The Power of Potential Tom D'Eri, 2023-01-24 A powerful game changing book Tom's approach is changing lives Seth Godin Author of *This is Marketing* Discover how supporting employment for people with autism unlocked new ways of running a business and revealed transformative lessons for all of us

Rising Tide Car Wash in Parkland Florida isn't average in any way When Tom D'Eri and his father John bought the location in 2013 they wanted to create employment opportunities for workers with autism Like 1 in 54 Americans Tom's brother Andrew has autism and he was facing lifelong unemployment So the family set out on a mission to provide professional opportunities for people like Andrew starting with one car wash Now it's one of the highest volume washes in Florida Its employee retention rate is five times that of its competitors It has spun off into two additional locations that have been immediately successful and the business is absurdly profitable

The Power of Potential tells the inspiring surprising reason why The wash's excellence isn't in spite of their unusual workforce but because of it Thanks to their neurodivergent staff the Rising Tide team was able to discover and correct common problems that typically fly under the radar in businesses including You hire based on interviews You think great talent is the secret to a great business Your managers are good enough You fire your worst employees By spotting and correcting these hidden problems any business with any kind of workers can achieve unexpected wins and leave average behind At Rising Tide solving these problems resulted in four unexpected wins that added up to a culture of excellence Every employee felt safe Accountability became a tool for growth Everyone's work gave them a sense of purpose Customers loved their experience

Original Sin Bleddyn E. Bowen, 2023-01-01 Space technology was developed to enhance the killing power of the state The Moon landings and the launch of the Space Shuttle were mere sideshows drawing public attention away from the real goal military and economic control of space as a source of power on Earth Today as Bleddyn E Bowen vividly recounts thousands of satellites work silently in the background to provide essential military intelligence and economic capabilities No major power can do without them Beyond Washington Moscow and Beijing truly global technologies have evolved from the ground floor of the nuclear missile revolution to today's orbital battlefield shaping the wars to come World powers including India Japan and Europe are fully realizing the strategic benefits of commanding Earth's cosmic coastline as a stage for war development and prestige Yet as new contenders spend more and more on outer space there is scope for

cautious optimism about the future of the Space Age if we can recognize rather than hide its original sin
