**Open Source Approaches in Spatial Data Handling** Brent Hall, Michael G. Leahy, 2008-09-27 The role open source geospatial software plays in data handling within the spatial information technology industry is the overarching theme of the book. It also examines new tools and applications for those already using OS approaches to software development. *Best Practices for Managing Geospatial Data*, GeoComputation, Second Edition Robert J. Abrahart, Linda M. See, 2014-06-23 A revision of Openshaw and Abrahart's seminal work *GeoComputation* Second Edition retains influences of its originators while also providing updated state of the art information on changes in the computational environment. In keeping with the field's development this new edition takes a broader view and provides comprehensive coverage across the field of *GeoComputation*. See What's New in the Second Edition Coverage of ubiquitous computing the GeoWeb reproducible research open access and agent based modelling Expanded chapter on Genetic Programming and a separate chapter developed on Evolutionary Algorithms Ten chapters updated by the same or new authors and eight new chapters added to reflect state of the art. Each chapter is a stand alone entity that covers a particular topic. You can simply dip in and out or read it from cover to cover. The opening chapter by Stan Openshaw has been preserved with only a limited number of minor essential modifications having been enacted. This is not just a matter of respect. Openshaw's work is eloquent prophetic and his overall message remains largely unchanged. In contrast to other books on this subject *GeoComputation* Second Edition supplies a state of the art review of all major areas in *GeoComputation* with chapters written especially for this book by invited specialists. This approach helps develop and expand a computational culture one that can exploit the ever increasing richness of modern geographical and geospatial datasets. It also supplies an instructional guide to be kept within easy reach for regular access and when need arises. *GeoComputation* Robert J. Abrahart, Linda M. Geocomputation with R Robin Lovelace, Jakub Nowosad, Jannes Muenchow, 2019-03-22 Geocomputation with R is for people who want to analyze, visualize, and model geographic data with open source software. It is based on R, a statistical programming language that has powerful data processing, visualization, and geospatial capabilities. The book equips you with the knowledge and skills to tackle a wide range of issues manifested in geographic data, including those with scientific, societal, and environmental implications. This book will interest people from many backgrounds, especially Geographic Information Systems (GIS) users interested in applying their domain specific knowledge in a powerful open source language for data science, and R users interested in extending their skills to handle spatial data. The book is divided into three parts: I Foundations aimed at getting you up to speed with geographic data in R; II extensions which covers advanced techniques; and III applications to real world problems. The chapters cover progressively more advanced topics, with early chapters providing strong foundations on which the later chapters build. Part I describes the nature of spatial datasets in R and methods for manipulating them. It also covers geographic data import/export and transforming coordinate reference systems. Part II represents methods that build on these foundations. It covers advanced map making, including web mapping, bridges to GIS, sharing reproducible code, and how to do cross validation in the presence of spatial autocorrelation. Part III applies the knowledge gained to tackle real world problems, including representing and modeling transport systems, finding optimal locations for stores or services, and ecological modeling. Exercises at the end of each chapter give you the skills needed to tackle a range of geospatial problems. Solutions for each chapter and supplementary materials providing extended examples are available at <https://geocompr.github.io/geocompr/pkg/articles>.
