Genetic Afterlives Noah Tamarkin, 2020-09-11 In 1997 M E R Mathivha an elder of the black Jewish Lemba people of South Africa announced to the Lemba Cultural Association that a recent DNA study substantiated their ancestral connections to Jews Lemba people subsequently leveraged their genetic test results to seek recognition from the post apartheid government as indigenous Africans with rights to traditional leadership and land retheorizing genetic ancestry in the process In Genetic Afterlives Noah Tamarkin illustrates how Lemba people give their own meanings to the results of DNA tests and employ them to manage competing claims of Jewish ethnic and religious identity African indigeneity and South African citizenship Tamarkin turns away from genetics researchers results that defined a single story of Lemba peoples true origins and toward Lemba understandings of their own genealogy as multivalent Guided by Lemba people's negotiations of their belonging as diasporic Jews South African citizens and indigenous Africans Tamarkin considers new ways to think about belonging that can acknowledge the importance of historical and sacred ties to land without valorizing autochthony borders or other technologies of exclusion

Historical Dictionary of South Africa Christopher Saunders, Peter Limb, 2020-12-15 As the most influential and powerful country on the entire continent of Africa an understanding of South Africa's past and its present trends is crucial in appreciating where South Africans are going to and from where they have come South Africa changed dramatically in 1994 when apartheid was dismantled and it became a democratic state Since 2000 when the previous edition appeared further big changes occurred with the rise of new political leaders and of a new black middle class There were also serious problems in governance in public health and the economy but with a remarkable popular resilience too This third edition of Historical Dictionary of South Africa contains a chronology an introduction and an extensive bibliography The dictionary section has more than 600 cross referenced entries on important personalities as well as aspects of the country's politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about South Africa

Theory in Africa, Africa in Theory Stephanie Wynne-Jones, Jeffrey Fleisher, 2015-06-19 Theory in Africa Africa in Theory explores the place of Africa in archaeological theory and the place of theory in African archaeology The centrality of Africa to global archaeological thinking is highlighted with a particular focus on materiality and agency in contemporary interpretation As a means to explore the nature of theory itself the volume also addresses differences between how African models are used in western theoretical discourse and the use of that theory within Africa Providing a key contribution to theoretical discourse through a

focus on the context of theory building this volume explores how African modes of thought have shaped our approaches to a meaningful past outside of Africa A timely intervention into archaeological thought Theory in Africa Africa in Theory deconstructs the conventional ways we approach the past positioning the continent within a global theoretical discourse and blending Western and African scholarship This volume will be a valuable resource for those interested in the archaeology of Africa as well as providing fresh perspectives to those interested in archaeological theory more generally **Mapungubwe**

Archaeological Heritage Protection and Communities in the Limpopo Province of South Africa Innocent Pikirayi, 2011 This book captures community voices in matters relating to their relationship with specific archaeological heritage sites and landscapes in the Limpopo Province of South Africa Focusing on the stonewalled archaeological heritage associated with Venda speakers and the reburial in 2008 of human remains excavated by the University of Pretoria from the cultural landscape of Mapungubwe the book attempts to establish why archaeology and cultural heritage conservation struggle for relevance in South Africa today In articulating the relevance of archaeology in South Africa in particular and southern Africa in general and in the context of public or community based archaeology the book explores how communities

and the public interact use and negotiate with their pasts The research critiques the notion of archaeological heritage conservation and attempts to understand cultural heritage conservation from the perspectives of descendant communities The book further exposes the conflict between cultural heritage protection efforts and modern development and questions the role of such efforts given the challenges of unemployment social inequality and poverty in democratic South Africa The book is also about community engagement in archaeology specifically in matters relating to access to cultural heritage resources This study suggests that there is scope for community archaeology to take centre stage and drive future directions in archaeology if archaeologists change their approach in dealing with communities Researchers are challenged in this study to rethink the notion of heritage to debate the objectives behind cultural heritage conservation and to critically reexamine the relevance of archaeology today This study suggests that the conflicting positions between heritage managers archaeologists and descendant communities may be resolved through sharing of tradition with the present

Elephant management Robert (Bob) Scholes, Kathleen G Mennell, 2008-03-01 Elephants are among the most magnificent but also most problematic members of South Africa's wildlife population While they are sought after by South African and foreign tourists alike they also have a major impact on their environment As a result elephant management has become a highly complex and often controversial discipline The information needed to underpin vital decisions about elephant management has largely been unavailable to decision makers contested by experts or simply unknown As a result the South African Minister for Environmental Affairs and Tourism convened a round table to advise him on this issue The round table recommended that a scientific assessment of elephant management be undertaken to gather evaluate and present all the relevant information on this topic Its main findings and recommendations are contained in this volume *Elephant Management* is the first book of its kind combining the work of more than 60 national and international experts Extensively reviewed by policy makers and other stakeholders it is the most systematic and comprehensive review of savanna elephant populations and factors relevant to managing them to date As such it is of interest to a broad spectrum of readers in South Africa and elsewhere Above all it is aimed at helping conservation policy makers and practitioners to choose the best possible options for the sustainable preservation of these iconic animals
