

THE ACIDIC ENVIRONMENT

What is this topic about?

To keep it as simple as possible, (K.I.S.S.) this topic involves the study of:

1. ACIDS, BASES & INDICATORS
2. ACIDS IN OUR ENVIRONMENT
3. ACIDS & THE pH SCALE
4. ACID-BASE THEORY & TITRATION
5. ESTERIFICATION

...all in the context of Chemistry in our environment and society

but first, an introduction...

Way back in years 8, 9 and 10 you would have studied some basic Chemistry and it probably involved studying acids and bases and indicators... so these are familiar terms, even if you've forgotten the details.

This topic begins by reminding you of this simple way to classify all chemical substances:

**Acid,
Base,
or Neutral**

and how "Indicators"
can be used to identify them.

Then, we look at the
Chemistry of Oxide Compounds,
and link that to **Acidity.**

You will study the sources
and problems that can
result from

**Acids in the
Environment**

and, revise & practice

**Mole
Calculations**

The details of Acid-Base Reactions will be studied

...and you will learn the real meaning of the
pH scale, used for measuring acid
and base strength.

$$\text{pH} = -\log[\text{H}^+]$$

Along the way you will learn
some important techniques in
Chemical Analysis

and a process you might never
have heard of before,
but it is common in nature and
in the Chemical Industry:
Esterification
