Grounded Theory In Management Research Sage Series In Management Research:

Grounded Theory in Management Research. Sage Series in Management Research ,2001 Grounded Theory in Management Research provides a comprehensive introduction to the widely used qualitative method of grounded theory

Grounded Theory in Management Research Karen D Locke,2000-11-23 This is an excellent text for anyone wishing to explore the possibilities of a grounded theory approach in management and organizational research The first two parts ought to be essential reading in methods courses regardless of the field of investigation Organization Studies resources for conducting grounded theory are spread across a number of disciplines making it difficult for organization and management scholars to track them down This book describes the grounded theory approach for organization and management researchers needing to fully understand the possibilities and challenges of this method It brings together the broadly dispersed discussions of the logic and practices of grounded theory restoring this style of qualitative research for students and teachers of organization and management Management Research News Given its content and style of writing this book will be useful not only to organisational scholars but also to those such fields as sociology nursing education and psychology Mihaela Kelemen Nurse Researcher This book describes the grounded theory approach for organization and management researchers needing to fully understand the possibilities and challenges of this method It brings together the broadly dispersed discussions of grounded theory s logic and practices restoring the grounded theory style of qualitative research for students and teachers of organization and management This book is particularly useful for graduate students involved in quantitative studies of organizational and managerial life and for academics teaching research methods courses in management and organization studies **ECRM 2021 20th European Conference on Research Methods in Business and Management** Dr Manuel Au-Yong-Oliveira,Prof Carlos Costa,2021-06-07 Conference Proceedings of 20th European Conference on Research Methods in Business and Management *The Public Sector Accounting, Accountability and Auditing in Emerging Economies'* Kelum Jayasinghe,Nirmala Nath,Radiah Othman,2015-10-16 Volume 15 of Research in Accounting in Emerging Economies focuses on how NPM ideas have been conceptualised implemented and affected the accounting accountability and auditing practices in emerging economies characterised by different ideologies social and political factors Advanced Research Methods in the Built Environment Andrew Knight,Les Ruddock,2009-03-16 This book provides a bridge between the introductory research methods books and the discipline specific higher level texts Its unique feature is the coverage of the detailed process of research rather than the findings of research projects Chapter authors have been carefully selected by their expertise discipline and location to give an eclectic range of perspectives Particular care has been taken to balance positivist with interpretivist approaches throughout The authors focus is on the practical consequences of research philosophies strategies and techniques by using their own research and by evaluating the work of others Advanced Research Methods in the Built Environment addresses common topics raised by postgraduate level researchers

rather than dealing with all aspects of the research process Issues covered range from the practicalities of producing a journal article to the role of theory in research The material brought together here provides a valuable resource for the training and development of doctoral and young researchers and will contribute to a new sense of shared methodological understanding across built environment research

Enacting Research Methods in Information Systems: Volume 1 Leslie P. Willcocks, Chris Sauer, Mary C. Lacity, 2016-05-30 This edited three volume edition brings together significant papers previously published in the Journal of Information Technology JIT over its 30 year publication history The three volumes of *Enacting Research Methods in Information Systems* celebrate the methodological pluralism used to advance our understanding of information technology's role in the world today In addition to quantitative methods from the positivist tradition JIT also values methodological articles from critical research perspectives interpretive traditions historical perspectives grounded theory and action research and design science approaches Volume 1 covers Critical Research Grounded Theory and Historical Approaches Volume 2 deals with Interpretive Approaches and also explores Action Research Volume 3 focuses on Design Science Approaches and discusses Alternative Approaches including Semiotics Research Complexity Theory and Gender in IS Research The Journal of Information Technology JIT was started in 1986 by Professors Frank Land and Igor Aleksander with the aim of bringing technology and management together and bridging the great divide between the two disciplines The Journal was created with the vision of making the impact of complex interactions and developments in technology more accessible to a wider audience Retaining this initial focus the JIT has gone on to extend into new and innovative areas of research such as the launch of JITTC in 2010 A high impact journal JIT shall continue to publish leading trends based on significant research in the field

The Oxford Handbook of Identities in Organizations Andrew D. Brown, 2020-01-09 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are

considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies

Boards Under Crisis A. Lavin Fernandez,Carmelo Mazza,2024-12-24 Crises in the past have been cyclical events in economic history However we are currently experiencing an acceleration of these cycles with shorter time span in between major events In a period of 20 years from 2001 to 2021 we have lived three global major crisis events The Twin Tower Attack on September 11th 2001 the Financial Crash in 2008 and the Covid 19 pandemic from 2020 In the first edition of this book the authors explained the main decision making patterns of behavior i e short termism centralization and parochialism that characterized the management processes of Boards of Directors during the financial crash Now in this revised and updated second edition the authors explore the main commonalities and differences between decision making at the top during the previous financial crisis and during the most recent Covid 19 global pandemic as well as during the inception of the war in Ukraine In doing so they ask is this a new crisis or just the new normal that businesses and organizations need to face after major catastrophic events By first reassessing the very meaning of the word crisis the authors explore the relationship between frequent crises emergency cabinets and socially widespread fear as determinants of a new normal rather than as the extraordinary state of our societies In this sense the authors identify more nuanced and updated consequences of short termism centralization and parochialism that could shape the changes after the current crisis and the approach to next crisis to come
