Medical Image Computing and Computer-Assisted Intervention - MICCAI 2002 Takeyoshi Dohi, Ron Kikinis, 2003-06-30 The fifth international Conference in Medical Image Computing and Computer Assisted Intervention MICCAI 2002 was held in Tokyo from September 25th to 28th 2002 This was the first time that the conference was held in Asia since its foundation in 1998 The objective of the conference is to offer clinicians and scientists the opportunity to collaboratively create and explore the new medical field Specifically MICCAI offers a forum for the discussion of the state of art in computer assisted interventions medical robotics and image processing among experts from multi disciplinary professions including but not limited to clinical doctors computer scientists and mechanical and biomedical engineers The expectations of society are very high the advancement of medicine will depend on computer and device technology in coming decades as they did in the last decades We received 321 manuscripts of which 41 were chosen for oral presentation and 143 for poster presentation Each paper has been included in these proceedings in eight page full paper format without any differentiation between oral and poster papers Adherence to this full paper format along with the increased number of manuscripts surpassing all our expectations has led us to issue two proceedings volumes for the first time in MICCAI's history Keeping to a single volume by assigning fewer pages to each paper was certainly an option for us considering our budget constraints However we decided to increase the volume to offer authors maximum opportunity to

argue the state of art in their work and to initiate constructive discussions among the MICCAI audience Official Gazette of the United States Patent and Trademark Office ,2002 Specifications and Drawings of Patents Issued from the United States Patent Office United States. Patent Office,1907 **Percutaneous and Interventional Urology and Radiology**

Erich K. Lang,2012-12-06 Any book with the words percutaneous and interventional is immediately identified as one that brings to its readers a distillation of a number of new and exciting techniques Percutaneous is not exactly a new word but it has come to take on an entirely new meaning in recent years Interventional is a recent acquisition to medical language indicating an entirely new approach to many aspects of medical management Exactly when is the right time to make a distillation of new thoughts and expertise requires something of the art of a master brewer First the ingredients must be prepared the recipe must be just right there must be excellent quality control as well as the master brewer s touch to produce the product when the time is right Dr Lang has assembled just the right ingredients in the form of a very impressive team of experts in these new fields of uro-radiology and urological management Ventures into percutaneous urology may date back 30 years but the main growth in the range of procedures and the development of the technology has occurred only in the last 10 years Relieving upper tract obstruction seemed a natural sequel to renal biopsy but the imagination to develop an effective treatment for stones was an impressive extension of the concept of minimally invasive surgery **Cannulated**
