Freedom with a Guide Dog , **Guide Dogs, Australia** Guide Dogs for the Blind Associations of Australia. National Council, J. K. Holdsworth, 1958 Dogs That Know When Their Owners Are Coming Home Rupert Sheldrake, 2011-04-26 With a scientist's mind and an animal lover's compassion world renowned biologist Rupert Sheldrake presents a groundbreaking exploration of animal behavior that will profoundly change the way we think about animals and ourselves How do cats know when it's time to go to the vet even before the cat carrier comes out How do dogs know when their owners are returning home at unexpected times How can horses find their way back to the stable over completely unfamiliar terrain After five years of extensive research involving thousands of people who have pets and work with animals Dr Sheldrake proves conclusively what many pet owners already know there is a strong connection between humans and animals that defies present day scientific understanding Sheldrake compellingly demonstrates that we and our pets are social animals linked together by invisible bonds connecting animals to each other to their owners and to their homes in powerful ways His provocative ideas about these social or morphic fields explain the uncanny behavior often observed in pets and help provide an explanation for amazing animal behavior in the wild such as migration and homing *Dogs That Know When Their Owners Are Coming Home* not only provides fascinating insight into animal and human behavior but also teaches us to question the boundaries of conventional scientific thought and shows that the very animals who are closest to us have much to teach us about biology nature and consciousness **Working Dogs: Form and Function, Volume II** Cynthia M.
