Guerrilla Metaphysics Phenomenology And The Carpentry Of Things:

Guerrilla Metaphysics Graham Harman, 2011-08-31 In Guerrilla Metaphysics Graham Harman develops further the object oriented philosophy first proposed in Tool Being Today's fashionable philosophies often treat metaphysics as a petrified relic of the past and hold that future progress requires an ever further abandonment of all claims to discuss reality in itself Guerrilla Metaphysics makes the opposite assertion challenging the dominant philosophy of access both continental and analytic that remains quarantined in discussions of language perception or literary texts Philosophy needs a fresh resurgence of the things themselves not merely the words or appearances themselves Once these themes are adapted to the needs of an object oriented philosophy what emerges is a brand new type of metaphysics a guerrilla metaphysics **Objects and Materials** Penny Harvey, Eleanor Conlin Casella, Gillian Evans, Hannah Knox, Christine McLean, Elizabeth B. Silva, Nicholas Thoburn, Kath Woodward, 2014-07-16 There is broad acceptance across the Humanities and Social Sciences that our deliberations on the social need to take place through attention to practice to object mediated relations to non human agency and to the affective dimensions of human sociality This Companion focuses on the objects and materials found at centre stage and asks what matters about objects Objects and Materials explores the field providing succinct summary accounts of contemporary scholarship along with a wealth of new research investigating the capacity of objects to shape unsettle and exceed expectations Original chapters from over forty international interdisciplinary contributors address an array of objects and materials to ask what the terms of collaborations with objects and materials are and to consider how these collaborations become integral to our understandings of the complex relational dynamics that fashion social worlds Objects and Materials will be of interest to students and scholars across the social sciences and humanities including in sociology social theory science and technology studies history anthropology archaeology gender studies women's studies geography cultural studies politics and international relations and philosophy **Miscommunications** Timothy Barker, Maria Korolkova, 2021-01-14 What happens when communication breaks down Is it the condition for mistakes and errors that is characteristic of digital culture And if mistakes and errors have a certain power what stands behind it To address these questions this collection assembles a range of cutting edge philosophical socio political art historical and media theoretical inquiries that address contemporary culture as a terrain of miscommunication If the period since the industrial revolution can be thought of as marked by the realisation of the possibilities for global communication in terms of the telephone telegraph television and finally the internet Miscommunications shows that to think about the contemporary historical moment a new history and theory of these devices needs to be written one which illustrates the emergence of the current cultures of miscommunication and the powers of the false The essays in the book chart the new conditions for discourse in the 21st century and collectively show how studies of communication can be refigured when we focus on the capacity for errors accidents mistakes malfunctions and both intentional and non intentional miscommunications The

Democracy of Objects Levi R. Bryant, 2023-12-23 In *The Democracy of Objects* Levi R Bryant challenges traditional hierarchies within the realm of ontology proposing a radical rethinking of the relationships between human and non human entities Drawing upon a rich array of philosophical influences including the work of Graham Harman and the broader speculative realism movement Bryant articulates a framework where all objects possess agency and significance irrespective of their scale or context His writing is marked by clarity and rigor blending theoretical explorations with practical implications in an accessible manner that invites a reconsideration of how we perceive the world around us Levi R Bryant is a prominent figure in contemporary philosophy known for his contributions to object oriented ontology and his critiques of correlationism His academic background in philosophy alongside his engagement with digital culture and technology provides a unique lens through which he examines the implications of a non hierarchical ontology Bryant s intellectual journey resonates with the themes of interconnectedness and equality he champions in his work allowing him to illuminate the unseen relationships that bind objects to one another For readers interested in philosophical discourse that transcends anthropocentrism *The Democracy of Objects* is an essential text Bryant s insightful arguments encourage us to expand our understanding of agency and existence making this book a valuable resource for both seasoned philosophers and those curious about the evolving landscape of contemporary thought

Understanding the Archaeological Record Gavin Lucas, 2012-02-06 This book explores the diverse understandings of the archaeological record in both historical and contemporary perspective while also serving as a guide to reassessing current views Gavin Lucas argues that archaeological theory has become both too fragmented and disconnected from the particular nature of archaeological evidence The book examines three ways of understanding the archaeological record as historical sources through formation theory and as material culture then reveals ways to connect these three domains through a reconsideration of archaeological entities and archaeological practice Ultimately Lucas calls for a rethinking of the nature of the archaeological record and the kind of history and narratives written from it

