms of marginality that capture the reality of urban EMS work and showcases the unique view EMS providers have of American urban life The rise of neighborhood stigma and the consequences it holds for patients who are assumed by providers to be malingering is critical for understanding not just the phenomenon of non or sub acute patient calls but also why they matter for all patients This sense of marginality is a defining feature of the experience of EMS work and is a statement about the patient population whom urban EMS providers care for daily Prener argues that the pre hospital health care system needs to embrace its role in the social safety net and how EMSs future is in community practice of paramedicine a port of a broader mandate of pre hospital health care By leaning into this work EMS providers are uniquely positioned to deliver on the promise of community medicine At a time when we are considering how to rely less on policing the EMS system is already tasked with treating many of the social problems we think would benefit from less involvement with law involvement *Medicine at the Margins* underscores why the EMS system is so necessary and the ways in which it can be expanded

Principles of Sustainable Soil Management in Agroecosystems Rattan Lal, B.A. Stewart, 2013-06-10. With the use of high level soil management technology, Africa could feed several billion people, yet food production has generally stagnated since the 1960s. No matter how powerful the seed technology, the seedling emerging from it can flourish only in a healthy soil. Accordingly, crop yields in Africa, South Asia, and the Caribbean could be doubled or tripled through adoption of technologies based on laws of sustainable soil management. *Principles of Sustainable Soil Management in Agroecosystems* describes the application of these laws to enhance ecosystem services while restoring degraded soils and promoting sustainable use. With chapters contributed by world class soil scientists, ecologists, and social scientists, this book outlines critical changes in management of agricultural soils necessary to achieve food security and meet the food demands of the present and projected future population. These changes include conversion to no till and conservation agriculture, adoption of strategies of integrated nutrient management, water harvesting, and use of drip sub irrigation, complex cropping, farming systems such as cover cropping and agroforestry, and use of nano enhanced fertilizers. The book is based on the premise that it is not possible to extract more from a soil than what is put into it without degrading its quality. The strategy is to replace what is removed, respond wisely to what is changed, and be pro active to what may happen because of natural and anthropogenic perturbations. The chapters which exemplify these ideas cover a range of topics including organic farming, soil fertility, crop symbiotic soil microbiota, human driven soil degradation, soil degradation and restoration, carbon sink capacity of soils, soil renewal and sustainability, and the marginality principle.

Social Work and Social Problems Gerald Smale, Graham Tuson, Daphne Statham, 2000-02-18. This book describes how social work teams can respond

to social problems in a way that both deals with immediate need and helps build community capacity The authors recognise the need to respond appropriately to crisis where vulnerable children and adults are at risk but argue that an inappropriate response can compound and perpetuate people's problems They suggest that social care organisations need to go beyond operating as aid agencies focusing on the needs of individuals and should increase their development capacity by working with other agencies and citizens to make communities more supportive and inclusive for vulnerable and excluded people
