Turpin, Derrick Knight, 2011-01-15 A fascinating history of seven Victorian London cemeteries works of art created as much for the living as they were for the dead      Necropolis Catharine Arnold, 2008-10-15 From Roman burial rites to the horrors of the plague from the founding of the great Victorian cemeteries to the development of cremation and the current approach of metropolitan society towards death and bereavement including more recent trends to displays of collective grief and the cult of mourning such as that surrounding the death of Diana Princess of Wales **NECROPOLIS LONDON AND ITS DEAD** offers a vivid historical narrative of this great city's attitude to going the way of all flesh As layer upon layer of London soil reveals burials from pre historic and medieval times the city is revealed as one giant grave filled with the remains of previous eras pagan Roman medieval Victorian This fascinating blend of archaeology architecture and anecdote includes such phenomena as the rise of the undertaking trade and the pageantry of state funerals public executions and bodysnatching Ghoulishly entertaining and full of fascinating nuggets of information Necropolis leaves no headstone unturned in its exploration of our changing attitudes to the deceased among us Both anecdotal history and cultural commentary Necropolis will take its place alongside classics of the city such as Peter Ackroyd's **LONDON**      Greater London Nick Barratt, 2012-11-15 London's suburbs may stretch for well over 600 square miles but in historical accounts of the capital they tend to take something of a back seat In Greater London historian Nick Barratt places them firmly centre stage tracing their journey from hamlets and villages far out in the open countryside to fully fledged urban enclaves simultaneously demonstrating the crucial role they have played in the creation of today's metropolis Starting in the first century AD he shows how the tiny settlements that grew up in the Thames Valley gradually developed and how they were shaped by their proximity to the city He describes the spread of the first suburbs beyond the city walls and traces the ebb and flow of population as people moved in to find jobs or away to escape London's noise and bustle He charts the transformation wrought by the coming of the railways the fight to preserve Hampstead Heath Epping Forest and other green spaces and the struggle to create a London wide form of government He gives an account of wartime destruction and peacetime reconstruction and then brings the story to the present with a description of the very varied nature of today's suburbs and their inhabitants In the process he evokes Tudor Hackney and Georgian Hampton explains why Victorian Battersea and Finchley were so different from one another and follows Islington's fall from grace and subsequent recovery Magnificently illustrated throughout with contemporary engravings and photographs this is the essential history for anyone who has ever lived in London      Imagining the Dead in British Literature and Culture, 1790-1848 David McAllister, 2018-09-29 This book offers the first account of the dead as an imagined community in the early nineteenth century It examines why Romantic and Victorian writers including Wordsworth Dickens De Quincey Godwin and D Israeli believed that influencing the imaginative conception of the dead was a way to either advance or resist social and political reform This interdisciplinary study contributes to the burgeoning field of Death Studies by drawing on the work of both canonical and lesser known writers

reformers and educationalists to show how both literary representation of the dead and the burial and display of their corpses in churchyards dissecting rooms and garden cemeteries responded to developments in literary aesthetics psychology ethics and political philosophy *Imagining the Dead in British Literature and Culture 1790-1848* shows that whether they were lauded as exemplars or loathed as tyrants rendered absent by burial or made uncannily present through exhumation and display the dead were central to debates about the shape and structure of British society as it underwent some of the most radical transformations in its history *The Moment of Death in Early Modern Europe, c. 1450-1800* Benedikt Brunner, Martin Christ, 2024-05-06 Both in our time and in the past death was one of the most important aspects of anyone's life The early modern period saw drastic changes in rites of death burials and commemoration One particularly fruitful avenue of research is not to focus on death in general but the moment of death specifically This volume investigates this transitional moment between life and death In many cases this was a death on a deathbed but it also included the scaffold battlefield or death in the streets Contributors Friedrich J Becher Benedikt Brunner Isabel Casteels Martin Christ Louise Deschryver Irene Dingel Michael Green Vanessa Harding Sigrun Haude Vera Henkelmann Imke Lichterfeld Erik Seeman Elizabeth Tingle and Hillard von Thiessen
