The Oxford Handbook of Engineering and Technology in the Classical World John Peter Oleson, 2008-01-31 Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to the topics of engineering and technology This volume highlights both the accomplishments of the ancient societies and the remaining research problems and stimulates further progress in the history of ancient technology The subject matter of the book is the technological framework of the Greek and Roman cultures from ca 800 B C through ca A D 500 in the circum Mediterranean world and Northern Europe Each chapter discusses a technology or family of technologies from an analytical

rather than descriptive point of view providing a critical summation of our present knowledge of the Greek and Roman accomplishments in the technology concerned and the evolution of their technical capabilities over the chronological period. Each presentation reviews the issues and recent contributions and defines the capacities and accomplishments of the technology in the context of the society that used it, the available technological shelf and the resources consumed. These studies introduce and synthesize the results of excavation or specialized studies. The chapters are organized in sections progressing from sources written and representational to primary e.g. mining, metallurgy, agriculture and secondary e.g. woodworking, glass production, food preparation, textile production and leather working, production to technologies of social organization and interaction e.g. roads, bridges, ships, harbors, warfare and fortification and finally to studies of general social issues e.g. writing, timekeeping, measurement, scientific instruments, attitudes toward technology and innovation and the relevance of ethnographic methods to the study of classical technology. The unrivalled breadth and depth of this volume make it the definitive reference work for students and academics across the spectrum of classical studies.

The Cambridge Illustrated History of the Roman World Greg Woolf, 2003-11-03 From its mythical foundation in 753 BC to its sack in the fifth century AD, the city of Rome had an impact on the world that it would be hard to overestimate. At its height, the empire which it built up stretched from northern Britain to the deserts of Arabia. In this new history, an international team of historians, archaeologists and classicists presents a vision of the world's most famous imperial power based on the most up-to-date research and discoveries. Chapters and box features present gripping accounts of Roman history and literature and deal with themes ranging from medicine to warfare. They are supported by a rich set of illustrations of sites, monuments and works of art from across the Empire. Read together, these build up a fascinating picture of a civilization permeated by its imperial role and of the colossal costs as well as the gains of empire.

A Cultural History of Bathing in Late Antiquity and Early Byzantium Michal Zytka, 2019-03-28 This book discusses social, religious and medical attitudes towards bathing in Late Antiquity. It examines the place of bathing in late Roman and early Byzantine society as seen in the literary, historical and documentary sources from the late antique period. The author argues that bathing became one of the most important elements in defining what it meant to be a Roman; indeed, the social and cultural value of bathing in the context of late Roman society more than justified the efforts and expense put into preserving bathing establishments and the associated culture. The book contributes a unique perspective to understanding the changes and transformations undergone by the bathing culture of the day and illustrates the important role played by this culture in contributing to the transitional character of the late antique period. In his examination of the attitudes of medical professionals and laymen alike and the focus on its recuperative utility, Zytka provides an innovative and detailed approach to bathing.
