Therapy offers a rare glimpse into the hearts and minds of the profession's most famous authors, thinkers, and leaders when things aren't going so well. Jeffrey Kottler and Jon Carlson, who include their own therapy mishaps, interview twenty of the world's most famous practitioners who discuss their mistakes, misjudgments, and miscalculations on working with clients. Told through narratives, the failures are related with candor to expose the human side of leading therapists. Each therapist shares with regrets what they learned from the experience, what others can learn from their mistakes, and the benefits of speaking openly about bad therapy.

A History of the Behavioral Therapies William O'Donohue, Deborah Henderson, Steven Hayes, Jane Fisher, Linda Hayes, 2001-04-01. In this unique work, eighteen of the most influential and significant figures in the various subareas of behavior therapy, from behavior analysis through cognitive therapy, are brought together to discuss their work and the sources and influences that affected it. At times moving, profound, and humorous, it casts a new and perhaps more human light on the most influential movement in behavioral health in the latter part of the 20th century. These intellectual biographies range in tone and intensity as each author uses their own particular style to convey their views about the field and their individual impact on it. For those interested in the behavioral and cognitive movement, this book is a must-have since it is the only book to have chronicled the individual histories of the founders of the applied behavioral movement before they are lost forever.
