rigores de la competencia académica o la forma de encajar esos elementos en su condición de mujer son algunas de las facetas que reflejan los extraordinarios escritos reunidos por vez primera en el presente volumen entre los que descuellan la biografía que escribió sobre su marido y una extensa semblanza autobiográfica así como las notas de laboratorio redactadas en los años del descubrimiento del radio y el polonio además de secciones de su diario personal. Estas piezas componen una suerte de Curie confidencial que nos permite conocer de primera mano desde la inmediatez y la intimidad personales algunos episodios decisivos de la ciencia del siglo xx y adentrarnos en los anhelos, conquistas y sentimientos de una mujer pionera en casi todos los frentes. Una vida y una vocación a través de su propia voz. Selección y prólogo de Xavier Roqu. Autor: Marie Curie. 1867-1934. Licenciada en Física y Matemáticas, se doctora en 1903 con un estudio sobre las sustancias radiactivas que la hizo merecedora, junto a su marido Pierre Curie y Henri Becquerel, del Premio Nobel de Física de ese mismo año. Catedrática de Física en La Sorbona, en 1906 recibió un segundo Premio Nobel, en 1911, en esta ocasión de Química por el descubrimiento del radio y el polonio. Junto a su eminente papel científico, su vida tuvo un importante sesgo público y se convirtió en uno de los rostros más célebres de la ciencia de principios del siglo xx. Colaboró activamente en mejorar la atención médica a los heridos en los campos de combate de la Primera Guerra Mundial, fundó en París y en su Varsovia natal instituciones científicas para el estudio de la radiactividad y recibió sobre todo en sus últimos años homenajes y reconocimientos de todo orden, incluido un viaje a los Estados Unidos en 1921. Sus restos reposan en el Panteón de París, con lo que se ha convertido en la primera mujer en recibir semejante honor. La introducción ha sido redactada por Xavier Roqu, profesor de Historia de la Ciencia de la Universitat Autònoma de Barcelona y especialista en la historia de la física del siglo xx, a la que ha dedicado trabajos y ediciones de textos sobre radiactividad, relatividad y mecánica cuántica. *Maria Curie*, Natacha Molina, 1977. **Cronica médico-quirúrgica de la Habana**, 1939. Revista quincenal ilustrada de medicina, cirugía, farmacia y ciencias auxiliares. La vida heroica de María Curie, descubridora del radio, Ève Curie, 1986. **La Vida heroica de María Curie, descubridora del radio**, Eve Curie, 1960. Marie Curie, Sarah Dry, 2021-02-10. Marie Curie, 1867-1934, no solo fue la primera mujer que ganó el Premio Nobel, sino también la única persona que lo ha ganado en dos ocasiones, en 1903 y 1911. Aunque su trabajo fue menospreciado por las instituciones científicas francesas, realizó descubrimientos auténticamente pioneros en el campo de la radiactividad, además de descubrir dos nuevos elementos, el radio y el polonio. En esta conmovedora biografía, la autora ofrece un vívido retrato de una Curie más humana y políticamente comprometida que la imagen típica generalmente extendida del genio aislado. Este libro incluye también un ensayo de Sabine Seifert sobre Irène Joliot-Curie, la menos conocida hija mayor de Marie, colaboradora suya y también galardonada con el Premio Nobel de Química en 1935.
