Marine Corps,2017-09-26 This publication is about winning in combat Winning requires many things excellence in techniques an appreciation of the enemy exemplary leadership battlefield judgment and focused combat power Yet these factors by themselves do not ensure success in battle Many armies both winners and losers have possessed many or all of these attributes When we examine closely the differences between victor and vanquished we draw one conclusion Success went to the armies whose leaders

senior and junior could best focus their efforts their skills and their resources toward a decisive end Their success arose not merely from excellence in techniques procedures and material but from their leaders abilities to uniquely and effectively combine them Winning in combat depends upon tactical leaders who can think creatively and act decisively This book pertains equally to all Marine leaders whether their duties entail combat service support combat support or combat arms It applies to the Marine air ground task force commander as well as the squadron commander and the fire team leader All Marines face tactical decisions in battle regardless of their roles Tactical leaders must develop and hone their warfighting skills through study and practice This publication serves as a guide for that professional development It addresses the theory of tactics and its application in a chaotic and uncertain environment The concepts and ideas within this publication are battle tested Throughout our history one of the most important reasons for the success of the United States Marine Corps has been the military skill of our leaders at every level of command Through their tactical skill and battlefield judgment our commanders achieved tactical and operational advantage at the decisive time and place

**TM 9-775 Landing Vehicle Tracked, Lvt Mk. I and Mk. II Technical Manual** War Department, 2013-05-01 The Landing Vehicle Tracked LVT was a class of amphibious warfare vehicle a small landing craft introduced by the United States Navy Marine Corps and Army during World War II Originally intended solely as cargo carriers for ship to shore operations they rapidly evolved into assault troop and fire support vehicles as well The LVT Mark I was the first military model Traveling at a respectable six knots in the water and twelve mph on land it could deliver twenty four fully equipped assault troops to the beach Though it was only intended for delivering supplies inland until wheeled vehicles could be brought ashore the LVT could supply supporting fire from two 30 cal M1919 Browning machine guns Many LVTs were refitted prior to the Tarawa landing to hold two 50 cal Browning heavy machine guns forward with the 30 cal guns aft The vehicle was not armored and its thin steel hull offered virtually no protection although prior to Tarawa some vehicles received nine mm of armor plating to the cab The LVT s tracks performed well on sand but not on tough surfaces The rigid suspension threw tracks and roller bearings corroded in salt water Proper maintenance of the new machine was often an issue as few Marines were trained to work on it and early models suffered frequent breakdowns The LVT Mark II featured new powertrain and torsilastic suspension The aluminium track grousers were bolted on making changes much easier since they wore out quickly on land and more so on coral Hard terrain performance was much better compared to the LVT Mark I Created in 1944 this technical manual reveals a great deal about the LVT s design and capabilities Intended as a manual for those charged with operation and maintenance it details many aspects of its engine cooling fuel powertrain and other systems Originally labeled restricted this manual was declassified long ago and is here reprinted in book form Care has been taken to preserve the integrity of the text
