Lorenzo Renzi Introduzione Alla Filologia Romanza:

A new companion to the Romance languages Martin Glessgen, 2024-09-03 The Romance languages offer unique potential for empirical analysis and methodological innovation within the vast field of linguistics due to the survival of a large body of historical documentation the rich diversity of dialects and languages and the exceptional quality of the research undertaken to date However these same factors have led to an ever increasing volume of material available for study requiring the establishment of a shared canonical knowledge base This companion offers a balanced overview of the core subjects and the methodology which make up the field of Romance linguistics It provides a solid foundation in the discipline as well as easy and convenient access to highly specialised areas of research by means of systematic references to the latest handbooks and encyclopedias The companion is designed to be read from cover to cover or to be consulted for information on specific topics Advanced students early career researchers lecturers specialists of other languages philologists and historians alike will all benefit from this accessible and up to date reference work as it enables readers to contextualise any knowledge of the discipline they may already possess *The History of Linguistics in Italy* Paolo Ramat, Hans-Josef Niederehe, E.F.K.

Koerner, 1986-01-01 This volume brings together the papers published in *Historiographia Linguistica* 9 3 1982 which was devoted to the history of linguistics in Italy with Marazzini's paper first published in *Historiographia Linguistica* 10 1 2 1983 and an original article by Franco Lo Piparo expressly written for this volume The present volume provides in addition an index of subjects as well as an index of names which supplies bio bibliographical references to authors discussed Nuova introduzione alla filologia romanza Lorenzo Renzi, Giampaolo Salvi, 1985 **The Cambridge History of the Romance**

Languages: Volume 2, Contexts Martin Maiden, John Charles Smith, Adam Ledgeway, 2013-10-24 What is the origin of the Romance languages and how did they evolve When and how did they become different from Latin and from each other Volume 2 of *The Cambridge History of the Romance Languages* offers fresh and original reflections on the principal questions and issues in the comparative external histories of the Romance languages It is organised around the two key themes of influences and institutions exploring the fundamental influence of contact with and borrowing from other languages including Latin and the cultural and institutional forces at work in the establishment of standard languages and norms of correctness A perfect complement to the first volume it offers an external history of the Romance languages combining data and theory to produce new and revealing perspectives on the shaping of the Romance languages

Information Structure and its Interfaces Lunella Mereu, 2009-02-26 The volume presents recent results in the field of Information Structure based on research on Italian and Italian dialects and on further studies on several typologically different languages The central idea is that Information Structure is not an exclusive matter of syntax but an interface issue which involves the interplay of at least the phonological morpho syntactic and semantic pragmatic levels of analysis In addition the volume is based on the study of actual language use and it adopts a cross linguistic point of view

Discourse-Related Features and Functional Projections Silvio Cruschina, 2012-01-13 In this volume Silvio Cruschina uses a comparative analysis to determine the syntax of the functional projections associated with discourse related features and to account for the marked word orders found in Romance particularly in the fronting phenomena Several language specific analyses of discourse related phenomena have been proposed in the literature including studies on the notions of topic and focus in Romance but the lack of a uniform definition of these notions together with different assumptions in relation to the triggering features has led to the perception that the Romance languages show many distinct and heterogeneous properties with respect to dislocation and fronting constructions This volume is intended to complement the existing literature by integrating recent work on the topic and by emphasizing original and unifying reflections that combine and coordinate diverse elements Cruschina's investigations clarify fundamental notions such as topic focus and contrast drawing on new data from Sicilian Sardinian and other Romance varieties

Functional Heads Laura Brugé, 2012-06-20 The cartographic project considers evidence for a functional head in one language as evidence for it in universal grammar In this volume some of the most influential linguists who have participated in this long lasting debate offer their recent work in short self contained case studies

Functional Heads, Volume 7 Laura Brugé, Anna Cardinaletti, Giuliana Giusti, Nicola Munaro, Cecilia Poletto, 2012-06-20 Over the last two decades functional heads have been one of the privileged objects of research in generative linguistics However within this line of inquiry two alternative approaches have developed while the cartographic project considers crosslinguistic evidence as crucial for a complete mapping of functional heads in universal grammar minimalist accounts tend to consider structural economy as literally involving a reduction in the number of available heads In this volume some of the most influential linguists who have participated in this long lasting debate offer their recent work in short self contained case studies The contributions cover all the main layers of recently studied syntactic structure including such major areas of empirical research as grammaticalization and language change standard and non standard varieties interface issues and morphosyntax Functional Heads attempts to map aspects of syntactic structure according to the cartographic approach and in doing so demonstrates that the differences between cartography and minimalism are perhaps more superficial than substantial

Proto-Indo-European Syntax and its Development Leonid Kulikov, Nikolaos Lavidas, 2015-07-15 Although for some scholars the very possibility of syntactic reconstruction remains dubious numerous studies have appeared reconstructing a variety of basic elements of Proto Indo European syntax based on evidence available particularly from ancient and/or archaic Indo European languages The papers in this volume originate from the Workshop PIE Syntax and its Development Thessaloniki 2011 which aimed to bring together scholars interested in these problems and to shine new light on current research into ancient Indo European syntax Special attention was paid to the development of the hypothetical reconstructed features within the documented history of Indo European languages The articles in this volume were originally published in the Journal of Historical Linguistics Vol 3 1 2013

Theoretical Analyses on Romance Languages José Lema, Esthela Treviño, 1998-07-15 From the papers presented at the 26th LSRL this volume offers a selection of contributions on phonological issues and on syntax Most of the grammatical phenomena discussed are treated within the frameworks of the Minimalist Program Distributed Morphology or Optimality Theory It was apparent from the diversity of the papers delivered that these approaches are exposing novel phenomena which enrich and widen our knowledge and understanding of language The analyses undertaken in these articles range over a variety of dialects of Romance languages
