Maonomics Why Chinese Communists Make Better Capitalists Than We Do:

Maonomics Loretta Napoleoni, 2011-10-04 The end of the cold war was thought to signal the triumph of Western capitalism over Communism In *Maonomics Why Chinese Communists Make Better Capitalists than We Do* Napoleoni argues just the opposite what we are witnessing instead is the beginning of the collapse of capitalism and the victory of communism with a profit motive *Maonomics* charts the prodigious ascent of the Chinese economic miracle and the parallel course of the West's ongoing insistence on misconstruing China and its economy even as we acknowledge its growing influence and importance *Maonomics* is a warning call whereby Western governments can avoid economic collapse by learning how to understand more clearly what the lessons of the Chinese economy really are Based on first hand reporting from China during frequent visits in the last several years *Maonomics* lends credence to the Chinese view and translates it for Western readers For example the Chinese too are attached to their vision of democracy but it is different from ours It isn't focused as much on voting as it is economic opportunity and the fair distribution of wealth and prosperity Napoleoni also separates failed Leninist political ideology from true Marxist theory showing that Marx's writings do not reject profit so long as it is used to benefit the people Marx's dictatorship of the proletariat is being realized in China she argues where giant steps forward are being made in the name of progress and the wellbeing and prosperity of the Chinese people Looking at the Chinese economy up close any economist would be hard pressed to say that they are not on the right track Here Loretta Napoleoni offers a front row seat on the greatest show on earth the peaceful economic revolution that is shifting the balance of power in the world from West to East

The Spectacle of Disintegration McKenzie Wark, 2013-03-12 Following his acclaimed history of the Situationist International up until the late sixties *The Beach Beneath the Street* McKenzie Wark returns with a companion volume which puts the late work of the Situationists in a broader and deeper context charting their contemporary relevance and their deep critique of modernity Wark builds on their work to map the historical stages of the society of the spectacle from the diffuse to the integrated to what he calls the disintegrating spectacle *The Spectacle of Disintegration* takes the reader through the critique of political aesthetics of former Situationist T J Clark the Fourierist utopia of Raoul Vaneigem Ren Vienet's earthy situationist cinema Gianfranco Sangunetti's pranking of the Italian ruling class Alice Becker-Ho's account of the anonymous language of the Romany Guy Debord's late films and his surprising work as a game designer At once an extraordinary counter history of radical praxis and a call to arms in the age of financial crisis and the resurgence of the streets *The Spectacle of Disintegration* recalls the hidden journeys taken in the attempt to leave the twentieth century and plots an exit from the twenty first The dustjacket unfolds to reveal a fold out poster of the collaborative graphic essay combining text selected by McKenzie Wark with composition and drawings by Kevin C Pyle

[Rights, Rivers and the Quest for Water Commons: The Case of Bangladesh](#) Imtiaz Ahmed, 2021-04-09 Right to water may sound novel and somewhat dramatic yet it has been central to the quest of human civilization for thousands of years One of the earliest references to

water as common property can be found in the Jewish laws as early as 3000 BCE. Similar views are also found in Islam. In fact, the Arabic word for Islamic law, *shari'ah*, originally meant the place from which one descends to water. Since water is a gift from the divine to all living beings, sharing water is regarded as a holy duty. This is found across religions, regions, societies, and communities from New Zealand to Nigeria, from Bangladesh to Brazil. But then what transformed the divine sanction? What led to the negation of the commons with sharing of the riverine water across territorial boundaries, suffering the most? The answer probably lies as much as in the politics of safeguarding one's personal or national interests as it is in the limitations imposed by our disciplinary understanding of things. In this context, a thorough reexamination, even reconceptualization of some of the core issues is required. Firstly, the concept of water needs to be understood not as H₂O as it is done in physical sciences but as H₂O-P₄. That is, the meaning of water in social sciences must include not only twice hydrogen plus oxygen but also four P's: pollution, power, politics, and profit. This is not to discount the science in the conceptualization of water but rather to add elements central to social sciences. Secondly, the concept of river needs to be redefined and understood not as a carrier of water as assumed in most of the Western languages but as *nadi*, a flow consisting of *prana* (life), *shakti* (power), and *atman* (soul) as etymologically defined in most of the South Asian languages. This comes closer to what critical hydrologists would say. WEBS, that is, a river consists of water, energy, biodiversity, and sediment. In this light, any fragmentation of transboundary river water in the name of sharing becomes an unworkable option unless, of course, a mechanism is found to share the water of the river along with its energy, biodiversity, and sediment, and that again without distorting and harming the life of the river. Thirdly, the subject of water commons needs to be approached from the standpoint of rights of both human and river. This is to flag the notion that nature, including rivers, has rights just like humans, although their manifestations may be different. In fact, empowered humans, particularly those in control of the state, have more responsibility than rights in dissuading themselves and others from creating conditions of human wrongs, not only against fellow human beings but also against nature. Finally, if the rights of humans are to be ensured, then there is an urgent need to reconceptualize and mainstream the human as a multiverse being. This is because humans are not only political beings but also economic, cultural, ecological, technological, and psychological beings. In this light, if conflicts are to be contained, then humans need to be empowered in all possible areas of life: politics, economics, ecology, culture, technology, and psychology. This would certainly require empowering each and every person, all at the same time, receptive to nature in general and rivers in particular. The book is designed to initiate a discourse on the civilizational quest for water commons, indeed with the expectation that a discussion on rights and rivers would lead to a creative flow of ideas and practices.