Markus Gabriel's New Realism Jan Voosholz, 2024-12-02 This is the first volume focused on Markus Gabriel s version of New Realism which spans the fields of metaphysics ontology philosophy of mind epistemology philosophy of science and meta philosophy Most of the selected contributions are directly or indirectly concerned with Gabriel s fields of sense ontology his version of a thoroughly realistic pluralism While some take up criticisms from previous debates surrounding Gabriel s philosophy and New Realism in general others advance completely new and innovative challenges for this highly systematic thinker Overall the contributions provide both a substantive commentary on Gabriel s work and a multifaceted critical assessment of its underlying ideas The book is not only an essential addition to the debate surrounding New Realism but also furthers the discussions about naturalism deflationist ontologies contextualism and mereological arguments to which Gabriel s work has contributed in recent years

Philosophy Outside-In Christopher Norris, 2013-08-23 Christopher Norris raises some basic questions about the way that analytic philosophy has been

conducted over the past 25 years In doing so he offers an alternative to what he sees as an over specialisation of a lot of recent academic work Arguing that analytic philosophy has led to a narrowing of sights to the point where other approaches that might be more productive are blocked from view he goes against the grain to claim that Continental philosophy holds the resources for a creative renewal of analytic thought

After the "Speculative Turn": Realism, Philosophy, and Feminism

Katerina Kolozova, Eileen A. Joy, 2016 Recent forms of realism in continental philosophy that are habitually subsumed under the category of speculative realism a denomination referring to rather heterogeneous strands of philosophy bringing together object oriented ontology OOO non standard philosophy or non philosophy the speculative realist ideas of Quentin Meillassoux and Marxism have provided grounds for the much needed critique of culturalism in gender theory and the authority with which post structuralism has dominated feminist theory for decades This publication aims to bring forth some of the feminist debates prompted by the so called speculative turn while demonstrating that there has never been a niche of speculative realist feminism Whereas most of the contributions featured in this collection provide a theoretical approach invoking the necessity of foregrounding new forms of realism for a feminism beyond gender as culture some of the essays tackle OOO only to invite a feminist critical challenge to its paradigm while others refer to some extent to non philosophy or the new materialisms but are not reducible to either of the two We have invited essays from intellectual milieus outside the Anglo Saxon academic center bringing together authors from Serbia Slovenia France Ireland the UK and Canada aiming to promote feminist internationalism rather than a generous act of cultural inclusion

punctum 2012 On Style An Atelier punctum 2013 Speculative Medievalisms Discography punctum 2013 Burn After Reading punctum 2014 and Fragments for a History of a Vanishing Humanism Ohio State 2016 Jean-Luc Nancy and Plural Thinking Peter Gratton, Marie-Eve Morin, 2012-08-09 Jean Luc Nancy is one of the leading voices in European philosophy of the last thirty years and he has influenced a range of fields including theology aesthetics and political theory This volume offers the widest and most up to date responses to his work oriented by the themes of world finitude and sense with attention also given to his recent project on the deconstruction of Christianity Focusing on Nancy s writings on globalization Christianity the plurality of art forms his materialist ontology as well as a range of contemporary issues an international group of scholars provides not just inventive interpretations of Nancy s work but also essays taking on the most pressing issues of today The collection brings to the fore the originality of his thinking and points to the future of continental philosophy A previously unpublished interview with Nancy concludes the volume *Being Posthuman* Zahi Zalloua, 2020-12-10 Posthumanism is both a descriptive and a prescriptive term Firstly it registers a shift beginning in the late 1960s and epitomized by Foucault s the death of Man Secondly it refers to the future and a new relationship with the non human along with a different understanding of human exceptionalism In *Being Posthuman Ontologies of the Future* Zahi Zalloua interrogates this future and shows that post does not necessarily mean after or that what comes after is more advanced than what has gone before He pursues this line of inquiry across four distinct yet interrelated figures cyborgs animals objects and racialized and excluded others These figures disrupt the narrative of the human and its singularity and by reading them together Zalloua determines that it is only when posthumanist discourse is combined with psychoanalysis that subjectivity can be properly examined Sartre on Subjectivity and Selfhood Simon Gusman, 2020-10-08 This book examines the concepts of subjectivity and selfhood developed in the oeuvre of Jean Paul Sartre Although Sartre is a prominent philosopher the reception of his work is shrouded in misguided ideas concerning his alleged subjectivism This book accurately positions Sartre in debates concerning the two themes which form a guiding thread throughout his work and remain immensely relevant in the philosophical landscape of today Gusman expertly tracks and uncovers the nuances of the evolving notions of subjectivity and selfhood paying particular attention to his claim that the Self is a thing among things and to his views on narrative identity Using as a framework the critical reception from thinkers in Sartre s own tradition the book also draws from the recent popularity of his thought in analytic philosophy of mind Illuminating and impactful this book provides an invaluable resource to scholars looking for a contemporary and up to date critical study of Sartre s work Robert Smithson, Land Art, and Speculative Realities Rory O'Dea, 2023-10-23 This book explores the ways Robert Smithson s art revealed and defamiliarized the constructs of rational reality in order to allow radically speculative alternatives to emerge In this way his art is conceived as a true fiction that eradicates a false reality By tracing the web of correspondences between Smithson and science fictional speculative and mystical modes of thought Rory O Dea explores the

