[The Art of Longsword Fighting](#) Benjamin J. Smith, 2021-09-30 The teaching of Historical European Martial Arts has widespread appeal with numerous clubs in many countries However comparatively few people who run their own club have qualifications that would make them an instructor in traditional martial arts organizations Even those with such qualifications lack in depth cohesive resources for teaching a given style often because they can only work from incomplete sources Thus the need for a book which is grounded in exhaustive research into historical teaching methods and in particular focusing on the specific style of Sigmund Ringeck who was himself a teacher of fighting arts in the late 14th century or the early or mid 15th century In *The Art of Longsword Fighting* Benjamin J Smith therefore offers the broader information necessary for teachers of historical swordsmanship to deliver courses based on original authentic techniques This includes the various cutting methods the role of competition in learning these arts the mechanics of the interpretive process and insights into how to use a wide range of activities to enhance students experience All of this is achieved through a panoply of photographs showing each move along with explanatory diagrams as well as detailing how and when to introduce each next

step in a manner that is faithful to Ringeck's style. There is no current literature available which demonstrates how each move should be undertaken and most importantly why each step should be taken in the sequences described. There is no doubt that a book of this nature has been long awaited and will be welcomed by instructors and students alike as well as those general readers interested in fencing and the longsword of the Renaissance period.

The Medieval Longsword Neil Grant, 2020-06-25. The formidable European longsword featuring a double edged straight blade in excess of 40in and capable of being used with one or both hands remains one of the most impressive and distinctive edged weapons of the late medieval era. Also known as the bastard sword and the hand and a half sword, the longsword evolved from the war swords and great swords of the 14th century and emerged as a battlefield weapon in the early stages of the Hundred Years War. It went on to become a key weapon on the battlefields of late medieval Europe creating a new system of sword fighting. Drawing together period sources, modern technical analysis and his own experiences with the longsword, Neil Grant explores the origins, manufacture and evolving use of this iconic late medieval edged weapon. Illustrated throughout with specially commissioned full colour artwork and an array of period illustrations and close up photographs, this is the enthralling story of one of late medieval Europe's most distinctive and deadly close combat weapons.
