Community Development Approaches to Improving Public Health Robert

Ogilvie,2013-09-13 As the rates of chronic diseases like diabetes asthma and obesity skyrocket research is showing that the built environment the way our cities and towns are developed contributes to the epidemic rates of these diseases It is unlikely that those who planned and developed these places envisioned these situations Public health community development planning and other fields influencing the built environment have operated in isolation for much of recent history with the result being places that public health advocates have labelled designed for disease The sad irony of this is that planning and public health arose together in response to the need to create health standards zoning and building codes to combat the infectious diseases that were prevalent in the industrializing cities of late nineteenth and early twentieth century America In recent years the dramatic rise in chronic disease rates in cities and towns has begun to bring public health and planning back together to promote development pattern and policies facilitating physical activity and neighbourly interactions as antidotes In this book a number of such community development efforts are highlighted bringing attention to the need to coordinate planning community development and health policy This book was originally published as a special issue of Community Development

Cooperatives and Community Development Vanna Gonzales,Rhonda