aesthetic encounters engendered by his art as a means to warp the contours of reality and loosen the boundaries of being human Given the current and impending catastrophes of the Anthropocene which represents the ever expanding planetary shadow cast by humanism the possibility of being other than human posited by Smithson's art is a matter of urgent concern The book will be of interest to scholars working in art history contemporary art American studies and environmental humanities

The Oxford Handbook of the Archaeology of the Contemporary World Paul Graves-Brown, Rodney Harrison, Angela Piccini, 2013-10-17 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social cultural and historical circumstances archaeology is always carried out in the present More recently however many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself how we might undertake archaeologies of as well as in the present This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past In addition to detailed archaeological case studies it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world including anthropology psychology philosophy historical geography science and technology studies communications and media ethnoarchaeology forensic archaeology sociology film performance and contemporary art This volume seeks to explore the boundaries of an emerging sub discipline to develop a tool kit of concepts and methods which are applicable to this new field and to suggest important future trajectories for research It makes a significant intervention by drawing together scholars working on a broad range of themes approaches methods and case studies from diverse contexts in different parts of the world which have not previously been considered collectively

The Thinking University Søren S.E. Bengtson, Ronald Barnett, 2018-04-27 This book reinvigorates the philosophical treatment of the nature purpose and meaning of thought in today's universities The wider discussion about higher education has moved from a philosophical discourse to a discourse on social welfare and service economics and political agendas This book reconnects philosophy with the central academic concepts of thought reason and critique and their associated academic practices of thinking and reasoning Thought in this context should not be considered as a merely mental or cognitive construction still less a cloistered college but a fully developed individual and social engagement of critical reflection and discussion with the current pressing disciplinary political and philosophical issues The editors hold that the element of thought and the ability to think in a deep and groundbreaking way is still the essence of the university But what does it mean to think in the university today And in what ways is thought related not only to the epistemological and ontological issues of philosophical debate but also to the social and political dimensions of our globalised age In many countries the state is imposing limitations on universities dismissing or threatening academics who speak out critically With this volume the editors ask questions such as What is the value of thought What is the university's proper relationship to thought To give the