Self-Determination & Constitution Making in Nepal

Surendra Bhandari, 2014-04-28. This book systematically analyzes why constitutions do not survive in Nepal despite sixty years of constitutional history. The author discusses the epistemology of ethnic federalism in Nepal and examines the challenges of nation building and post-nation constitutionalism. The work addresses the connection

between ethnic identity right to self determination constitution making and state restructuring offering possible ways forward for Nepal Chapters consider lessons to be drawn from the past and examine reasons for the abolition of monarchy in Nepal The book highlights the major problems that the first elected Constituent Assembly CA faced in promulgating a new constitution before it was dissolved in 2012 The concept of right to self determination and its complexities at the domestic level are all explored along with ways forward to address the problem of constitutionalism ethnic federalism and democracy The author offers solutions as to how the second CA could address problems to promulgate a new constitution The book elaborates on the role that constitutionalism plays in constitution making and the survival of a constitution Scholars of politics and international studies policy makers and those with an interest in law and constitution in Asia will all find this work of interest

State-Society Relations and Governance in China Sujian Guo,2014-07-09 State society relations and governance are closely related areas of study and have become important topics in the social sciences in the past decades not only in developed countries but also in the developing world In China state society relations have been changing in the new era of reform and opening and governance has become a central concern in policy practice and in academia In this wide ranging collection of essays written by scholars from both inside and outside China the contributors explore the complexity of the changing state society relationship and the modes and practices of governance in China by combining theoretical exploration and empirical case studies

Creative Industries in China Michael Keane,2013-05-06 Creative industries in China provides a fresh account of China s emerging commercial cultural sector The author shows how developments in Chinese art design and media industries are reflected in policy in market activity and grassroots participation Never has the attraction of being a media producer an artist or a designer in China been so enticing National and regional governments offer financial incentives consumption of cultural goods and services have increased creative workers from Europe North America and Asia are moving to Chinese cities culture is increasingly positioned as a pillar industry But what does this mean for our understanding of Chinese society Can culture be industrialised following the low cost model of China s manufacturing

economy Is the national government really committed to social liberalisation This engaging book is a valuable resource for students and scholars interested in social change in China It draws on leading Chinese scholarship together with insights from global media studies economic geography and cultural studies

China's Transition from Communism - New Perspectives Guoguang Wu, Helen Lansdowne, 2015-11-06 As China moved from a planned to a market economy many people expected that China's political system would similarly move from authoritarianism to democracy It is now clear however that political liberalisation does not necessarily follow economic liberalisation This book explores this apparent contradiction presenting many new perspectives and new thinking on the subject It considers the path of transition in China historically makes comparisons with other countries and examines how political culture and the political outlook in China are developing at present A key feature of the book is the fact that most of the contributors are China born Western trained scholars who bring deep knowledge and well informed views to the study

Southern China Marco R. Di Tommaso, Lauretta Rubini, Elisa Barbieri, 2013-05-07 By concentrating on one of the key locations of global manufacturing this volume offers a contribution to contemporary industry studies The rates of growth that have characterized the southern Guangdong province in the last three decades are unique even with respect to the more general and often cited Chinese experience But what role have governments played in these decades of growth What are the aims and tools of industrial policies promoted in this core location of contemporary manufacturing And what are the implications of the Guangdong experience of growth for the international debate on contemporary industry Referencing the international debate on industrial development specialized Chinese academic literature official government documents statistics and in depth fieldwork this book offers unique view on the complex set of long term national and local government plans and policies that have gone hand in hand with the last three decades of impressive change in this highly industrialized region In this framework local industrial development policy innovation policy and migration policy are carefully analyzed as three of the main strategic interventions selected by government authorities to promote the desired gradual structural change and technological upgrading in industry This book will be of interest to students and scholars of Chinese studies economics and business development policy and industrial policy Furthermore the volume presents stimulating material for both policy makers and entrepreneurs

The United States' Residual Hegemony Rashad Seedeem, 2023-06-16 This book investigates the hegemony of the USA by examining the Obama Trump and Biden administrations responses to major global crises Combining a Gramscian framework with the main features of complexity theory it provides a comprehensive account of the systemic crisis of the hegemonic order of the United States in security environmental and economic issue areas By examining key case studies the author reveals that the hegemonic responses of the US were confronted by overt challenges including emerging state and non state actors globally complex transnational flows and a combative domestic political climate which undermined the United States role in multilateral institutions no longer fit for purpose This book will be of

interest to general readers as well as scholars and students of US foreign policy global politics and Gramscian theory

