Youth sports: growth, maturation and talent, 2ª Edição Manuel J. Coelho e Silva, António J. Figueiredo, Marije T Elferink-Gemser, Robert M. Malina, 2016-03-01 A prepara o a longo prazo de jovens atletas para o alto rendimento pode ser incompatível com o processo de curto prazo centradas na obtenção imediata de resultados desportivos. O conhecimento do essencial dos processos de crescimento e maturação pode confluir na máxima expressão das capacidades individuais e por outro lado evitar o esgotamento precoce dos sistemas biológicos e psicológicos de que depende o rendimento desportivo. Outro imperativo: qualidade do processo de treino com crianças e jovens decorre da gestão das exigências da participação desportiva em termos familiares e escolares na observância de princípios essenciais para o desenvolvimento pessoal e social. O presente livro e os seus autores oferecem uma coleção de capítulos devidamente organizados cobrindo tópicos fundamentais ao treinador e às organizações que enquadram a formação desportiva. Em resumo, a investigação presta um valioso contributo ao desenvolvimento do treino desportivo.

Oxford Textbook of Children's Sport and Exercise Medicine Neil Armstrong, Willem Van Mechelen, 2023 The 4th edition of the Oxford Textbook of Children's Sport and Exercise Medicine is the definitive single volume reference in the field presented in four sections: Exercise Science, Exercise Medicine, Sport Science and Sport Medicine.

The Athletic Skills Model René Wormhoudt, Geert J.P. Savelsbergh, Jan Willem Teunissen, Keith Davids, 2017-10-12 The Athletic Skills Model offers an alternative to dominant talent development theories in the form of holistic broad based movement education focusing on health and wellbeing. It places the emphasis on physical intelligence including attributes such as agility, flexibility and stability through adaptable and varied training programmes creating a skilled athlete before introducing sport specialization. The book sets out the scientific underpinnings of the ASM before going on to offer practical guidance on the content of the programme, how to adapt and vary the programme and how to apply the approach to different age groups and sports. The ASM's application in the youth development programme at AFC Ajax is explored in depth before a future of talent development with an emphasis on athletic rather than sport specific expertise is imagined. The Athletic Skills Model introduces an important and timely challenge to conventional wisdom in talent development and is a fascinating read for any upper level student or researcher interested in youth development skill.

variables can also influence performance and the psychophysiological system has a strong effect on the control of physical capacities. Moreover, pacing behaviour, decision making, self-regulation and effort perception can also explain the role of the brain in physical activity and exercise management. Thus, the aim of this Research Topic is to share the impact of a psychophysiological approach in physical activity, exercise and sports. The goal of this Topic is to address the following factors determining performance: including technical, tactical, physiological, cognitive and psychosocial training and competition demand, training interventions and testing in sports, acute and chronic effects of training in psychophysiological variables, coaching in sports, strength and conditioning, mental health and performance, recent developments within sports sciences research. This Research Topic endeavors to explore at specific themes related to physiological stress and mental well-being. Additionally, we aim to provide evidence to coaches and sports scientists highlighting the relationship between training and competition demands related to performance. We also want to analyze the effects of strength and conditioning training and coaching effects, acute and chronic, on psychological and physiological. Finally, it is our intention to provide scientific literature with evidence for a relationship between movement behavior and cognition with physiological performance, the psychophysiological approach.