notion of thought a thorough philosophical treatment the book is divided into in three parts The focus moves from an epistemological perspective in Part I to a focus on existence and values in higher education in Part II and then to a societal oriented focus on the university in Part III All three parts in their own ways debate the notion of thought in higher education and the university as a thinking form of being Continental Realism and Its Discontents Morin Marie-Eve Morin,2017-06-23 Speculative realism challenges philosophical approaches and traditions for supposedly failing to do justice to the real world Taking this realist challenge seriously Continental Realism and Its Discontents refuses to discard the philosophical contributions of Kant Schelling Merleau Ponty Derrida and Nancy without closer scrutiny Instead the contributors turn to these thinkers to meet the challenge of realism in contemporary philosophy New Approaches to Ancient Material Culture in the Greek & Roman World Catherine Cooper,2020-11-16 New Approaches to Ancient Material Culture in the Greek Roman World is about Classical Archaeology at its broadest and is important reading to all Classicists As part of a recent movement to highlight the rich diversity of the subject it overcomes traditional disciplinary boundaries to show the variety of current approaches to the study of Classical Antiquity from the Late Bronze Age to the Late Antique period The multi disciplinary papers deal with archaeology and art history museum objects and fieldwork data ancient texts and material culture archaeological theory and historiography and technical and literary analysis The international contributors discuss a selection of methodologies currently used to study ancient material and illustrate their relevance through case studies which span the Greek and Roman world **15 Years of Speculative Realism** Charlie Johns,2024-09-27 A definitive and invaluable re assessment of the last decade of speculative realism **Diseases of the Head** Matt Rosen,2020 Diseases of the Head is an anthology of essays from contemporary philosophers artists and writers working at the crossroads of speculative philosophy and speculative horror At once a compendium of multivocal endeavors a breviary of supposedly illicit ponderings and a travelogue of philosophical exploration this collection centers itself on the place at which philosophy and horror meet Employing rigorous analysis incisive experimentation and novel invention this anthology asks about the use that speculation can make of horror and horror of speculation about whether philosophy is fictional or fiction philosophical and about the relationship between horror the exigencies of our world and time and the future developments that may await us in philosophy itself From philosophers working on horrific themes to horror writers influenced by heresies in the wake of post Kantianism to artists engaged in projects that address monstrosity and alienation Diseases of the Head aims at nothing less than a speculative coup d tat Refusing both total negation and absolute affirmation refusing to deny everything or account for everything refusing the posture of critique and the posture of all encompassing unification this collection of essays aims at exposition and construction analysis and creation it desires to fight for some thing but not everything and not nothing And it desires most of all to speak from the position of its own insufficiency its own partiality its own under determinacy which is always indicative of the practice of thinking of speculation Considering themes

of anonymity otherness and alterity the gothic extinction and the world without us the end times the apocalypse the ancient and the world before us and the uncanny or unheimlich among other motifs this anthology seeks to articulate the cutting edge which can be found at the intersection of speculative philosophy and speculative horror **Boring Formless**

Nonsense eldritch Priest, 2013-02-14 Boring Formless Nonsense intervenes in an aesthetics of failure that has largely been delimited by the visual arts and its avant garde legacies It focuses on contemporary experimental composition in which failure rubs shoulders with the categories of chance noise and obscurity In these works we hear failure anew We hear boredom formlessness and nonsense in a way that gives new purchase to aesthetic philosophical and ethical questions that falter in their negative capability Reshaping debates on failure as an aesthetic category eldritch Priest shows failure to be a highly dubious concept The book frames recent experimental composition as a deviant kind of sound art whose affective and formal elements reflect on current issues in contemporary culture and offers analyses of musical works and performance practices that are rarely heard let alone considered as significant cultural phenomena showing the role that obscurity and the esoteric have in articulating current cultural realities Ambitious in content and experimental in its approach Boring Formless Nonsense will challenge and fracture your views on failure creativity and experimental music *The Universe of Things* Steven Shaviro, 2014-10-01 From the rediscovery of Alfred North Whitehead's work to the rise of new materialist thought including object oriented ontology there has been a rapid turn toward speculation in philosophy as a way of moving beyond solely human perceptions of nature and existence Now Steven Shaviro maps this quickly emerging speculative realism which is already dramatically influencing how we interpret reality and our place in a universe in which humans are not the measure of all things The Universe of Things explores the common insistence of speculative realism on a noncorrelationist thought that things or objects exist apart from how our own human minds relate to and comprehend them Shaviro focuses on how Whitehead both anticipates and offers challenges to prevailing speculative realist thought moving between Whitehead's own panpsychism Harman's object oriented ontology and the reductionist eliminativism of Quentin Meillassoux and Ray Brassier The stakes of this recent speculative realist thought of the effort to develop new ways of grasping the world are enormous as it becomes clear that our inherited assumptions are no longer adequate to describe much less understand the reality we experience around us As Shaviro acknowledges speculative realist thought has its dangers but it also like the best speculative fiction holds the potential to liberate us from confining views of what is outside ourselves and he believes to reclaim aesthetics and beauty as a principle of life itself Bringing together a wide array of contemporary thought and evenhandedly assessing its current debates The Universe of Things is an invaluable guide to the evolution of speculative realism and the provocation of Alfred North Whitehead's pathbreaking work