Neue Bücher und Aufsätze in der Bibliothek Germany. Bundestag. Bibliothek,2012 Communists constructing capitalism Julian Gruin,2019-07-04 Why has China's transition to a market economy not catalysed corresponding political transformation In an era of deepening synergy between authoritarian politics and capitalist economics this book offers a novel perspective on this central dilemma of contemporary Chinese development shedding light on how the Chinese Communist Party achieved rapid economic growth while preserving political stability Drawing on extensive fieldwork and over sixty interviews with policymakers bankers and former party and state officials the book delves into the role of China's state owned banking system since 1989 showing how political control over capital has been central to the country's experience of capitalist development It challenges existing state market paradigms of political economy and reveals the Eurocentric assumptions underpinning liberal perspectives towards Chinese authoritarian resilience **The Capitalist Dilemma in China's Communist Revolution** Sherman Cochran,2014 How can capitalists motivations during a Communist revolution be reliably documented and fully understood Up to now the answer to this question has generally eluded scholars who for lack of nonofficial sources have fallen back on Communist governments official explanations But the essays in this volume confirm that at least in the case of the Communist revolution in China it is finally possible to make new and fresh interpretations By focusing closely on individuals and probing deeply into their thinking and experience the authors of these essays have discovered a wide range of reasons for why Chinese capitalists did or did not choose to live and work under communism The contributors to this volume have all concentrated on the dilemma for capitalists in China's Communist revolution But their approach to their subject through archival research and rigorous analysis may also serve as a guide for future thinking about a variety of other historical figures This approach is well worth adopting to explain how any members of society not only capitalists have resolved comparable dilemmas in all revolutions the ones in China Russia Vietnam Cuba or anywhere else **The Chinese Road to Socialism** Edward Lawrence Wheelwright,Bruce J. McFarlane,1970 Essay on the role of socialist ideology and the human factor in the economic development of China in the light of the social movement for cultural change provides a detailed exposition and analysis of how through the cultural revolution an attempt is being made to shape Chinese society in the image of communist ideals rather than to let communist ideals be overwhelmed by the pressures of traditional social structure References *Capitalism and Inequality in China* Maximilian Wilms,2015-12-04 Essay from the year 2012 in the subject Asian studies grade 8 10 language English abstract Nowadays the world's economical political and social systems are ruled by the common concept of capitalism Its definition varies depending on historical and political periods in societies which allows some negative aspects pointed out The current situation presents a high rate of disparity 6% of the world population own 52% of the global assets Thus it gives rise to analyze the possible connections between capitalism and inequality As an example in China we can observe a certain count of phenomena which

completely upset the economy of this country Since the transition from planned economy to a free market system in the 1970s China's economic growth is about 9 per cent annual and the country's GDP represents 13 per cent of the global output As capitalism is considered as the best economic system for modern societies in as much as it seems to be the most productive and efficient noteworthy behind this visible global opening very big spatial disparities exist Between 1980 and 2005 the inequality in China grew with double speed than in the U S At the present time China is one of the most unequal societies in Asia Indeed China opted for a growth model spatially unbalanced by hoping that by the effects of pouring the rest of the country could benefit in his turn from this development However the positive effects of the economy limited to the coastal provinces which became the engine of the Chinese growth How can one explain that China one of the former most egalitarian states in the world is in a dangerous area of inequality To answer this question one must have a look at the changes from Mao Zedong era to the current shift towards capitalist economy by focusing on the causes of this evident disparity e g the gap between the urban and rural areas and the ongoing process of state capitalism The author of this text is not a native speaker *The Economy of China* Shu Shin Luh, 2014-09-02 What would China's revolutionary leader Mao Zedong think if he were alive today Mao's Chinese Communist Party continues to hold a monopoly on political power and at its core China remains a developing nation But in many respects today's China bears little resemblance to the country that emerged under Mao's leadership after 1949 Most important today's People's Republic of China is Communist in name only Rapid economic liberalization has brought capitalism and unprecedented prosperity to the world's most populous country Farmers once the backbone of China's economy are taking a backseat to the entrepreneurs who make millions exporting low cost sophisticated computer chips and flat screen televisions to the rest of the world The sleeping giant as one prominent economist described it has awakened and the rest of the world can no longer ignore its presence and its potential How did this transformation come about This book takes an in depth look at that question and examines the future prospects for China in the global economy *Will China Go "capitalist"?* Steven N. S. Cheung, 1982 **The Mandate of Heaven** Nigel Harris, 1978 **Towards Capitalist Restoration?** Michel Chossudovsky, 1986-01-01 **The Chinese Economy Under Communism** Nai-ruenn Chen, Walter Galenson, 1969 Study of the economic structure and economic development of China under the communist collective economy system covers economic policy formulation the role of USSR in industrial development the industrial structure agriculture population growth and employment economic administration the standard of living the economic aid programme trade relations etc and includes a comparison based on statistical tables of economic growth in India and China p r Bibliography pp 230 to 239
